

Automation manager

Last Modified on 07/06/2025 3:03 pm IDT

 This article is designated for administrators.

About

Kaltura's automation manager is a tool that helps organizations manage and repurpose their media content efficiently. It allows users to automate tasks like categorizing, tagging, and managing media based on specific criteria. For example, it can create categories based on viewing habits, and tag media using metadata. The tool also offers flexibility, letting users tag popular content and organize frequently accessed media, making it easier to find and use content effectively.

The automation manager operates automatically at scheduled intervals, scanning all media entries and applying the predefined rules and actions.

Key features include:

- **Rule management:** You can easily create, edit, and manage rules to automate the categorization and tagging of media entries.
- **Review queue:** A dedicated queue where all entries matched to any of the rules are placed for the next action cycle. Within this queue, administrators can review, approve, deny or execute planned actions.
- **History and reporting:** Administrators have access to a history and reporting section where they can download reports of Automation Manager actions and review this data online.

If you don't see the automation manager tab in your KMC, you need to enable it on your account. In addition, only users with certain roles can access the automation manager.

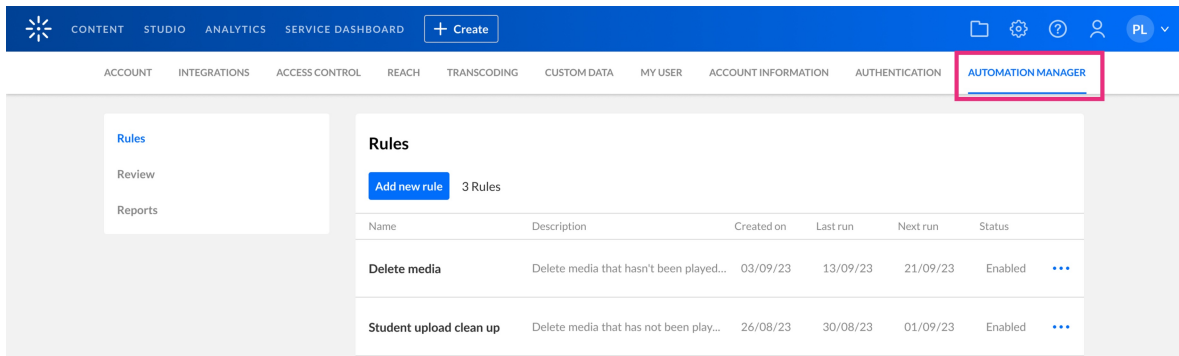

Access the automation manager

1. To access the automation manager, simply log into your Management Console.
2. Under the **Content** menu, click the **settings icon**.

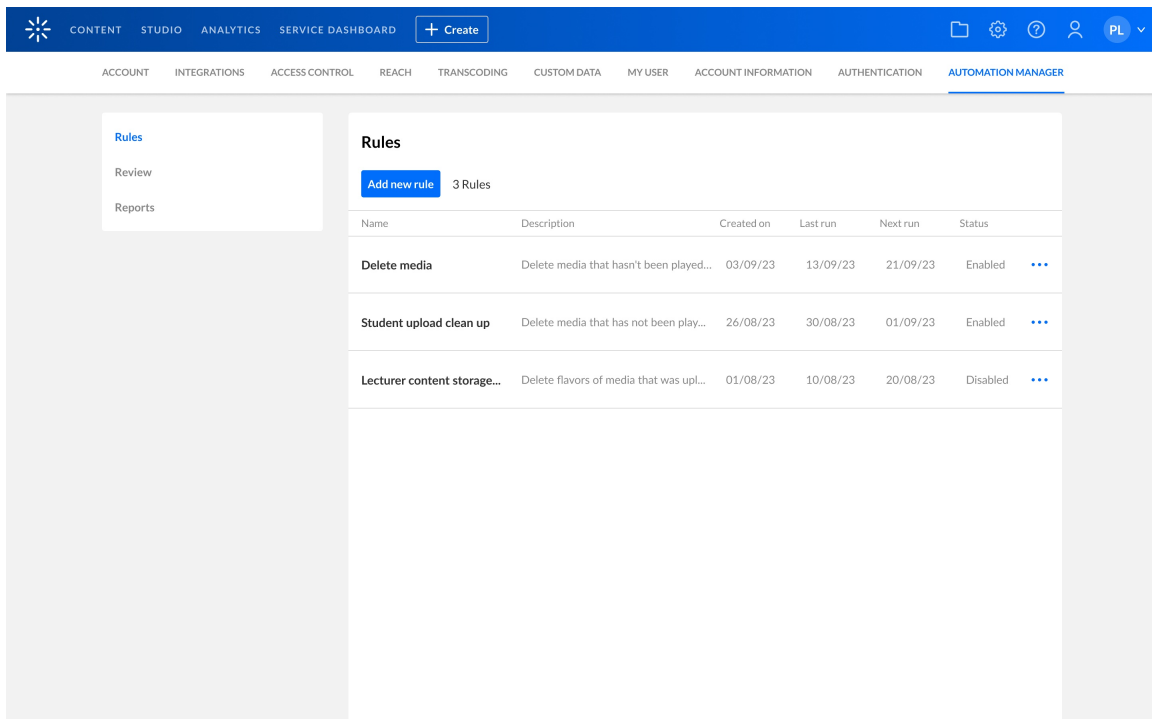

The settings navigation bar displays.

