

Entry details page

Last Modified on 12/19/2024 3:36 pm IST

 This article is designated for administrators.

About

The **entry details page** is your go-to hub for managing media assets. From customizing thumbnails to controlling access and scheduling, managing transcoding flavors, handling distribution and Live Streams, uploading captions and related files, editing video clips, adding advertisements, to managing user roles and permissions, it's all conveniently accessible in one place.

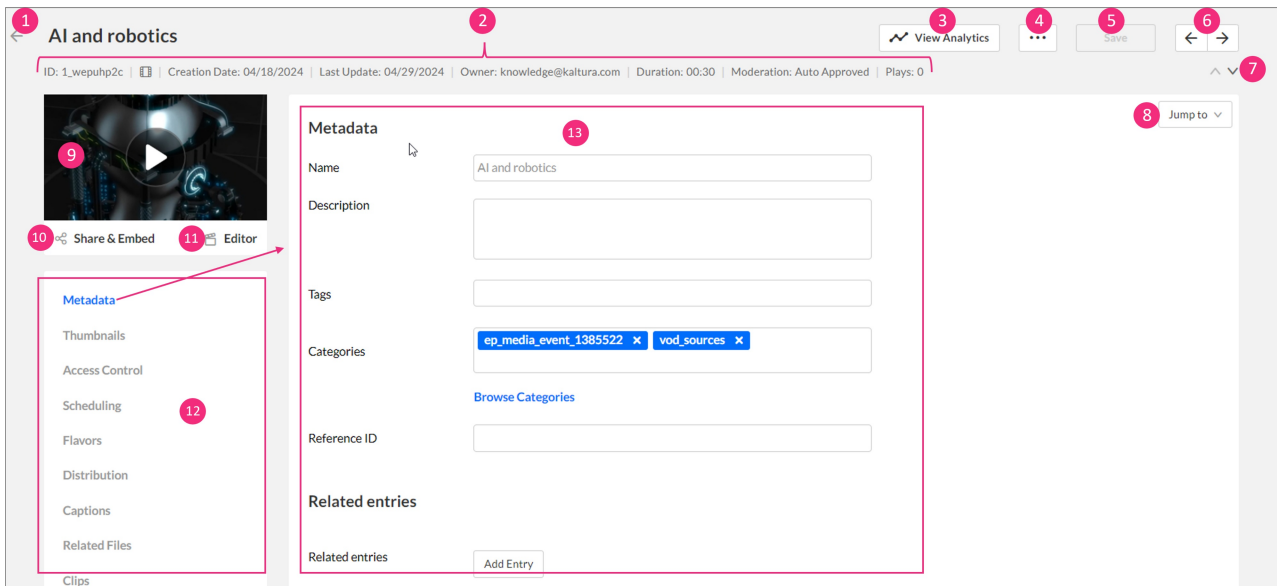

Access the entry details page

1. To access the **entry details page**, simply log into your Kaltura Management Console.
The **Entries** page displays by default.
2. Click on the desired entry's title or thumbnail.

The entry details page displays.

Entry details page overview

- **Back arrow (1)** - Click to return to the [Entries](#) page.
- **Entry details (2)** - These are the details that display vary according to the type of media you select:
 - Entry Id
 - Creation Date
 - Last Update
 - Owner
 - Duration
 - Moderation Status
 - Plays
- **'View Analytics' button (3)** - Click to access the entry analytics dashboard. To learn more, visit our article [Entry Level Analytics](#).
- **Three dots menu (4)** - Click to access Download, [Share & Embed](#), [Launch Editor](#) and Delete functions.
- **'Save' button (5)** - Click to save any changes (the button is disabled until data is modified).
- **Navigation arrows (6)** - Use to navigate to the next or previous entry.
- **Navigation arrow (7)** - Use to navigate the entry details.
- **'Jump to' drop-down menu (8)** - Choose a section of the page to jump to.
- **Entry thumbnail (9)** - This is the default thumbnail of the media (videos will also have a play button for previewing).
- **'Share & Embed' function (10)** - Click to access the Share & Embed page. For more information, visit our article [Share and Embed Media](#).
- **Editor (11)** - Click to launch Kaltura's Video Editor. For more information, check out our article [Kaltura Video Editing Tools - Editor tab](#).

