

Adminaccess module

Last Modified on 11/13/2025 9:43 am IST

 This article is designated for administrators.

About

The **Adminaccess module** lets you control which KMC users can access the Video Portal or LMS Video Configuration Management console. The Publisher Administrator role (assigned in the KMC) is the default role with permission to enter the Configuration Management console (including via the “/admin” URL). You can also configure the module to allow additional KMC users to access these admin pages as needed.

Configure

1. Go to your Configuration Management console, and click the **Adminaccess** module.

You can also navigate directly using a link:

https://{your_KMS_URL}/admin/config/tab/adminaccess.

Modules

- Accessibility
- Addcontent
- Addtoplaylists
- Adminaccess** 
- Advancedkauth

The Adminaccess page displays.

Adminaccess

Module Info

Info

This module will allow the application administrator decide who can access the application admin pages using the “admin” URL. Once enabled, the access to the application admin pages will be limited to KMC users with Publisher Administrator role only. Additional configurations in this module will allow other KMC users to also be able to access.

enabled

Yes

Once enabled, only KMC users with Publisher Administrators roles will be able to access the application's admin pages, unless configured otherwise below.

authorizedGroups

Select the groups who are allowed to access this application's admin pages.

1 DELETE

Content Uploader

Content Moderator

Player Designer

New Role

Choose which of the KMC roles is authorized to access this application's admin pages.

Save

2. Configure the following:

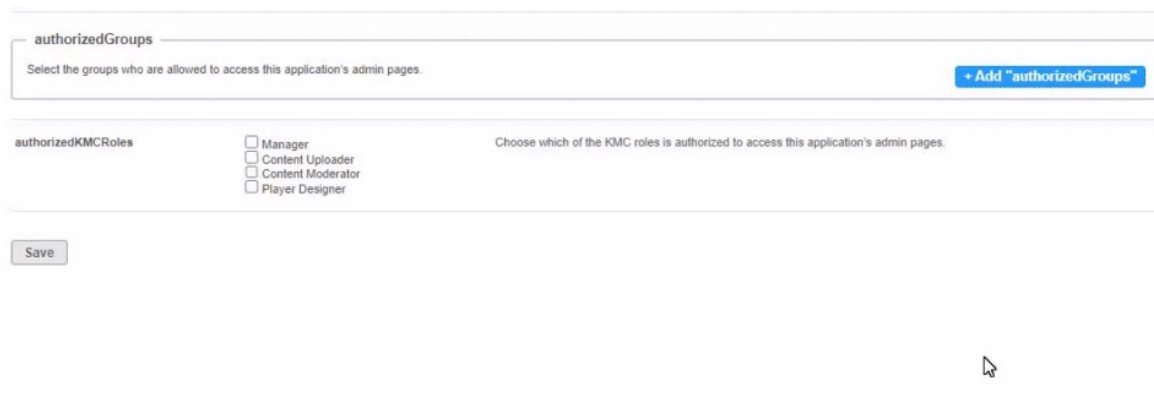

enabled- Set to 'Yes' to restrict access to KMC users with 'Publisher / Administrator' role only. Once enabled, only those users can access the admin pages, unless configured otherwise below.

To learn more about KMC roles, visit our article [Administration pages](#).

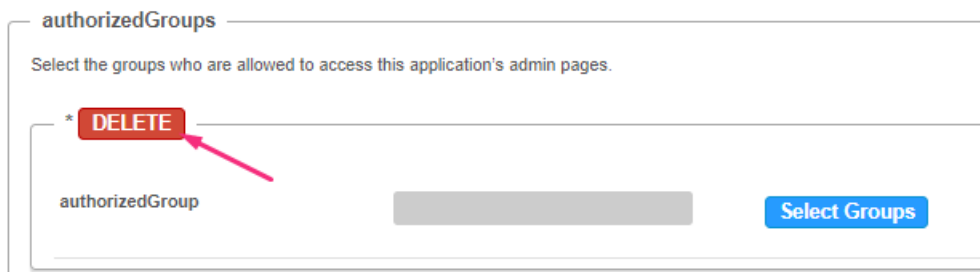

authorizedGroups - Select the groups who are allowed to access this application's admin pages.

- Click **+Add "authorizedGroups"**.
- Click **Select Groups**.
- Enter the group name or group ID.
- Click **Submit**.

To learn how to create and manager user groups, visit our article [Manage groups in the Configuration Management console](#).

To delete a group from **authorizedGroups**, simply click the **Delete** button.

authorizedKMCRoles - To grant access to additional KMC roles, you can select from the available roles in the list, as shown in the example below.

authorizedKMCRoles

- ☐ Manager
- ☐ Content Uploader
- ☐ Content Moderator
- ☐ Player Designer
- ☐ New Role

To learn how to configure KMC roles, visit our article [Manage user accounts in KMC](#).

3. Click **Save**.
