

Adminaccess module

Last Modified on 06/04/2026 9:15 am IDT

 This article is designated for administrators.

About

The **Adminaccess module** lets you control which Rich Media CMS users can access the legacy Video Portal or LMS Video Configuration Management console. The Publisher Administrator role (assigned in the Rich Media CMS) is the default role role with permission to enter the Configuration Management console (including via the “/admin” URL). You can also configure the module to allow additional Rich Media CMS users to access these admin pages as needed.

Configure

1. Go to your Configuration Management console, and click the **Adminaccess** module.

You can also navigate directly using a link:

https://{your_KMS_URL}/admin/config/tab/adminaccess.

Module Info

Info
 This module will allow the application administrator decide who can access the application admin pages using the "admin" URL. Once enabled, the access to the application admin pages will be limited to KMC users with Publisher Administrator role only. Additional configurations in this module will allow other KMC users to also be able to access.

enabled Once enabled, only KMC users with Publisher Administrators roles will be able to access the application's admin pages, unless configured otherwise below.

authorizedGroups

Select the groups who are allowed to access this application's admin pages.

1 **DELETE**

authorizedGroup

authorizedKMCRoles

Manager
 Content Uploader
 Content Moderator
 Player Designer
 New Role

Choose which of the KMC roles is authorized to access this application's admin pages.

2. Configure the following:

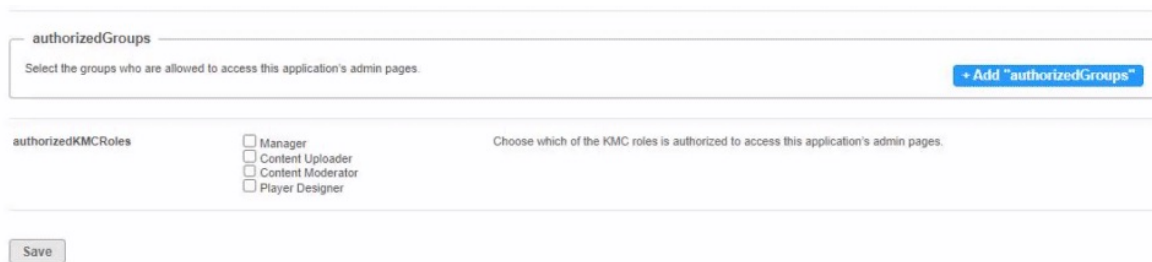

enabled- Set to 'Yes' to restrict access to Rich Media CMS users with 'Publisher / Administrator' role only. Once enabled, only those users can access the admin pages, unless configured otherwise below.

To learn more about Rich Media CMS roles, visit our article [Administration pages](#).

authorizedGroups - Select the groups who are allowed to access this application's admin pages.

- Click **+Add "authorizedGroups"**.
- Click **Select Groups**.
- Enter the group name or group ID.
- Click **Submit**.

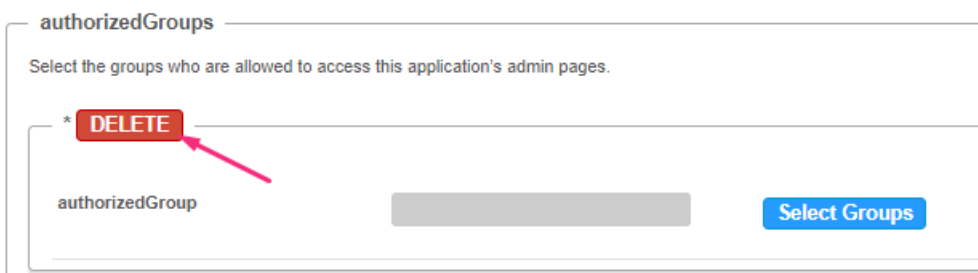

The screenshot shows a configuration form for 'authorizedGroups'. At the top, there is a header 'authorizedGroups' and a sub-header 'Select the groups who are allowed to access this application's admin pages.' To the right of the sub-header is a blue button labeled '+ Add "authorizedGroups"'. Below this, there is a section for 'authorizedKMCRoles' with the instruction 'Choose which of the KMC roles is authorized to access this application's admin pages.' This section contains four checkboxes: 'Manager', 'Content Uploader', 'Content Moderator', and 'Player Designer'. At the bottom left of the form is a 'Save' button.

To learn how to create and manager user groups, visit our article [Manage groups in the Configuration Management console](#).

To delete a group from **authorizedGroups**, simply click the **Delete** button.

This screenshot shows a portion of the 'authorizedGroups' configuration form. It features a sub-header 'Select the groups who are allowed to access this application's admin pages.' Below this, there is a table with one row. The first cell of the row contains an asterisk and a red button labeled 'DELETE', with a red arrow pointing to it. The second cell contains a text input field with the placeholder text 'authorizedGroup'. To the right of the input field is a blue button labeled 'Select Groups'.

authorizedRich Media CMSRoles - To grant access to additional Rich Media CMS

roles, you can select from the available roles in the list, as shown in the example below.

authorizedKMCRoles

- Manager
- Content Uploader
- Content Moderator
- Player Designer
- New Role

To learn how to configure Rich Media CMS roles, visit our article [Manage user accounts in Rich Media CMS](#).

3. Click **Save**.