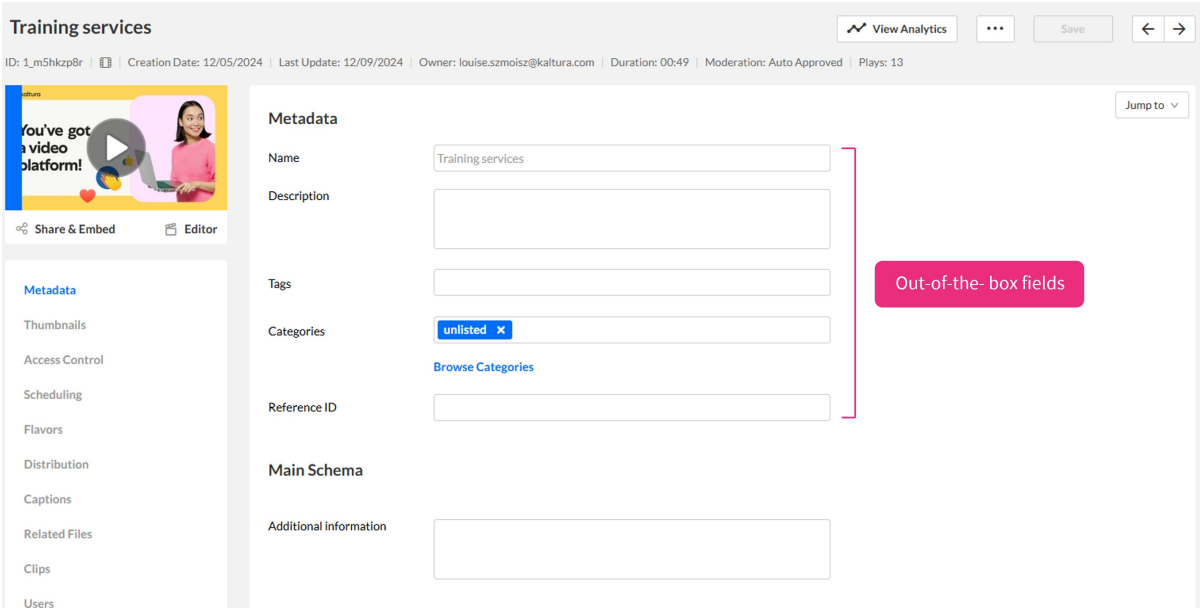

- **Editing tabs (12)** - These are tabs that display according to the type of media you selected (see below).
- **Editing fields (13)** - This is the information that displays according to the tab you're on.

Editing tabs

Metadata

Entry Metadata fields are used to tag, manage, search and expose content. You can populate out-of-the-box fields or create your own custom metadata schema. Kaltura provides extensive asset management and metadata capabilities. Each media entry has a list of predefined metadata fields including: Name, Description, Tags, Categories, Thumbnails, Duration, Views, and other fields. See [Custom Data](#) for more information.

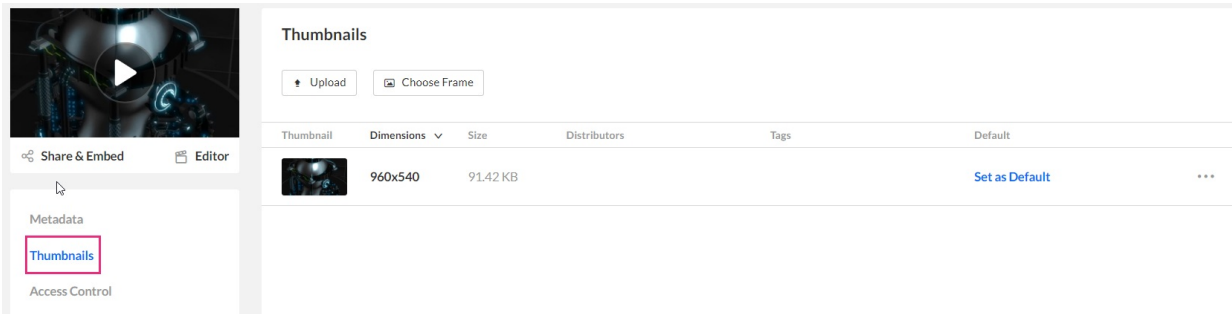

Everything below the out-of-the-box fields relates to custom metadata schemas and whether you have configured them as [searchable](#). See [Create a Custom Metadata Schema](#) for more information.