3. Click the **Automation Manager** tab at the far right.

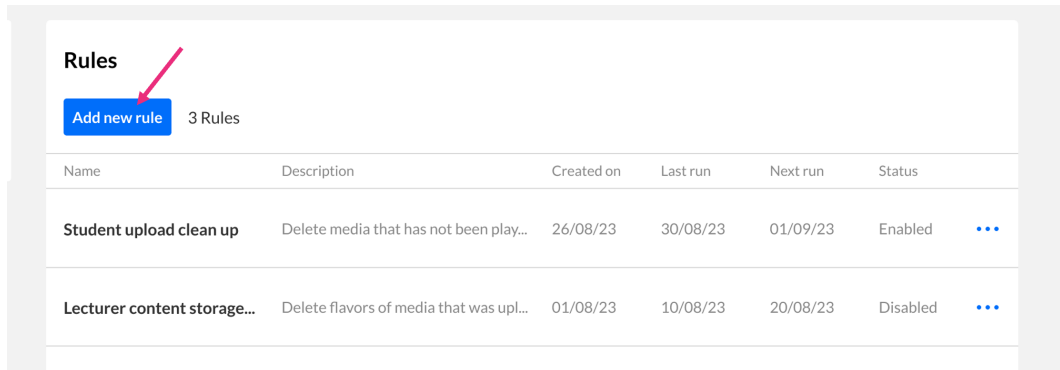

The **Rules** page displays. Here you can view any rules that have been set up on your account.

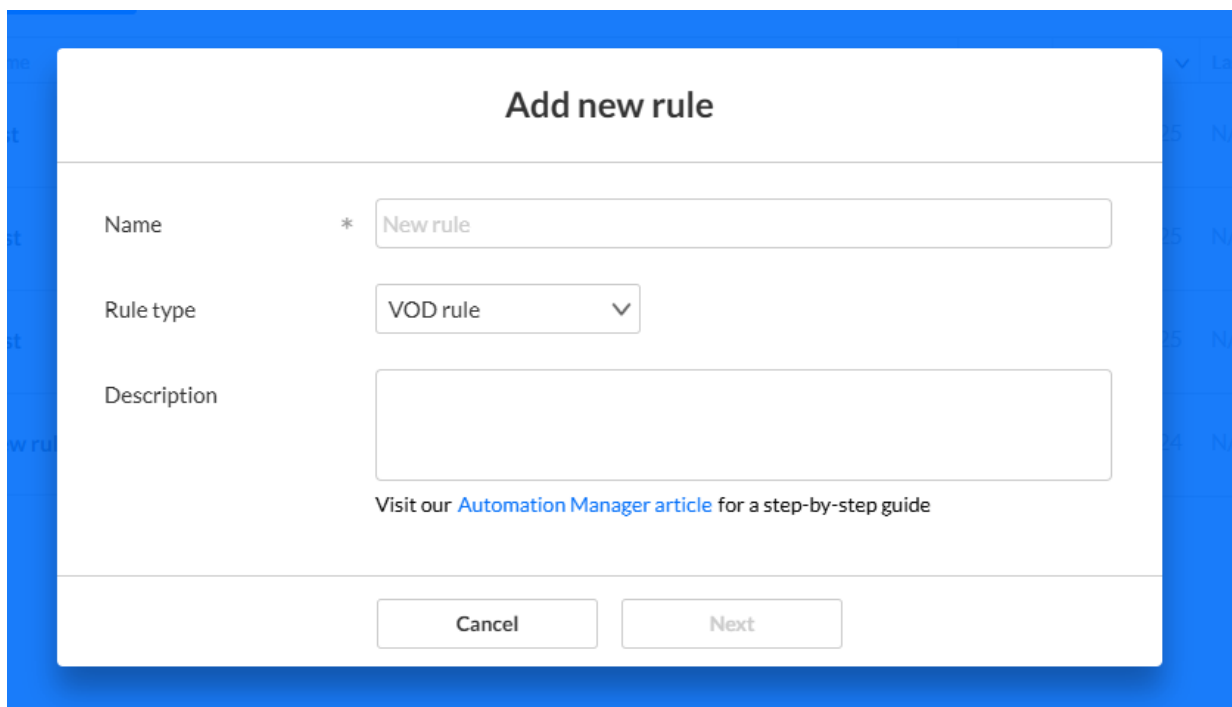

Create a new rule

1. On the **Rules** page click **Add new rule**.

The **Add new rule** window displays.

2. Complete the fields:

- **Name** (Required)
- **Rule type** - Select 'VOD rule' or 'Live rule' (once saved, the rule type can't be changed)
- **Description** (Optional)

3. Click **Next**.

The **General** tab displays.

General tab

In the General tab, you can fill in / edit the general settings for a specific rule.

The settings are as follows:

- **Name** (Required) - type in a name
- **Description** (Optional) - type in a description
- **Rule owner** - This displays the current rule owner. The **Change owner** button allows you to replace the owner.

Scheduling

- **Start date** - Use the date picker to set the first date that the Automation Manager should run.
- **Repeat** - Choose frequency from the drop-down menu (for example, daily, weekly, on specific days).

