About

You can enrich your videos by adding audio tracks manually. This includes dubbed versions in various languages and standard audio descriptions, making your content more accessible and engaging for all viewers.

Note: When adding a dubbed or audio description file, you must also add the original audio track to the audio flavors. For example, if the video is originally in English and you dub it in Spanish, add both the Spanish and English audio tracks. This ensures the player displays both audio options with appropriate labels.

Access the flavors tab

1. Log into KMC and under the **Entries** tab, locate the entry you want to add the audio to.
2. Click on the entry.

The entry details page displays.
3. On the entry details page, click the **Flavors** tab to display the flavors.

Upload a dubbed audio file

1. In the flavors tab, navigate to the asset you want to upload, which will appear greyed out. In our example, we're uploading French.

The list of flavors is pre-configured. If you need a language that's not on the list, please contact your Kaltura representative.

2. Click the **three dots menu** at the end of the row and select **Upload**.
3. Choose the desired audio track from your computer. (Note: it should be an MP4 file.)

Make sure the audio track is correctly labeled, for example, 'French' to ensure the player displays the appropriate labels in the Audio menu.

4. Click **Open** or hit **Enter** on your keyboard.

The uploading process begins.

5. Next, upload the **original audio track**. Don't forget to label this track appropriately, for example, 'English'.

 Don't skip uploading the original audio track! If you only upload the dubbed audio, it will be the default and only track available in the player.

6. Once the process is complete, the audio files display in black in your list of flavors

The audio displays in the player's Audio menu.

Upload an audio description file

1. Access the [flavors tab](#).
2. In the flavors tab, navigate to **Audio Description** in the flavors list, which will appear greyed out.
3. Click the **three dots menu** at the end of the row and select **Upload**.
4. Choose the desired audio track from your computer. (Note: It should be an MP4 file.)

Make sure the audio track is correctly labeled, for example, 'Audio Description - English' to ensure the player displays the appropriate labels in the player's Audio menu.

5. Click **Open** or hit **Enter** on your keyboard.
6. The uploading process begins.
7. Next, navigate to **English** in the flavors list (it will appear greyed out), and upload the original audio track. Label this track appropriately, for example, 'English'. (Note: This service is only available in English.)

 Don't skip uploading the original audio track! Once this is done, the player will allow you to toggle between the two audio options.

Once the process is complete, the audio tracks display in black in your list of flavors.

The tracks display in the player's Audio menu.

For information on ordering audio description and dubbing through Kaltura's REACH service, please visit our article [Introduction to Kaltura REACH](#).