The screenshot shows the 'Training services' metadata editing page. At the top, there are navigation buttons: 'View Analytics', 'Save', and navigation arrows. Below this, a metadata bar displays: ID: 1_m5hkp8r, Creation Date: 12/05/2024, Last Update: 12/09/2024, Owner: louise.szmoisz@kaltura.com, Duration: 00:49, Moderation: Auto Approved, Plays: 13. A video thumbnail is shown on the left with the text 'You've got a video platform!'. The main editing area is divided into 'Metadata' and 'Main Schema' sections. The 'Metadata' section includes fields for Name (filled with 'Training services'), Description, Tags, Categories (with a dropdown showing 'unlisted'), and Reference ID. The 'Main Schema' section includes an 'Additional Information' field. A pink callout box labeled 'Out-of-the-box fields' points to the Name, Description, Tags, and Categories fields. A 'Jump to' dropdown is located in the top right of the editing area. On the left, a sidebar contains navigation tabs: Metadata, Thumbnails, Access Control, Scheduling, Flavors, Distribution, Captions, Related Files, Clips, and Users.

Thumbnails

Use to upload thumbnails, grab a thumbnail from video, crop thumbnails and select a default thumbnail. You can generate thumbnails from videos or upload external images.

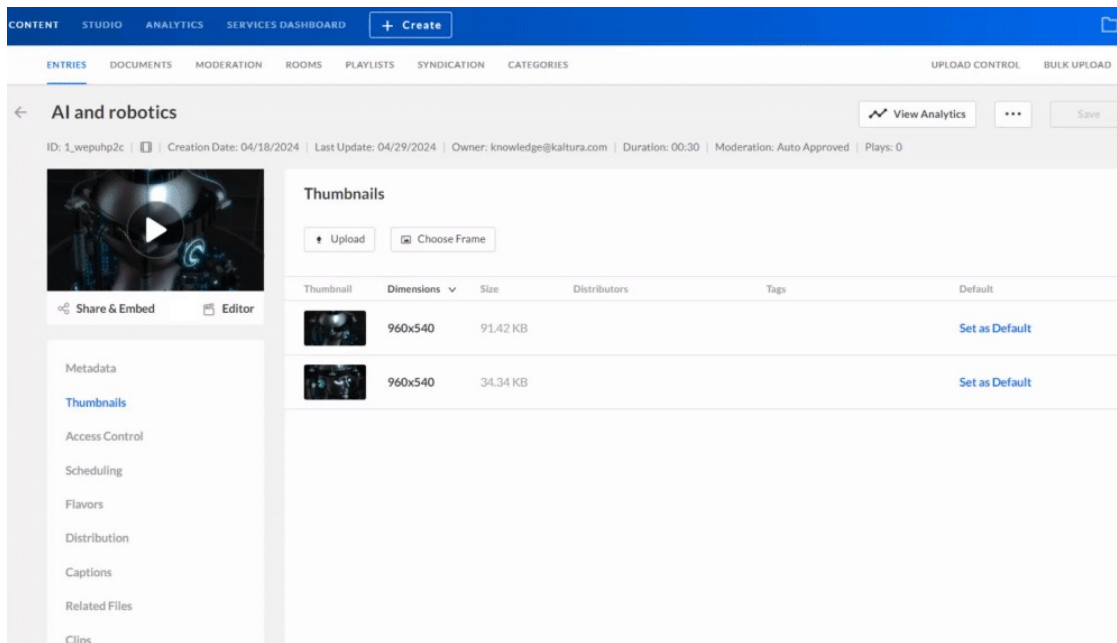

Choosing a thumbnail for your video

By default, a thumbnail is generated from the video's first frames. You can choose a new thumbnail by selecting any frame from the video or uploading an image from your computer. You can assign multiple thumbnails of varying qualities to your video.