Review

- **Review Period** - Choose a time frame (1-90 days) for entries with scheduled actions to be reviewed. This period begins when entries are scanned and matched based on criteria and ends when the scheduled actions are performed. During this time, the entries will appear in the review queue.
- **Require admin approval** - When enabled, an administrator must actively approve each entry during the review period for rule actions to be executed.

If an entry is flagged but not approved or rejected during the review period, it won't be included in future scans of the same rule, even if it still meets the rule's criteria. To include it again, create a new rule with the same settings.

Set rule criteria

You can set criteria for the automation manager to determine which entries get tagged. Entries must meet all criteria to be tagged.

1. Click the **Criteria** tab.

← Delete media

Criteria: Entry owner ⓘ

Owner:

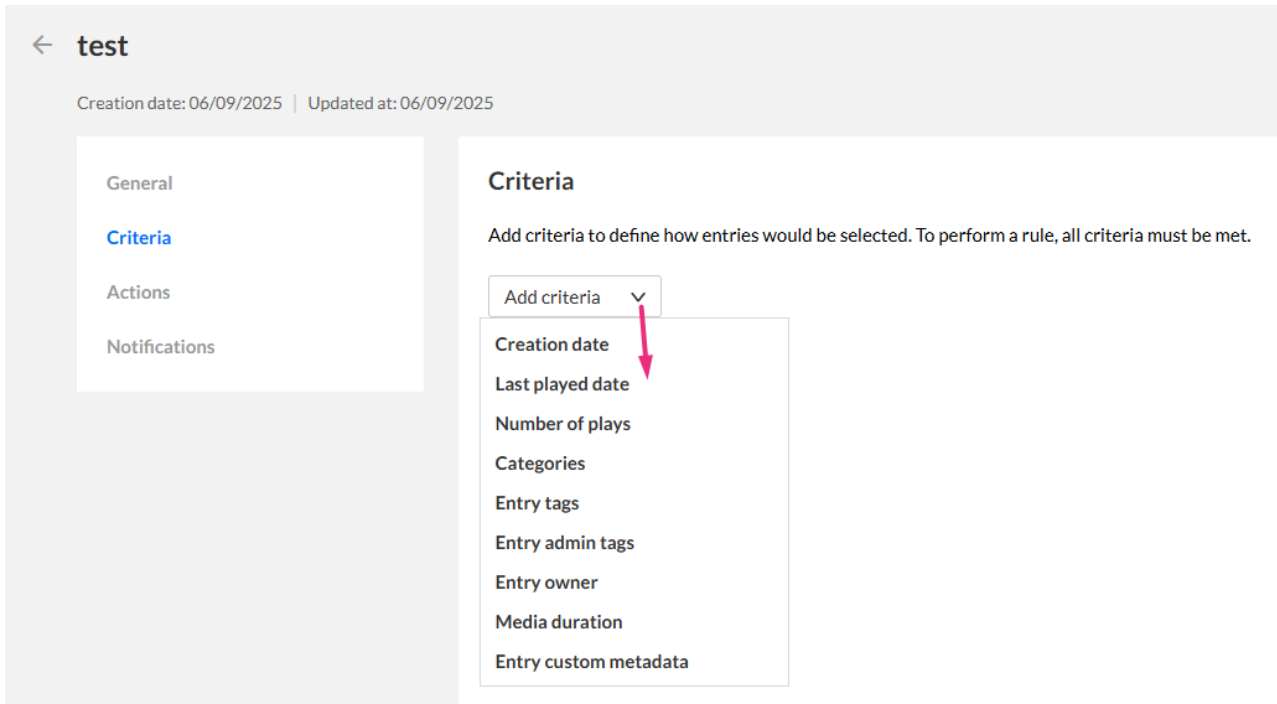

[Delete](#)

Criteria: Media duration ⓘ

Duration:

[Delete](#)

2. Click the **Add criteria** drop-down menu.

The following criteria settings are available in the drop-down menu:

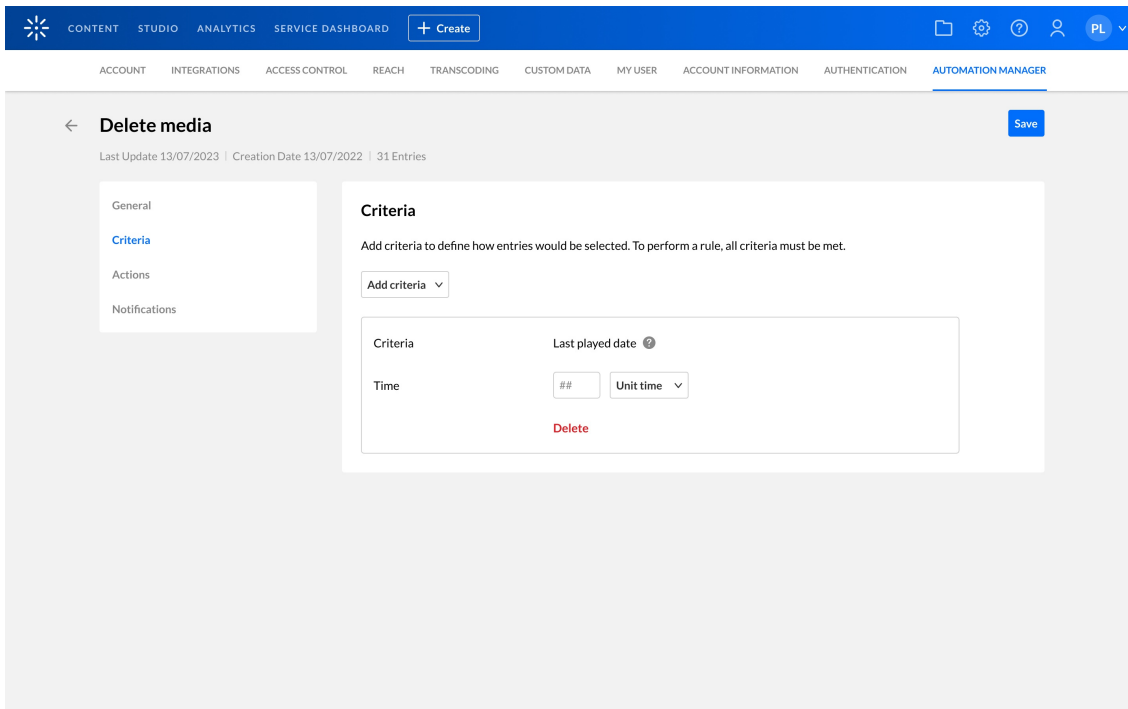

- **Creation date** - Define the minimum or maximum length of time that has passed since the entry was created.
- **Last played date** - Define the minimum or maximum length of time that has passed since the entry was last played.
- **Number of plays** - Specify the total number of plays for the entry - choose more than or less than x plays.
- **Categories** - Choose categories to which the rule will apply. The rule will be executed if the entry is found in at least one of the selected categories.
- **Entry tags** - Choose tags to which the rule will apply. The rule will be executed if the entry contains at least one of the added tags.
- **Entry admin tags** - Choose admin tags to which the rule will apply. The rule will be executed if the entry contains or doesn't contain the specified admin tags (enter exact tag names, comma-separated for multiple tags).
- **Entry owner** - Select the assigned owner(s) of the entry. The rule will be performed if the entry is owned by at least one of the added owners.
- **Media Duration** - Specify the duration of the media - select more than or less than x minutes/seconds/hours.
- **Entry custom metadata** - Select a schema and field, then define whether the field value equals or doesn't equal a specific value. The available input options depend on the field type (text, date, entry ID list, or dropdown). To learn how to create a custom metadata schema, visit our article [Create a custom metadata schema for](#)

entries.

If you remove all criteria from an enabled rule, a popup message will appear: *All criteria for this rule have been removed. As a result, the rule will be disabled automatically. Do you wish to continue?*

3. Select the desired rule criteria from the drop-down menu.

Manage rules

Each rule is displayed as a row in a table. The columns for the rules are as follows:

- **Name** - name of rule
- **Description** - description of rule
- **Created on** - the date that the rule was created on
- **Last run** - the last time MR ran this rule
- **Next run** - the next scheduled date that MR will run this rule
- **Status** (enabled / disabled)

The columns are sortable by Name, Creation on, Last run, Next run and Status.

Each rule has a **three-dot menu** at the end of the row.

Rules

[Add new rule](#) 1 Rules ↻

Name	Description	Created on	Last run	Next run	Status	
New rule		09/11/2024	N/A	10/01/2024	Disabled	⋮

Enable

Edit

Delete

The menu has the following options:

- **Enable / Disable** - Click to enable / disable the rule state.

i If you try to enable a rule that has no criteria, an error message displays: *No criteria found for this rule. To enable, please define at least one criteria.*

- **Edit** - This directs you to the edit page of the rule profile.
- **Delete** - Click to delete an existing rule. A confirmation message displays requiring you to confirm the action.

Actions tab

You can set up a list of actions to be performed on entries tagged by the automation manager. Each entry caught by the rule can have a single action or a combination of actions performed.

Actions

Add actions to be taken on entries that meet the criteria set above.

Add actions ▾

Click the **Add actions** drop-down menu.

Select the preferred actions from the drop-down menu:

- **Keep selected flavors** - This action will delete all flavors on the entry except those selected. Select from the drop-down menu.
- **Add / remove categories** - Choose one of the following actions:
 - add to categories - select the categories where the entry should be published.
 - remove from categories - select the categories from which the entry should be removed.
- **Add / remove tags** - Choose one of the following actions:
 - add tags - type in the tags that should be added to the entry.
 - remove tags - type in the tags that should be removed from the entry.
- **Change owner** - Edit the owner of the entry.
- **Delete entry** - When deleting an entry, you can also choose how to handle any linked entries:
 - **For VOD rules:** Select an action from the dropdown:
 - Delete secondary entries (default) - Removes the linked secondary entries with the parent entry.
 - Save as standalone entries - Keeps the secondary entries as independent media assets.
 - **For Live rules:** Select an action from the dropdown:
 - Delete live and VOD recordings - Deletes both the live entry and its recording.
 - Delete live entry and expose VOD recordings - Deletes the live entry but makes the recording visible and searchable.

If the [recycle bin](#) is enabled, you'll see the **Move to recycle bin** option. Selecting it moves the entry there. If you don't select it, the entry is permanently deleted.

Actions

Add actions to be taken on entries that meet the criteria set in the Criteria tab.

