Disable analytics for specific KMC role
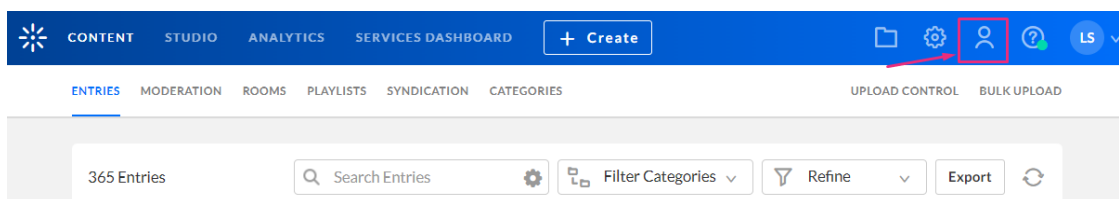

> 👤🔒 **This article is designated for administrators.**

If you'd like to disable analytics for a specific KMC role, you can do so via the KMC user role feature sets.

> 💡 For more information about KMC roles, visit our article Administration pages.
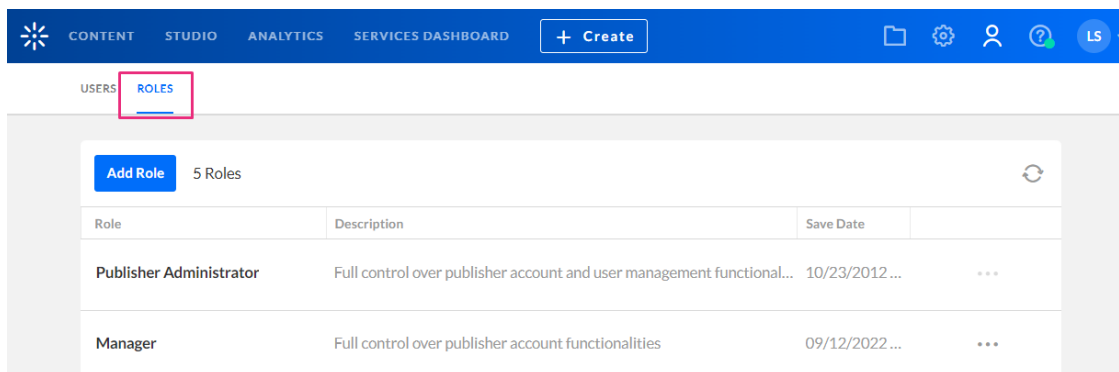

1. Log into your Kaltura Management Console and click the administration menu icon 👤 .

   The Users page displays.

2. Click the **Roles** tab.

   Navigate to the desired KMC role.

3. Click the **3 dots menu** at the end of the row, then choose **Edit** from the the dropdown menu.

The **Edit Role** page displays.

Scroll down until you reach **Video Analytics**.

4. Click the toggle button at the end of the row to disable it (it will turn from blue to grey).

5. Click **Save**.

A confirmation message displays: *Changes will take effect immediately. Browser page refresh should be recommended to the existing users associated with this role.*

Role updated

Changes will take effect immediately.
Browser page refresh should be recommended to the
existing users associated with this role

OK

6. Click **OK**.

This will now hide the analytics page for that specific KMC role across KMC, KAF and KMS (video portal) instances.