Upload

1. Click **Upload**.
2. Locate the desired image on your computer.
3. Click **Open**.

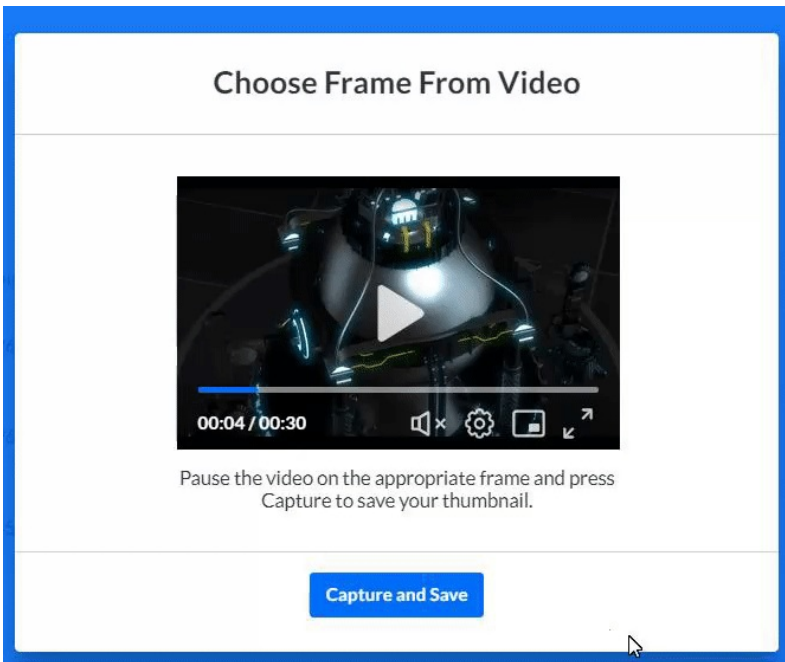

The image is added to the list of thumbnails.

Choose Frame

1. Click **Choose Frame**.
The Choose Frame From Video window opens.
2. Click the play button to play the video.
3. Pause the video on the appropriate frame and press **Capture and Save** to save your thumbnail.

A thumbnail will be captured from the highest quality video flavor.

Click **Set as Default** on the thumbnail you want to use for the entry. The default thumbnail displays in the entries list.

Click on the **three dots menu** to the right of a thumbnail to **Download**, **Preview** or **Delete** the thumbnail.

Thumbnails

[Upload](#) [Choose Frame](#)

Thumbnail	Dimensions	Size	Distributors	Tags	Default	
	960x540	91.42 KB			Set as Default	...
	960x540	34.34 KB			Set as Default	...
	960x540	34.19 KB			Set as Default	...
	458x462	7.97 KB			Set as Default	...

Delete 

 If you have a distribution profile that requires a specific thumbnail dimension (you may have one or multiple distribution profiles) they will display as empty. You are required to provide a suitable thumbnail with the requested dimension to use for the distribution profile.

Access Control

Use this tab to assign an access control profile to the entry. Visit our article [Access Control](#) to learn how to create and assign an access control profile.

Access Control Profiles

Access Control Profile	<input type="text" value="Default"/>
Profile Name	Default
Description	default access control profile
Domains	Any Domain
Countries	Any Country
IPs	Any IP
Flavors	Any Flavor
Advanced Security	

Scheduling

Content Scheduling controls when your media entries are viewable ('sunrise') and when access ends ('sunset'). You can tailor specific scheduling for your content, allowing it to be available at any time or within a set timeframe. Keep in mind, if users try to access

expired content, they'll receive an error message. Kaltura validates start and end dates, so ensure they're accurate when setting a range.

The **three dots menu** offers the following:

 The options in the three dots menu are based on that particular flavor type and its available actions.

- **Download** - Downloads the transcoded file to your desktop.
- **Upload** - Uploads a file from your desktop you that transcoded on your own, to serve as a flavor for an entry.
- **Import** - Imports a flavor to update existing assets or adds new ones. Click to open a window and enter the file URL.
- **Drop Folder** - Used for updating existing flavors or adding new ones. (You won't see this option in the menu if you don't have the required permission.) See our article [Drop Folders Service for Content Ingestion](#) to learn more.
- **Preview** - Previews the selected source flavor. The following information is displayed: Entry Name, Entry ID, Flavor Name, Flavor Asset ID, Bitrate, Codec, Dimensions, Format, Size (KB), and Status.
- **Convert or reconvert** - Convert to transcode an entry to additional flavors or reconvert to create the flavor again from the source.
- **Delete** - Deletes the flavor. When you delete, a confirmation will display: *Are you sure you want to delete this Asset: <asset id> ?* Click Delete to confirm.
- **View DRM details** - When your KMC account supports direct ingestion of multiple bit-rate transcoding flavors, you can use the menu to add or replace a single transcoding flavor in an entry.

