

Kaltura Studio room for DIY live webcasts

Last Modified on 06/13/2026 1:27 am IDT

 This article is designated for moderators and speakers

About

DIY live webcasts give you the ability to broadcast a high-quality live session directly from your browser via a Kaltura Studio room. Once a DIY live webcast session is created in Kaltura Virtual Events, the Kaltura Studio room is automatically created with stage ratio of a player (16:9). This gives the Studio user the exact experience and layout that the end users will experience as they watch the player.

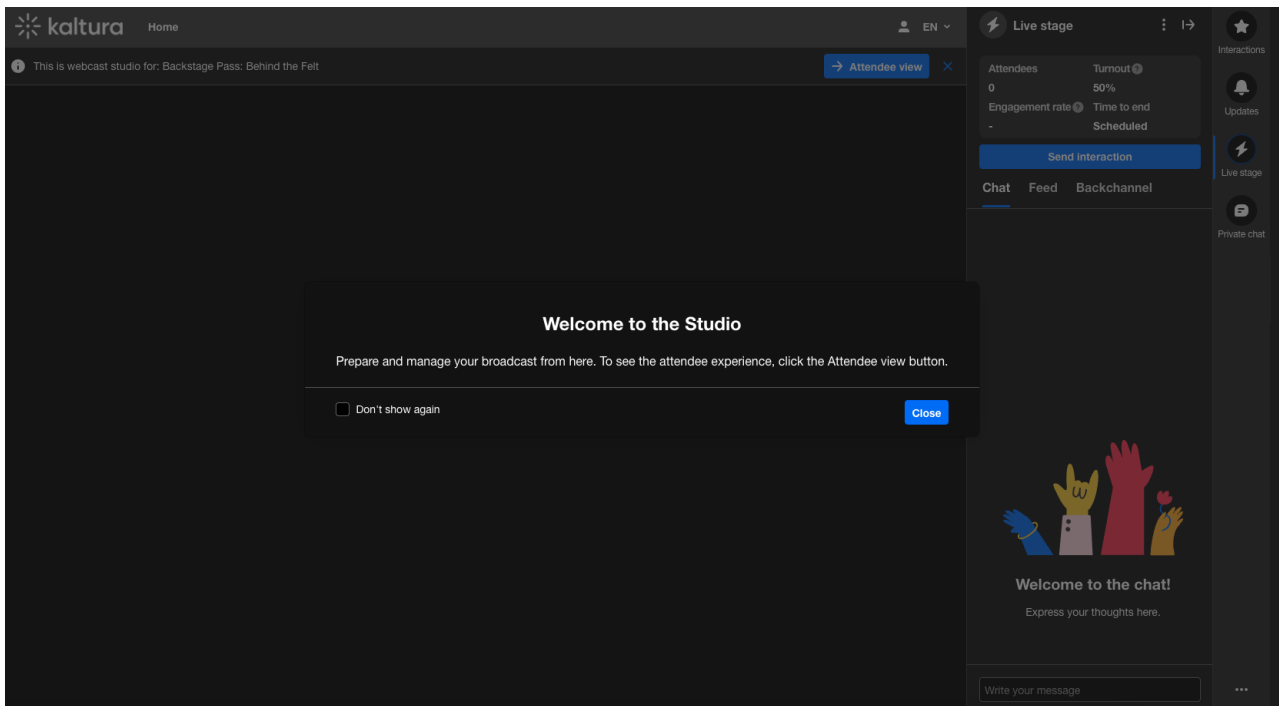

The Kaltura Studio is hidden from the general attendees. Moderators and speakers for this session may access the Kaltura Studio via the event site session link or via a direct private link. This way, they can begin preparing the studio ahead of the broadcast.

For information on creating DIY live webcast sessions and launching the Kaltura Studio room, see [Add a DIY live webcast session](#).

