About

Embedding a playlist lets you showcase multiple videos in one place without sending users away from your site.

This article walks you through the different embed options available in the Kaltura Management Console, how to choose the right player, and how to copy and use the embed code on your site.

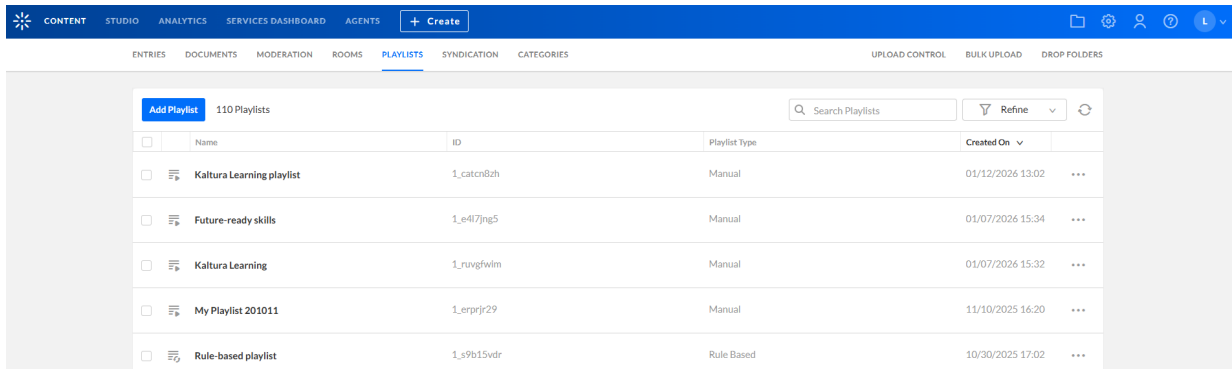

Access the share and embed page

1. Log into your Kaltura Management Console.
2. Under the **Content** menu, click the **Playlists** tab.

	Name	ID	Playlist Type	Created On	
<input type="checkbox"/>	My other new playlist	1_duuhrv6k	Rule Based	01/01/2024 12:57	...
<input type="checkbox"/>	My new playlist	1_yvyaydba	Manual	01/01/2024 10:31	...
<input type="checkbox"/>	Leaderboard	1_9nrwv9g3	Manual	11/29/2023 20:34	...
<input type="checkbox"/>	My Playlist 081411	1_hurqtt92	Manual	11/14/2023 09:08	...

The 'Playlists' page displays.

	Name	ID	Playlist Type	Created On	
<input type="checkbox"/>	Kaltura Learning playlist	1_catcn8zh	Manual	01/12/2026 13:02	...
<input type="checkbox"/>	Future-ready skills	1_e4l7jng5	Manual	01/07/2026 15:34	...
<input type="checkbox"/>	Kaltura Learning	1_ruvqfvwm	Manual	01/07/2026 15:32	...
<input type="checkbox"/>	My Playlist 201011	1_erprjr29	Manual	11/10/2025 16:20	...
<input type="checkbox"/>	Rule-based playlist	1_s9b15vdr	Rule Based	10/30/2025 17:02	...

3. Navigate to the desired playlist, click the **three dots** to the right, and select **Share & Embed**.

Add Playlist		82 Playlists		Search Playlists	Refine	Refresh
<input type="checkbox"/>	Name	ID	Playlist Type	Created On		
<input type="checkbox"/>	My other new playlist	1_duuhrv6k	Rule Based	01/01/2024 12:57	...	
<input type="checkbox"/>	My new playlist	1_yvyaydba	Manual			
<input type="checkbox"/>	Leaderboard	1_9nrww9g3	Manual	11/29/2023 20:34	...	

The 'Share & Embed' page displays.

The QR code and standalone links are for preview use only. Do not use these links for production purposes.

2. Choose the **embed type** that fits your needs.

Advanced Settings ▾

Embed Type ?

- Dynamic Embed
- IFrame Embed** ✓
- Auto Embed
- Thumbnail Embed

Support for HTTPS Embed Code

Responsive

The following options are available:

- **Dynamic Embed** – This is the preferred method to dynamically embed the Kaltura player into web sites and web applications.
- **Iframe Embed** (default) - Iframe embed (no page JavaScript) is good for sites that don't allow third-party JavaScript to be embedded on their pages. This mode fits more stringent page security requirements while supporting and HTML5 delivery.
- **Auto Embed** – Auto embed is concise embed code and is good for quickly getting

a player or widget onto the page without any run time customization.

- **Thumbnail Embed** - This embed allows you to embed a video to a page without loading the player. The embed will display the video thumbnail image until the play button is clicked and only then will the player load. This is useful when embedding many players in the same page as it decreases the page load time.

(Optional) Toggle on **Support for HTTPS embed code** for secure (HTTPS) pages.

(Optional) Toggle on **Responsive** to make the player adjust automatically to the size of its container.

Embed Type ⓘ

Support for HTTPS Embed Code

Responsive

If you are using access control profiles and are embedding a V7 player, please note that domain restriction is not supported with iframe embed.

Copy and embed your code

1. When you're ready to embed the playlist, click **Copy** under the window that displays the embed code.

Embed Code

```
<iframe type="text/javascript"
src="https://cdnapisec.kaltura.com/
p/4834032/embedPlaykitJs/uiconf
_id/50952692?
iframeembed=true&entry_id=1_28
&?bvie'ctde="width:560px;
```

Copy

2. Select the platform you want to share your playlist to, and paste the embed code into the embed field.