Add / Replace media

Use to add media to a new entry you created when the entry status shown on the [Entries](#) page is 'No Media' (for example, a draft entry), and to replace the media of an existing entry when the entry status is 'Ready' or 'Error'.

Not Exported

Live Stream

Use to create and manage Live Stream entries. See our article [Create a Live Stream Entry](#) to learn more.

Captions

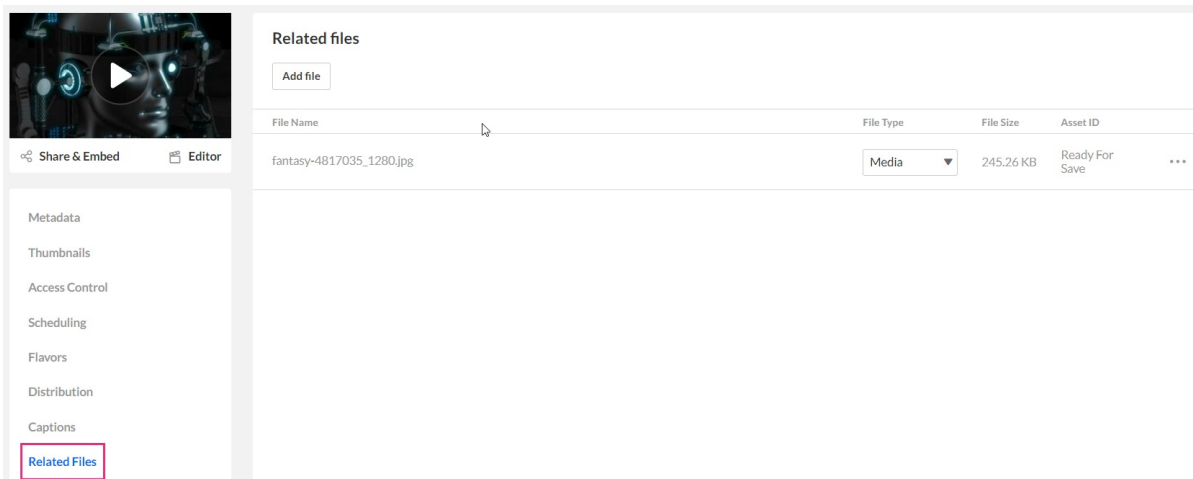

Use to upload, order, and manage captions. Check out our article [Subtitles and Captions](#) to learn more.

Label	File Type	Language	Accuracy	Status	Display on Player	Default
Spanish	SRT	Spanish	84%	Saved	<input checked="" type="checkbox"/> Yes	Default Caption

Related Files

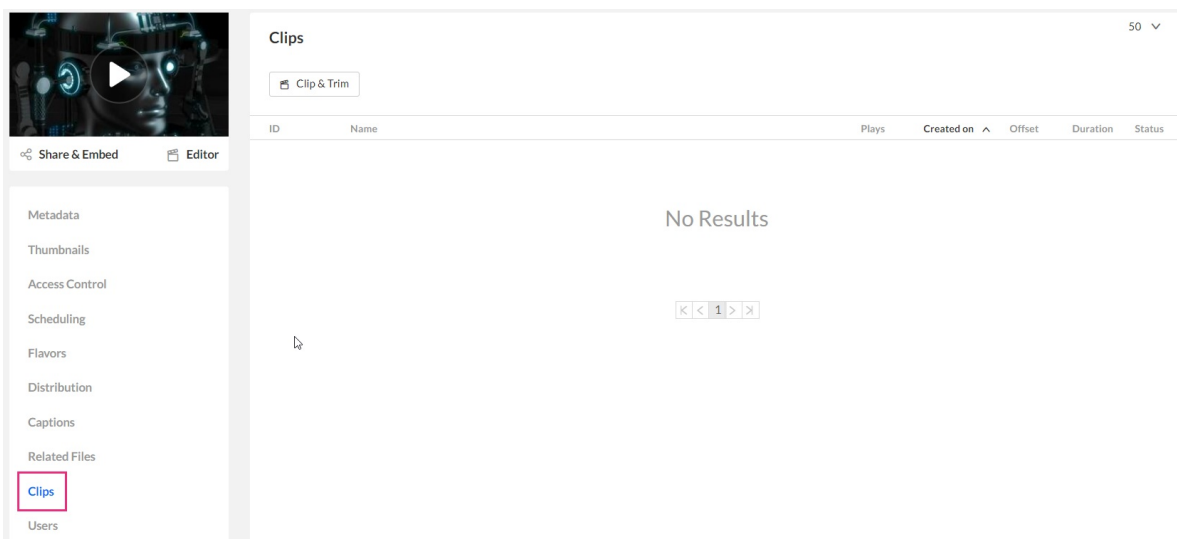

Use to upload related files to an entry. See our article [Related Files](#) for more information.

