

View and manage a document entry

Last Modified on 05/31/2024 1:43 pm IDT

 This article is designated for all users.

About

Document entries in Kaltura offer a range of features and tools tailored to the type of document uploaded. From PowerPoint presentations to PDF files, each document type comes with its own set of functionalities designed to enhance user experience and accessibility.

Tools & features

Document entries will have different features and tools depending on the type of document you upload. The image below shows a Powerpoint file.

Click the full-screen icon to open the document in Microsoft Office Viewer.

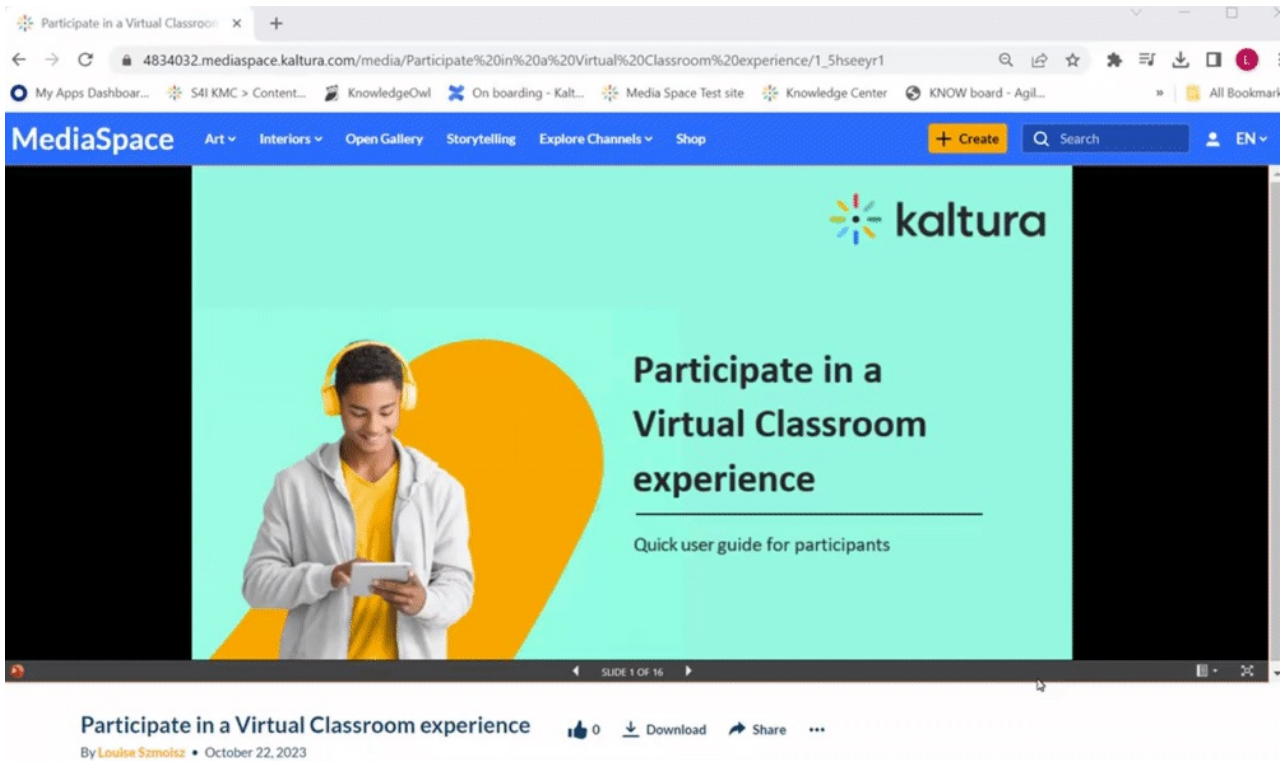

In the Microsoft Office Viewer, you have access to various MS Office tools, including

functions like downloading and printing.

⚠ As Microsoft Office Viewer is an external application, it will allow you to download the document even if the download option has been disabled in your Kaltura application.

To exit the viewer, click X on the tab.

Download

Users can download the document by clicking the **Download** option below the screen.

⚠ By default, downloading is enabled for all documents and media owners have the option to disable download for individual documents from the 'edit media' page. However, once 'disabled' is selected in the admin page, document downloading is universally disabled (see the **Documententry** module). However, it's important to note that even if the administrator has removed the download button, a user can always download a document from the [viewing application](#) as this is outside of Kaltura's control.

Share

You can share a document by clicking **Share**.

You can choose to share to networks, via email or by copying the link.

Delete

To delete an entry, click the **3 dots menu** and select **Delete**.

The entry moves to the recycle bin.

Move to Recycle bin

Are you sure you want to delete this media and move it to the recycle bin? This media will be automatically deleted from the recycle bin within 30 days.