Notifications tab

You can set up email notifications.

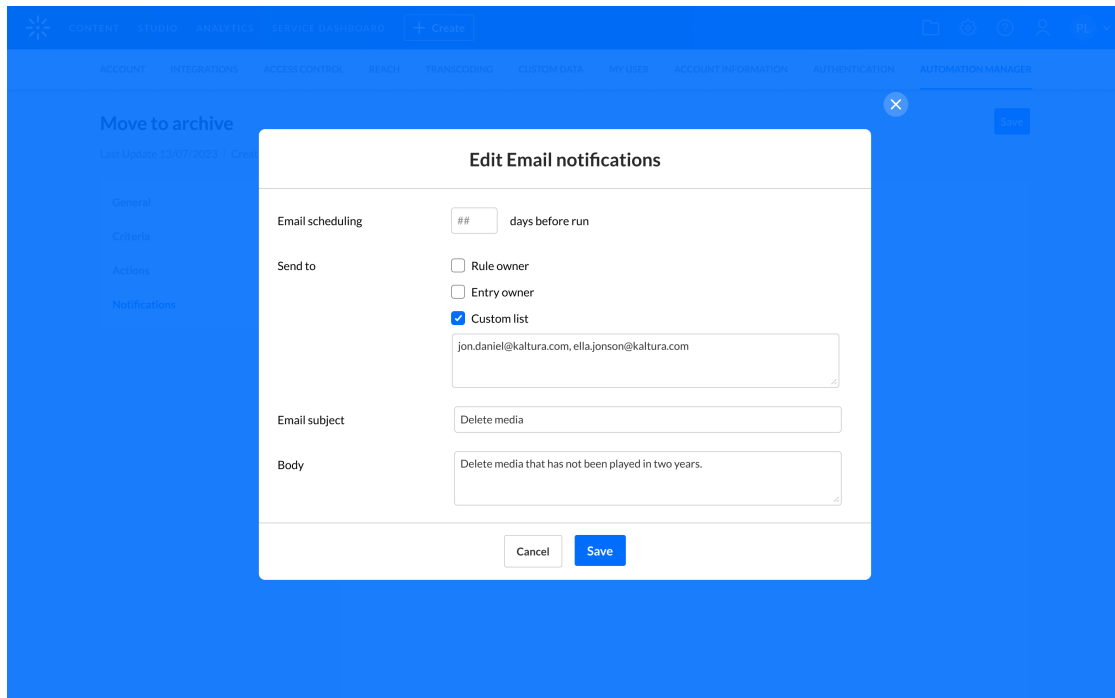

The screenshot shows the 'Delete media' rule configuration page in the Kaltura Automation Manager. The page has a blue header with navigation tabs: CONTENT, STUDIO, ANALYTICS, SERVICE DASHBOARD, and a '+ Create' button. Below the header is a sub-navigation bar with various categories, including 'AUTOMATION MANAGER'. The main content area is titled 'Delete media' and includes a 'Save' button. On the left, there is a sidebar with tabs for 'General', 'Criteria', 'Actions', and 'Notifications' (which is currently selected). The 'Notifications' section contains three checkboxes, all of which are unchecked: 'Post entries scan notification', 'Pre-action notification', and 'Post-action notification'. Each checkbox has an 'Edit' link next to it.

To set up email notifications, check the boxes for the notifications you would like to have sent automatically with every run. You can choose multiple notifications. There are three types available:

- **Post-entries scan notification** - notification sent after entries are scanned
- **Pre-action notification** - reminder that the review period is ending
- **Post-action notification** - report on the actions that were performed

Each notification has an **Edit** button that allows you to configure the settings.

Each notification has the following configurable settings:

- **Email scheduling** - Number of days before actions are performed (relevant to pre-action notification only).
- **Send to** - Check the box next to your preferred recipient:
 - Rule owner - enabled by default for every new rule
 - Entry owner
 - Custom list - begin typing a username, and suggestions of existing users on the account will be automatically provided
- **Email subject** - customize the subject line of the email that will be sent out
- **Email body** - customize the body line of the email that will be sent out

Email templates can be customized for each rule and specific email. All emails support the following **tokens**: {user.firstName}, {scanDate}, {profileName}, {actualExecutionDate}, {plannedExecutionDate}