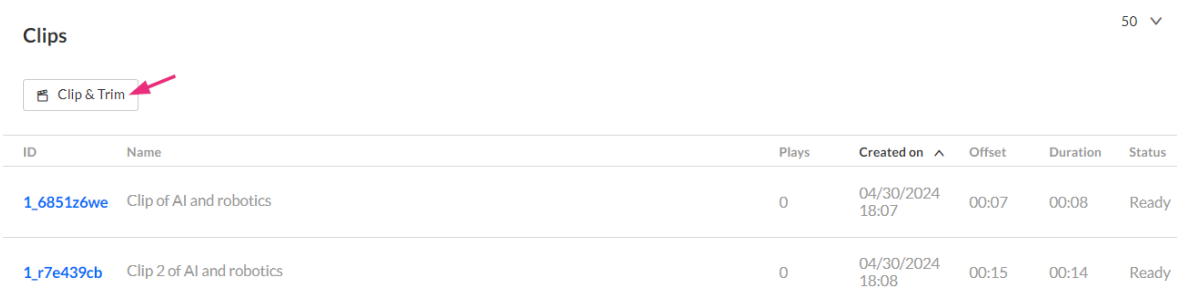

Clips

You can clip and trim entries using the [Kaltura Video Editing Tools](#).

⚠ You can only trim and clip a live entry if it has a recorded entry.

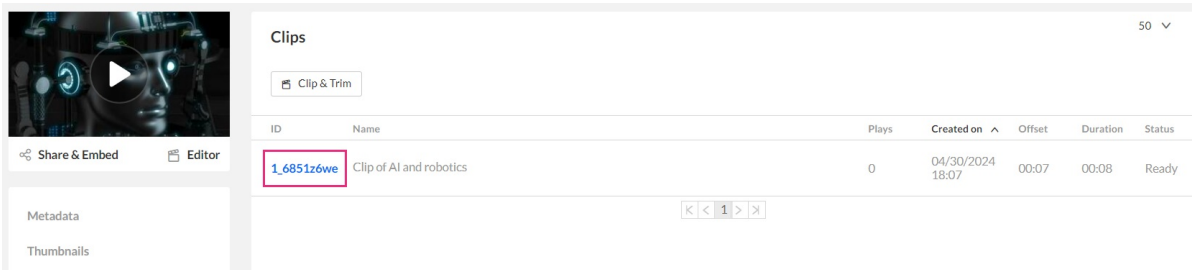

Click **Click & Trim** to open the editing tools. Visit our article [Kaltura Video Editing Tools - Editor Tab](#) to learn how to work with the video editor.

If clips were created from an original video or audio entry, the clipped entry details are

displayed in the clips tab. You can click on the **clip ID** to navigate to the entry details page of that clip.