Entering the studio

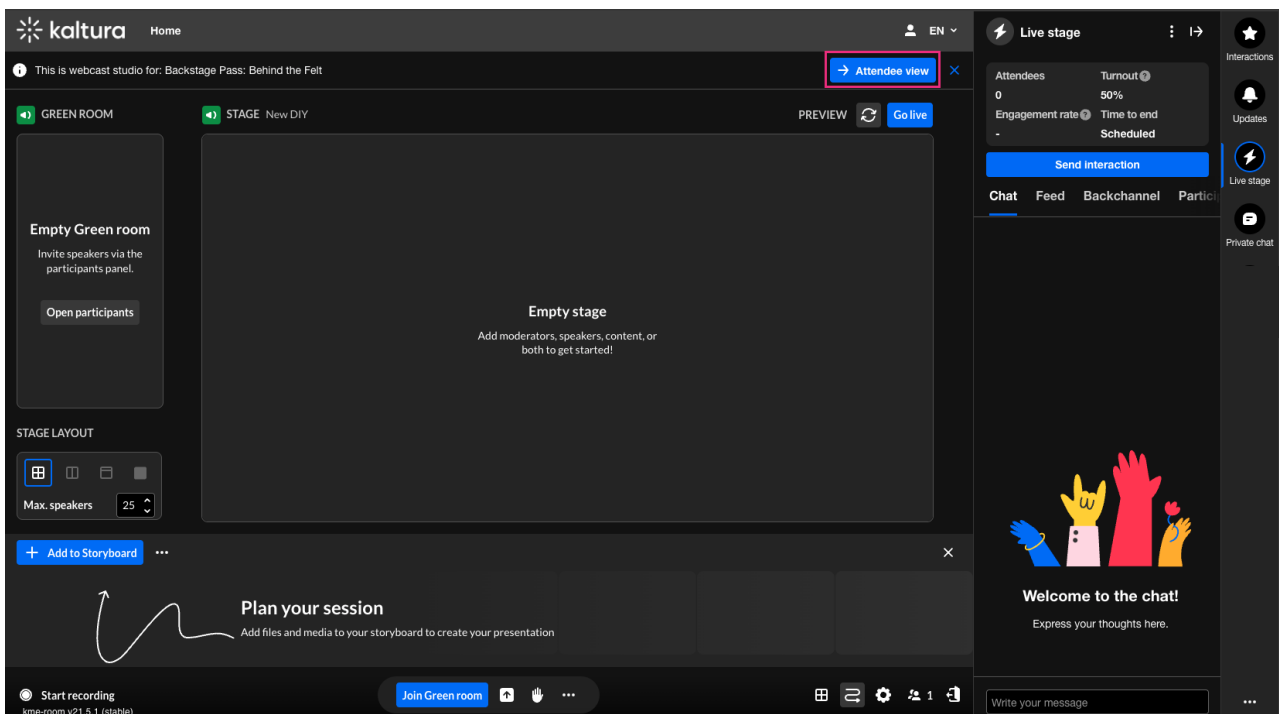

When entering the Kaltura Studio room, speakers and moderators are informed that they may see the attendee experience by clicking the **Attendee view** button.