Review and manage entries

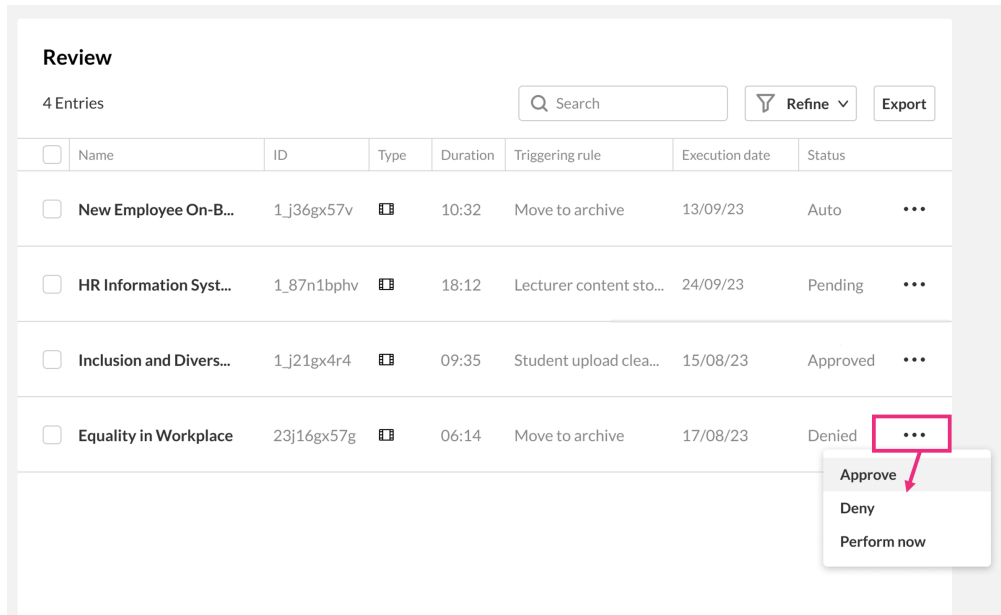

The **Review** tab lists entries that met the criteria of a rule and were added to the review queue. You can perform actions on the entries.

The columns for each entry are:

- **Name** - entry name
- **ID** - entry ID
- **Type** - media type icon (same as in KMC entries tab)
- **Duration** - media duration
- **Triggering rule** - the rule that triggered the entry to be added to the review queue
- **Execution date** - the date in which the triggering rule is planned to run
- **Status - the statuses are as follows:**
 - Pending - actions won't be performed without manual approval (only relevant for rules that require approval)
 - Auto - actions will be performed automatically (relevant only for rules that don't require approval)
 - Approved - entries that have been approved
 - Rejected - entries that have been rejected

Each entry has a **three-dot menu** at the end of the row.

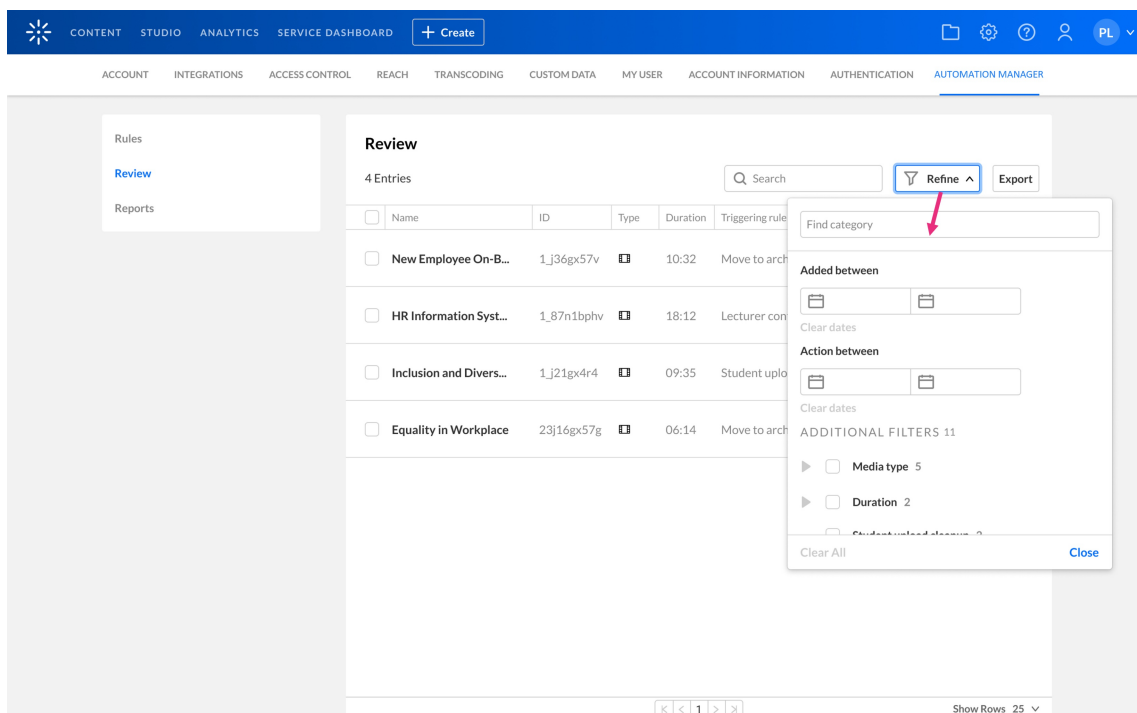

The menu allows you to perform the following actions:

- **Approve**
- **Deny / Reject**
- **Perform now** - Performing the rule will cause the configured actions to be performed on all selected entries.

Search, filter and refine

You can search, filter and refine the list of entries in the review queue.