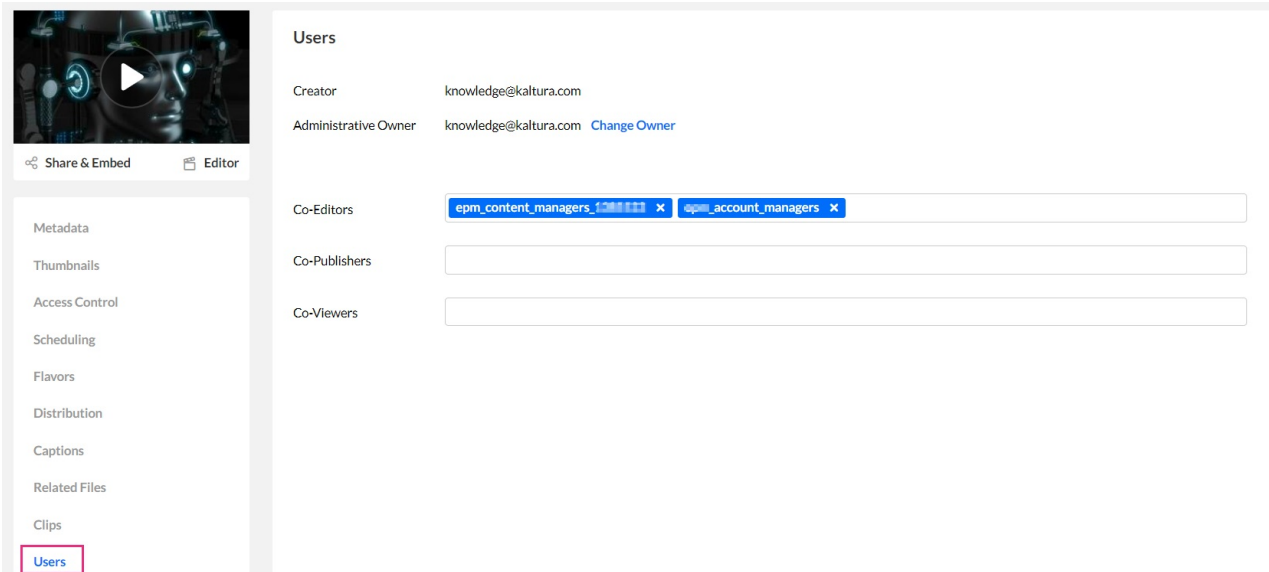

The entry details page of a clip displays the **original clip's ID**.

Users

The Users tab is displayed when your account is configured to support the end-user management feature. Use this tab to add editing and publishing rights for additional end-users to work with this entry across applications.

The Users tab provides information about the users that are associated with the entry:

- **Creator:** Usually the person who uploaded the media to Kaltura.
- **Administrative Owner:** The user in charge of managing the entry. By default, it's the creator, but you can change it here.

To change the Administrative Owner:

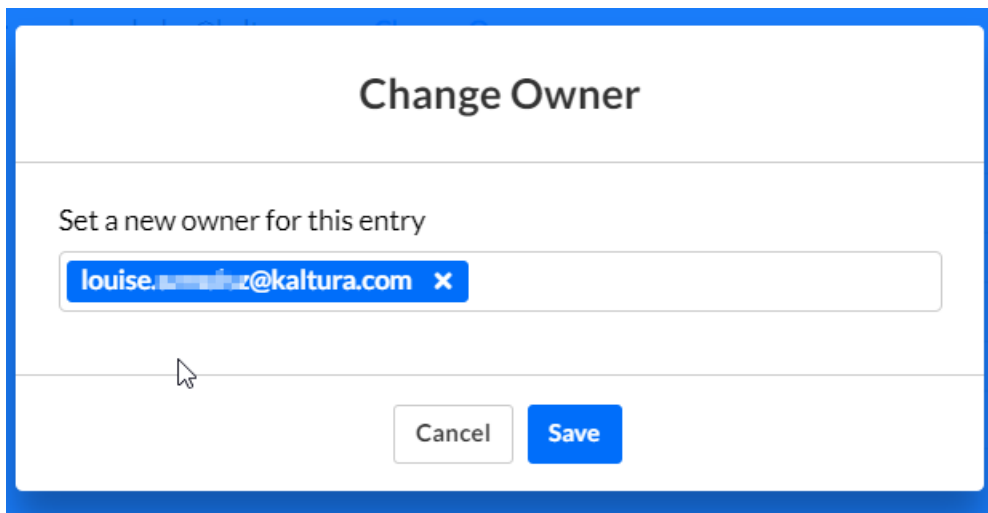

1. Click **Change Owner**.

Users

Creator	knowledge@kaltura.com
Administrative Owner	knowledge@kaltura.com Change Owner

The Change Owner box displays.

2. Type in the desired user name or user ID.

3. Click **Save**.

By editing the **co-editors**, **co-publishers**, and **co-viewers** fields, you can add rights for additional end-users to work with this entry across applications.

 **Co-editors** have permission to edit the metadata associated with the selected media, for example, customize the look and feel of an entry page.

Co-publishers have the permission to publish media anywhere that the user has the rights to publish.

Co-viewers have permissions to view the metadata associated with the selected media.

To learn more about roles and permissions, visit our article [Administration Pages](#).

Advertisements

Use to create and manage time-based advertisements with the Kaltura Video Editing Tools. To learn how to add advertisements to media, see our article [Kaltura Video Editing Tools - Advertisements Tab](#). For further information see [Advertising and Ad Networks](#).