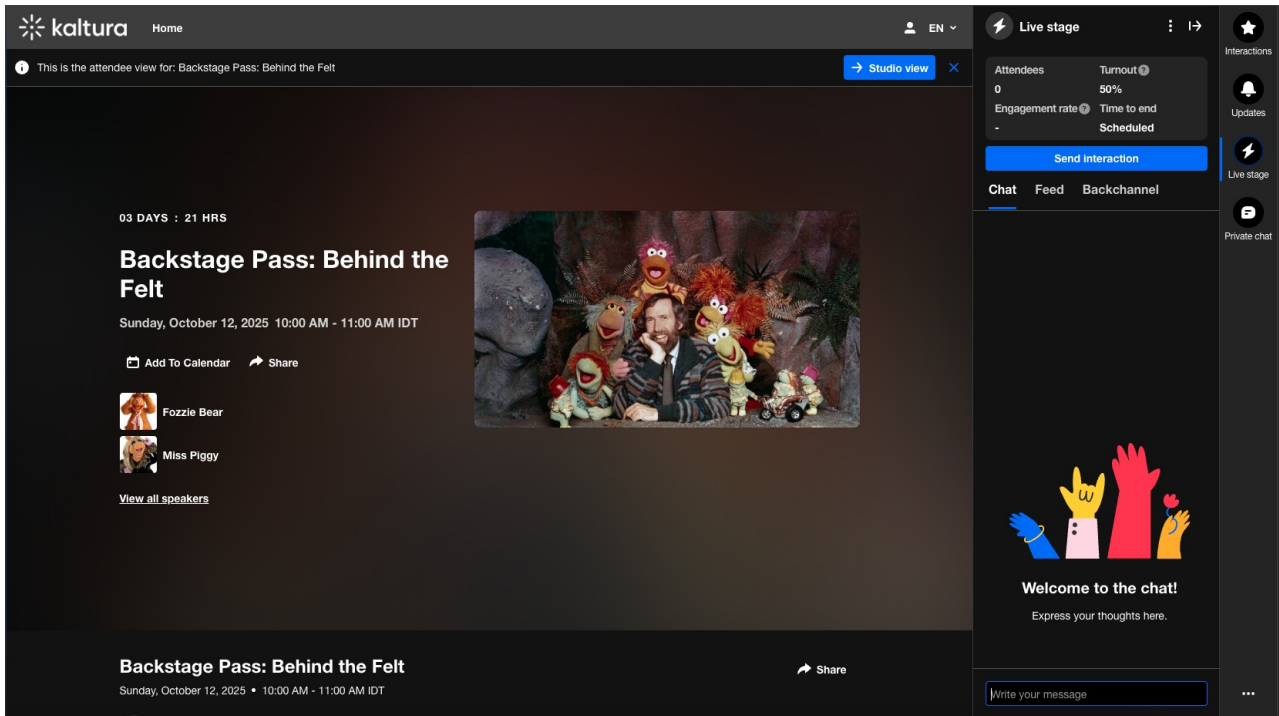

Click **Close** (and select Don't show again if desired).

Switching between attendee and studio view

Want to know how the session currently displays to attendees? Click **Attendee view**.

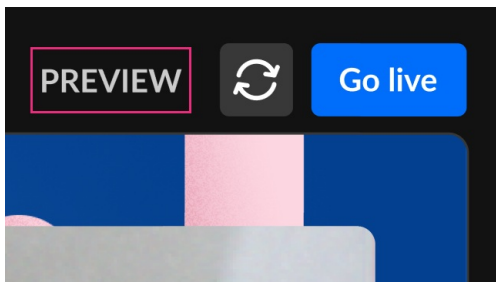

The attendee view displays.

Click **Studio view** to switch back to Studio view.

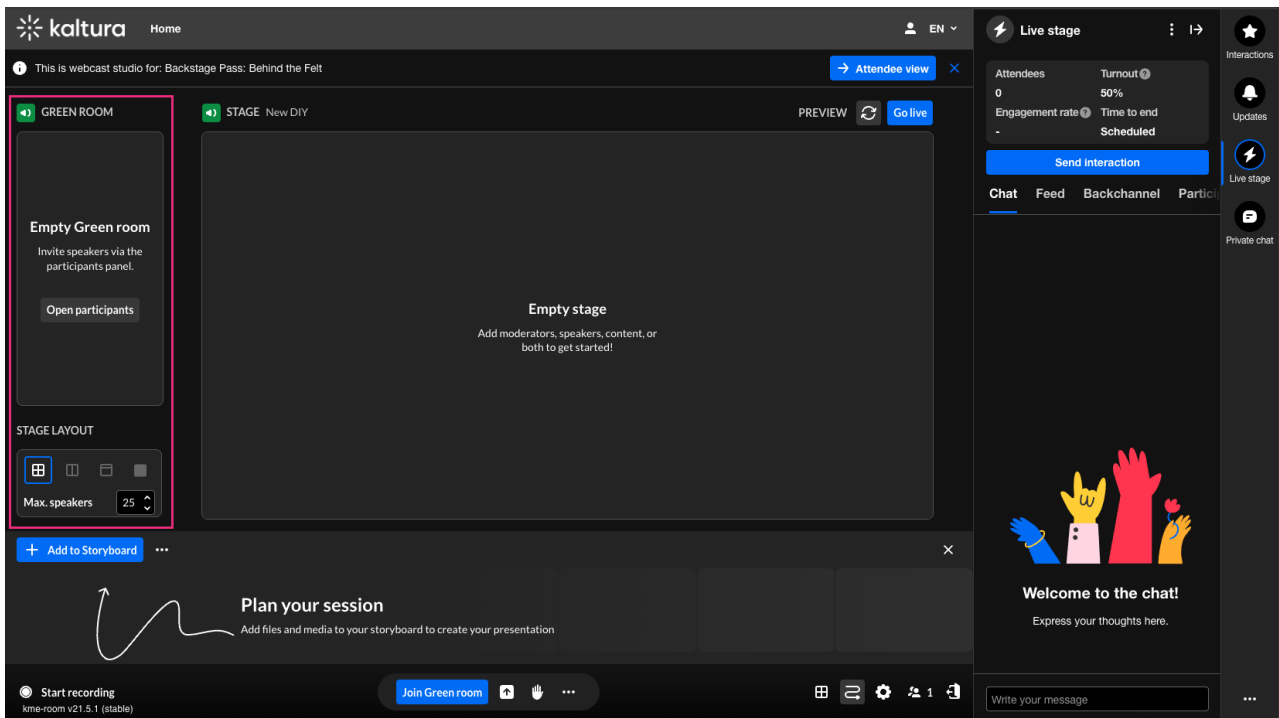

Preview mode

When the studio is initially launched, it is done so in Preview mode, giving you the opportunity to preview the stream before going live. The Preview indicator in the upper right area of your screen is displayed.

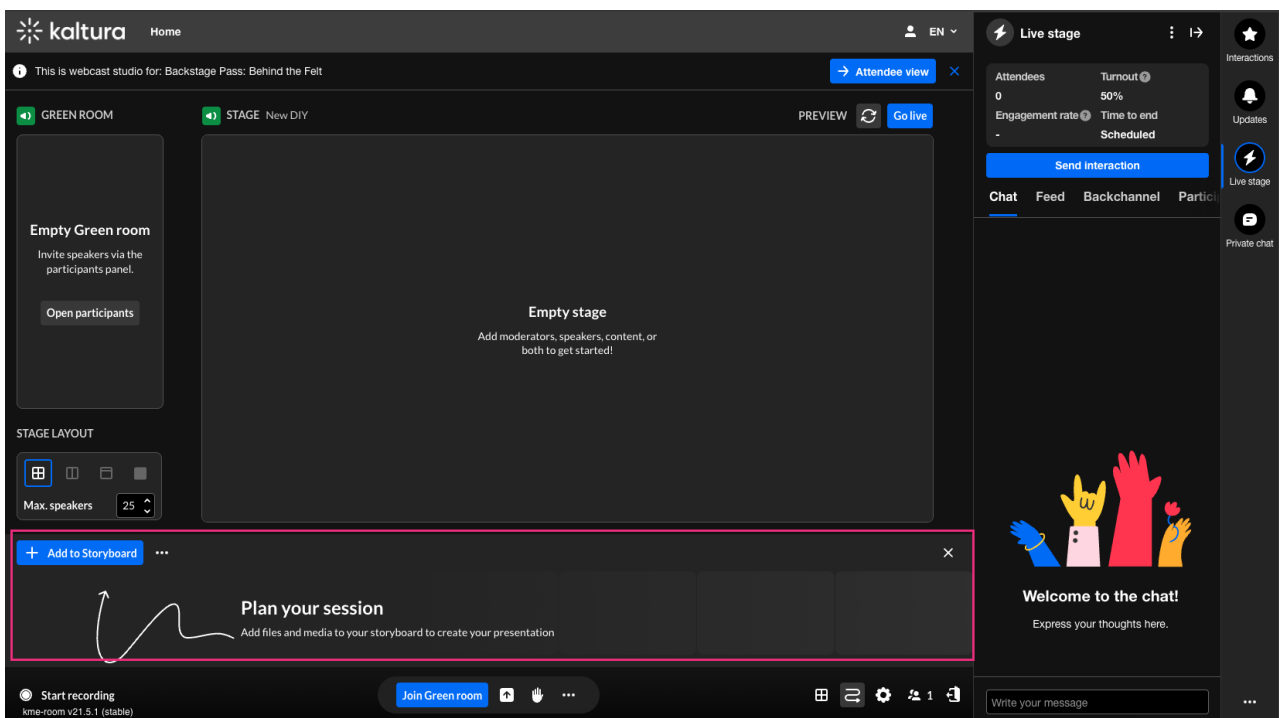

See [Preview mode](#) for more information.

The Green room is displayed on the left side of your screen, allowing moderators and speakers to meet, prepare, and rehearse before going live.

See [Green room](#) for more information.

The storyboard is expanded, allowing you to plan your session.

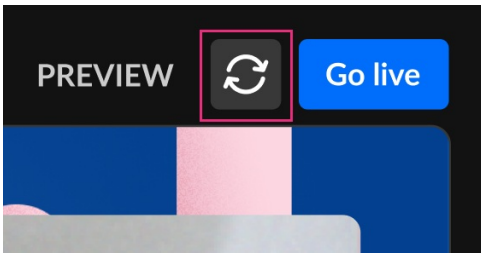

See [Storyboard](#) for more information.

Reset the broadcast

Click the Reset broadcast button to restart the webcast service. This action will not

affect the ongoing session.

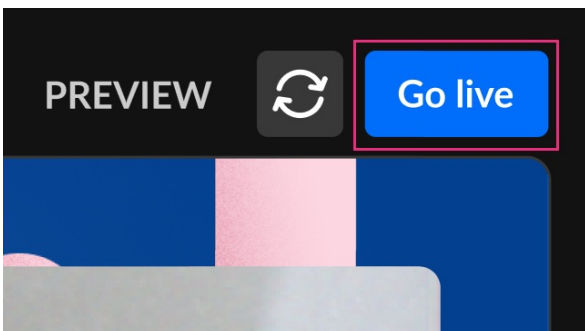

You are asked to confirm your action.

Click **Reset** to confirm.

Begin the broadcast - Go live

Click the **Go live** button in the upper right corner of the screen.

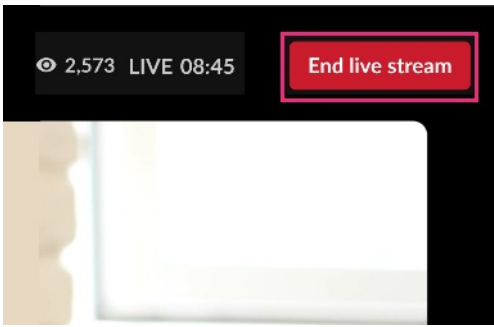

All room participants receive a notification that webcasting has started.

In this experience, the stage is "closed" by default to ensure that users who join the studio will not interfere with the live stream.

End the broadcast

Click the **End live stream** button in the upper right corner of your screen.

The Studio is returned to **Preview** status.