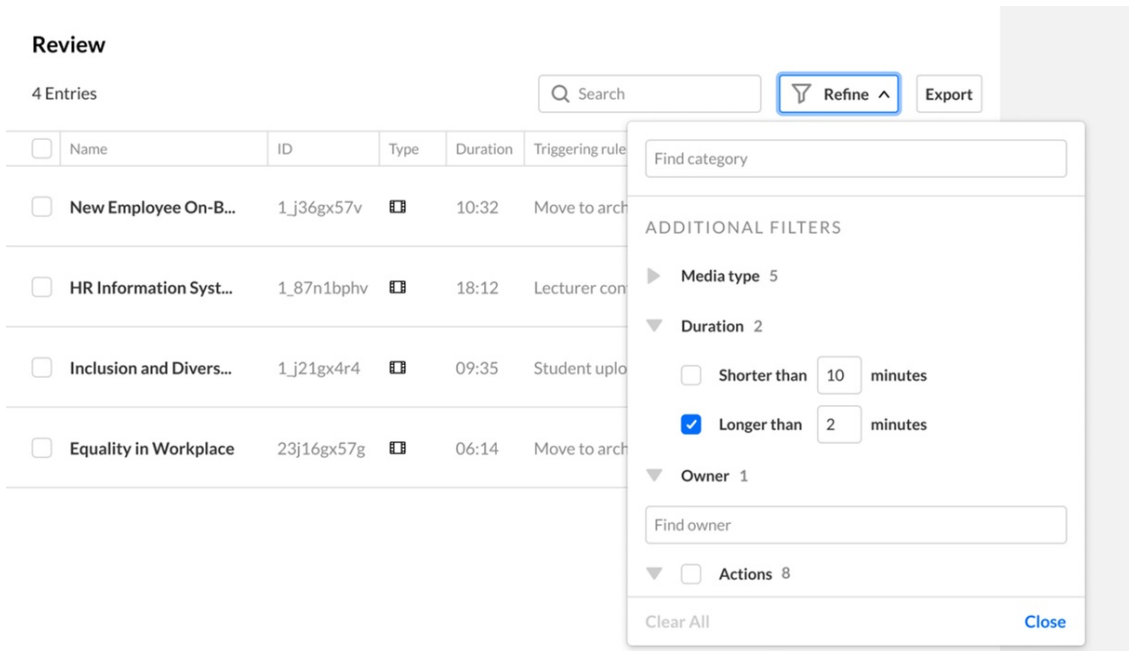

Search

Use the search field to search for an entry in the review queue.

Refine

Refine your search using the following filters:

- **Added between** - enter the date the entry was added to the review queue
- **Action between** - enter the date the actions are planned to be performed
- **Additional filters** - you can refine your search using additional filters

The screenshot shows a 'Review' section with 4 entries. A search bar and 'Refine' button are visible. The 'Refine' dropdown menu is open, showing 'Find category' and 'Additional Filters' with the following settings:

- Media type**: 5
- Duration**: 2
 - Shorter than 10 minutes
 - Longer than 2 minutes
- Owner**: 1
- Actions**: 8

Buttons for 'Clear All' and 'Close' are at the bottom of the filter menu.

Name	ID	Type	Duration	Triggering rule
<input type="checkbox"/> New Employee On-B...	1_j36gx57v	EB	10:32	Move to arch
<input type="checkbox"/> HR Information Syst...	1_87n1bphv	EB	18:12	Lecturer con
<input type="checkbox"/> Inclusion and Divers...	1_j21gx4r4	EB	09:35	Student uplo
<input type="checkbox"/> Equality in Workplace	23j16gx57g	EB	06:14	Move to arch

The available filters are as follows:

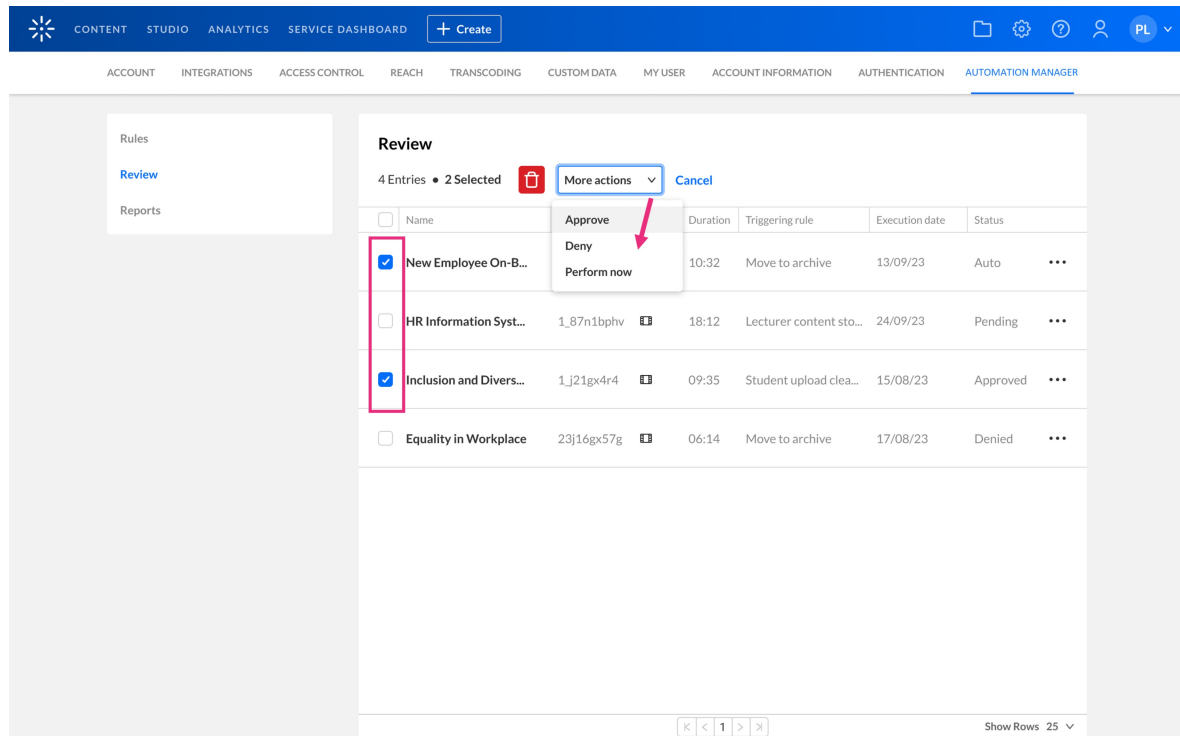

- **Media type**
- **Duration** - you can set parameters for shorter than or longer than (x minutes)
- **Owner** - filter according to owner
- **Approval status** - entries with the approval status of Auto, Pending Approval, Rejected, Approved
- **Rules** - all entries that were caught by the selected rule

Looking for an entry that met the rule but no longer appears in the review queue? If an entry was flagged but no action (approve or reject) was taken during the review period, it won't show up again in future scans of the same rule, even if it still meets the criteria. To include it again, create a new rule with the same settings.

Bulk actions

Using the **More actions** menu, you can select specific entries (or all entries on the page) and perform bulk actions.

You can perform the following actions in bulk:

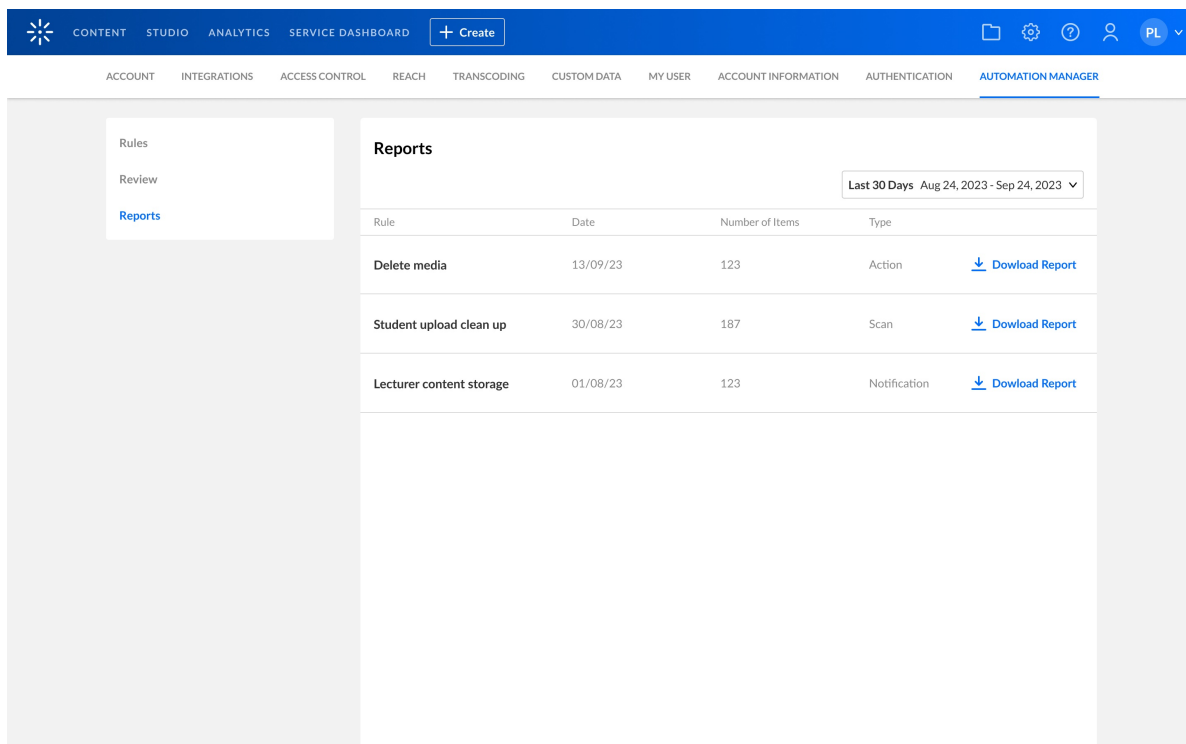

- **Approve**
- **Reject**
- **Perform now** - Executing this rule now will perform the configured actions on all selected entries.

Export

You can export a CSV file with all entries based on the filtering in the **Review** tab at the time of export.

Reports

The **Reports** tab displays and allows you to download reports generated by the automation manager for your account. It shows only reports that are in 'Ready' status.

The columns for each rule are:

- **Rule** - the name of the rule associated with the report
- **Date** - date the report was created
- **Number of items** - number of records in the report
- **Type** - there are three types:
 - Scan - this report is generated every time entries are scanned
 - Test - this report is generated every time a test run was performed
 - Action - this report is generated every time actions were performed

The columns are sortable by date, number of items, and type. You can use the filter at the top right to filter the reports.

The reports can be filtered by the following:

- **Date** - enter the desired date in the date picker
- **Rule** - filter by rule
- **Type** - filter by type (scan / test / action)

Download report - Click **Download Report** at the end of the row to download the report of that entry.
