

Documents in player

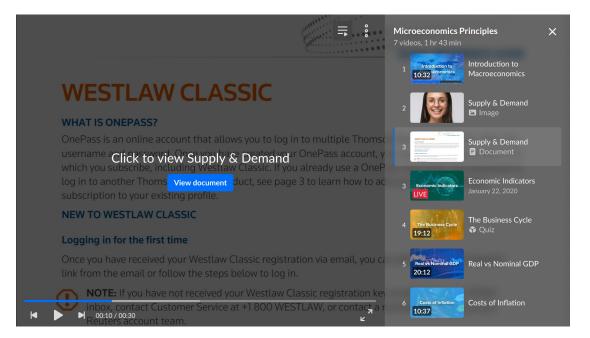

Last Modified on 02/05/2025 2:54 pm IST

2会 This article is designated for all users.

About

Kaltura's **Documents** plugin ensures convenient access to any documents that may have been included in content loaded in the player, for example, as part of a playlist. Additionally, in the event that a document isn't available for viewing, users may have the option to download the document, depending on whether the download feature has been enabled.

Below is a sample of a document entry. Notice the thumbnail preview in the background. Click **View Document** to open the document in a new tab.

When a document isn't available for viewing, you can download it using the **Download Document** feature, provided it's enabled on your player.
