

## Server side notifications

Last Modified on 06/11/2024 4:06 pm IDT

The following are the supported KMC notifications:

<b>Event</b>	<b>Description</b>
Entry Add	An entry was successfully added the account.
Entry Block	An entry was blocked by a moderator or admin user.
Entry Delete	An entry was deleted.
Entry Update	An entry was updated/modified.
Entry Update Moderation	An entry's moderation status was changed.
Entry Update Thumbnail	The default thumbnail of the entry was replaced.
Entry Update Permissions	An entry's privacy settings were changed.
User Add	A new user was added to the Kaltura account.
User Ban	A user was banned from the Kaltura account.

To enable the notifications

1. In the KMC, select the Settings tab and then select the Integration Settings menu.
2. Toggle Yes to receive server notifications.
3. Enter the Notification URL and Save Changes.

For more information about the various notifications and how to implement a notification handler script on your server, refer to:
