

Adminaccess module

Last Modified on 01/09/2025 2:20 pm IST

 This article is designated for administrators.

About

The **Adminaccess** module gives administrators greater control over which KMC users can access the Video Portal or KAF Configuration Management pages. By default, once enabled, only users with the Publisher Administrator role can access these admin pages via the “/admin” URL. However, additional configurations allow you to grant access to other KMC users as needed.

Configure

1. Go to your KMS or KAF Configuration Management console, and click the **Adminaccess** module. You can also navigate directly using a link:
https://{your_KMS_URL}/admin/config/tab/adminaccess.

Adminaccess

Module Info

Info

This module will allow the application administrator decide who can access the application admin pages using the "admin" URL. Once enabled, the access to the application admin pages will be limited to KMC users with Publisher Administrator role only. Additional configurations in this module will allow other KMC users to also be able to access.

enabled Yes Once enabled, only KMC users with Publisher Administrators roles will be able to access the application's admin pages, unless configured otherwise below.

authorizedGroups

Select the groups who are allowed to access this application's admin pages.

authorizedGroup	actions
1	DELETE

[Select Groups](#) [+ Add "authorizedGroups"](#)

authorizedKMC Roles

Choose which of the KMC roles is authorized to access this application's admin pages.

- Manager
- Content Uploader
- Content Moderator
- Player Designer
- New Role

[Save](#)

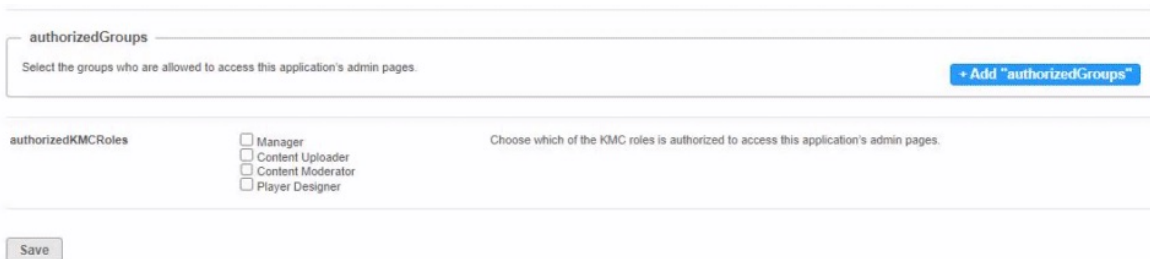

2. Configure the following:

enabled- Set to 'Yes' to restrict access to KMC users with 'Publisher / Administrator' role only. Once enabled, only those users can access the admin pages, unless configured otherwise below.

 To learn more about KMC roles, visit our article [Administration pages](#).

authorizedGroups - Select the groups who are allowed to access this application's admin pages.

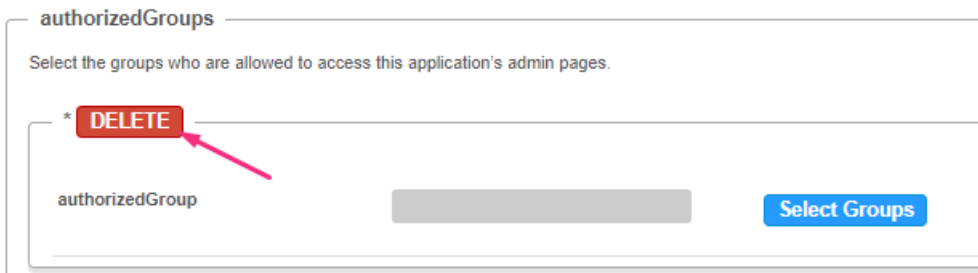

- Click **+Add "authorizedGroups"**.
- Click **Select Groups**.
- Enter the group name or group ID.
- Click **Submit**.

The screenshot shows a configuration form for 'authorizedGroups'. The title is 'authorizedGroups' and the subtitle is 'Select the groups who are allowed to access this application's admin pages.' There is a blue button labeled '+ Add "authorizedGroups"'. Below this, there is a section for 'authorizedKMCRoles' with the subtitle 'Choose which of the KMC roles is authorized to access this application's admin pages.' This section contains four checkboxes: 'Manager', 'Content Uploader', 'Content Moderator', and 'Player Designer'. At the bottom left, there is a 'Save' button.

 To learn how to create and manager user groups, visit our article [Manage groups from the Video Portal or KAF Configuration Management console](#).

To delete a group from **authorizedGroups**, simply click the **Delete** button.

The screenshot shows a close-up of the 'authorizedGroups' form. The title is 'authorizedGroups' and the subtitle is 'Select the groups who are allowed to access this application's admin pages.' There is a red button labeled 'DELETE' with an asterisk to its left. A pink arrow points to the 'DELETE' button. Below this, there is a text input field labeled 'authorizedGroup', a grey button, and a blue button labeled 'Select Groups'.

authorizedKMCRoles - To grant access to additional KMC roles, you can select from the available roles in the list, as shown in the example below.

authorizedKMCRoles

- Manager
- Content Uploader
- Content Moderator
- Player Designer
- New Role

 To learn how to configure KMC roles, visit our article [Administration pages](#).

3. Click **Save**.