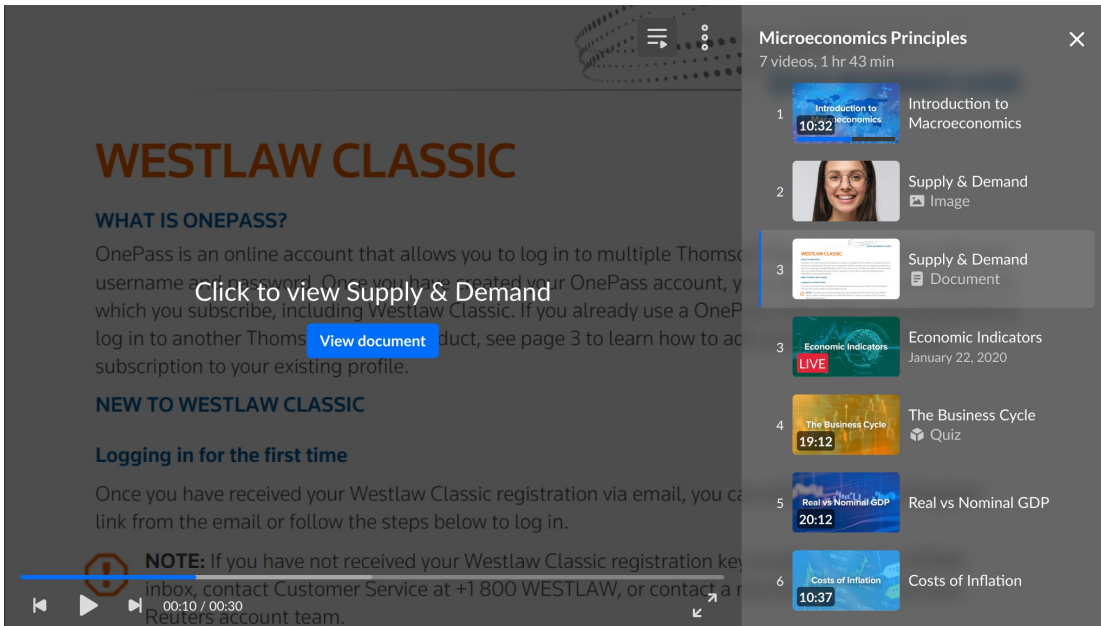

Cancel Delete

 Analytics are not currently available for document entries.

View in playlist

For admins who opt in, the playlist player can display document entries. It includes a link to the Video Portal for viewing docs outside the playlist. This makes it easy to access any included documents, like in playlists. Users may also be able to download them, depending on whether the download feature has been enabled.

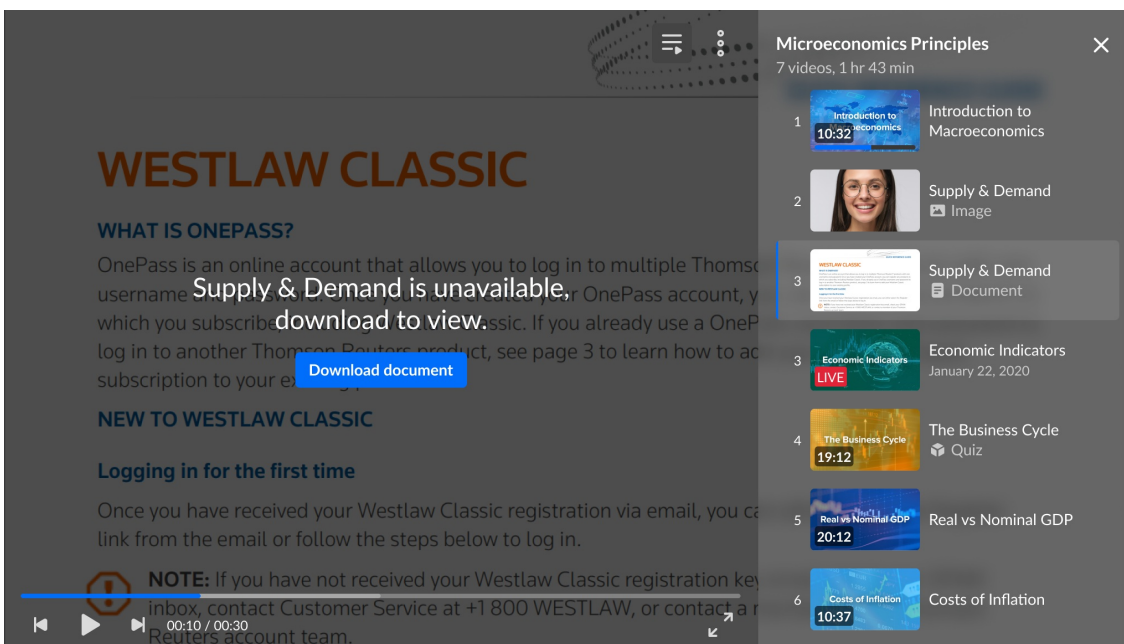

Below is a sample of a document entry. Notice the thumbnail preview in the background. Click **View Document** to open the document in a new tab.

Click to view Supply & Demand

View document

When a document isn't available for viewing, you can download it using the **Download Document** feature, provided it's enabled on your player.

Supply & Demand is unavailable,
download to view.

Download document

Below is a document entry that's not available for viewing, and the **Download document** feature hasn't been enabled.

WESTLAW CLASSIC

WHAT IS ONEPASS?

OnePass is an online account that allows you to log in to multiple Thomson products, including Westlaw Classic. If you already use a OnePass account, you can log in to another Thomson product, see page 3 to learn how to add a subscription to your existing profile.

NEW TO WESTLAW CLASSIC

Logging in for the first time

Once you have received your Westlaw Classic registration via email, you can click the link from the email or follow the steps below to log in.

NOTE: If you have not received your Westlaw Classic registration key in your email, contact Customer Service at +1 800 WESTLAW, or contact a Reuters account team.
