Admin Announcement - Admin Guide

Content updated: 07/15/2024

This article is designated for administrators.

About

The Adminannouncement module allows administrators to add an announcement alert banner for all end users. The sections herein will guide you through enabling and configuring the Adminannouncement module.

This module is for both Content Hubs and legacy Video Portal users.

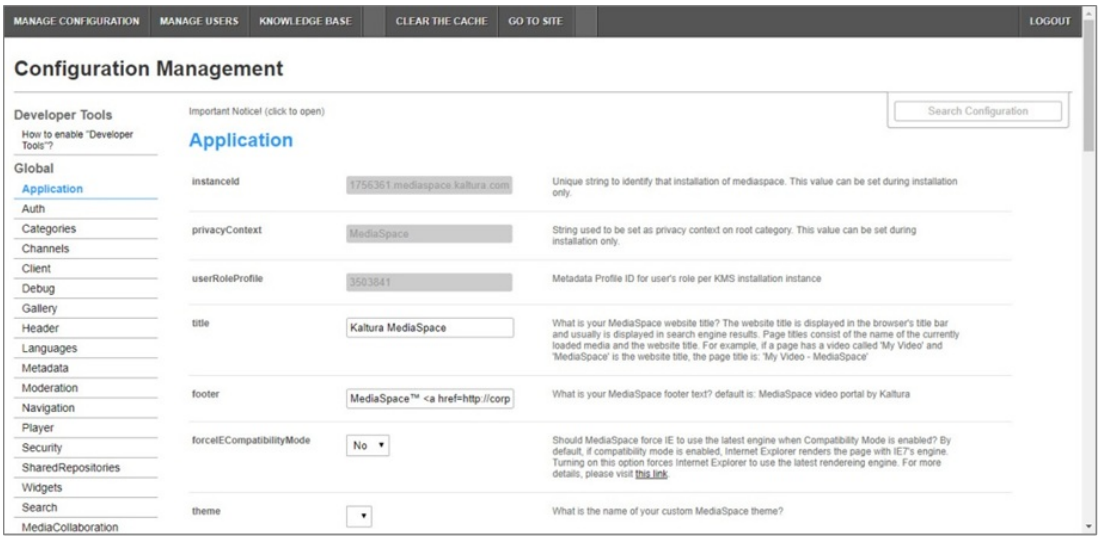

For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

When the `closeAnnouncement` feature is enabled in the module's configuration, it uses a cookie to track when a user dismisses an announcement. The cookie is named `adminannouncement_dismissed_[announcement-md5-hash]` (where `[announcement-md5-hash]` is a hash of the announcement text). The value is always 1 and the cookie is cleared when the user logs in or out of Content Hubs or legacy Video Portal.

Configure

1. Access your Configuration Management console.

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

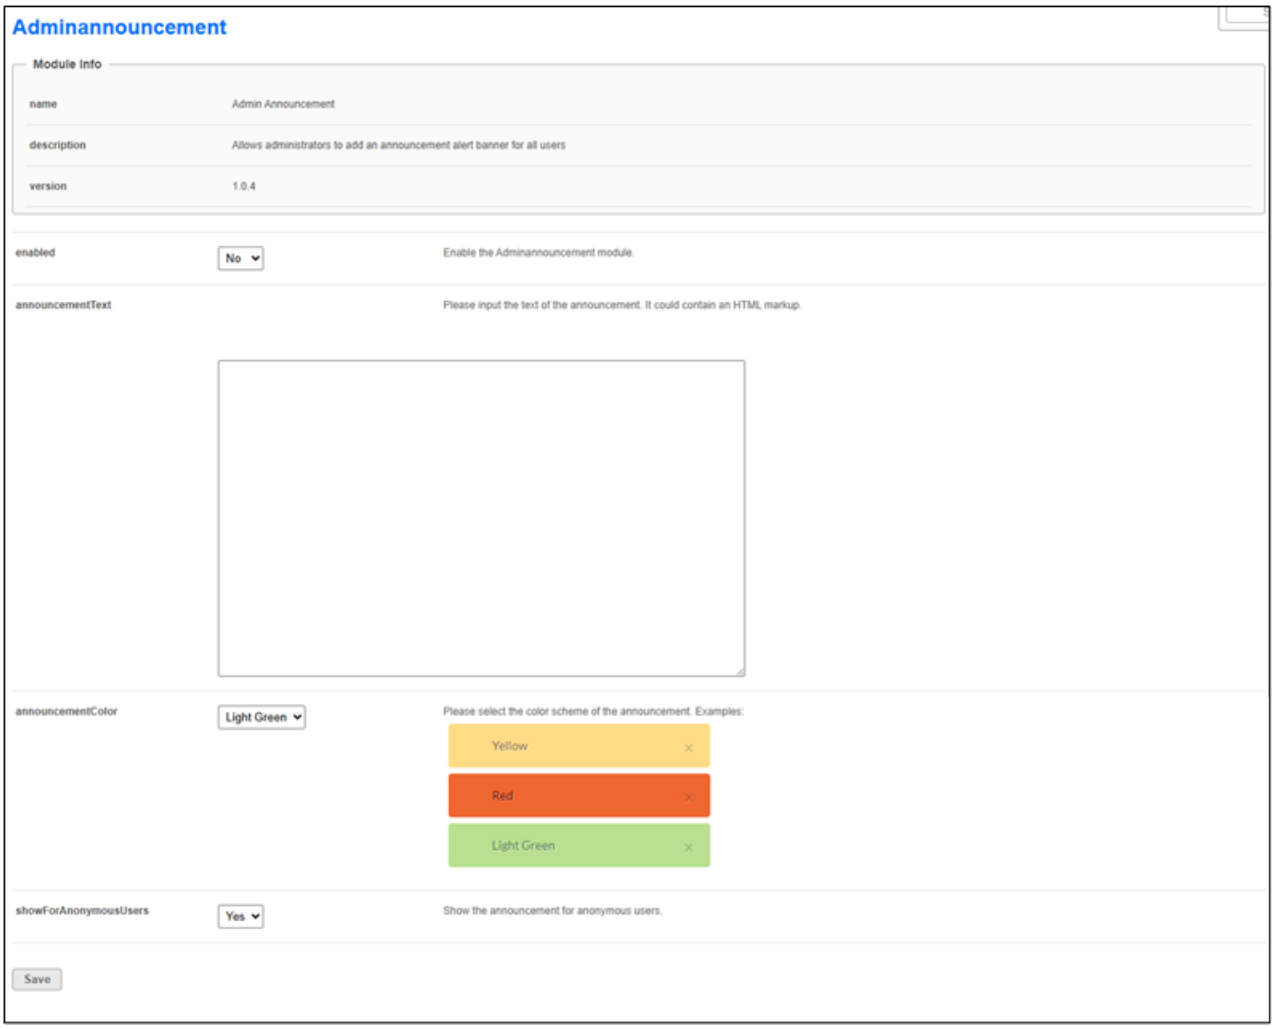

2. In the list of configurable items on the left of your screen, locate and click on Adminannouncement.

The Adminannouncement item will be crossed out because it is disabled by default.

The Adminannouncement window displays.

The **Module Info** box displays the module name, description (what enabling this module allows users to do), and version number.

3. In the enabled pull-down list, select **Yes** to enable the Adminannouncement module.

Other configurable items following the enabled pull-down list are as follows.

Configuration Name	Options	Description
announcementText	Free text	The text of the announcement. HTML markup is allowed.
announcementColor	Yellow, Red, or Light Green	The color scheme of the announcement.
showForAnonymousUsers	Yes or No	Whether or not this announcement will be shown for anonymous users.

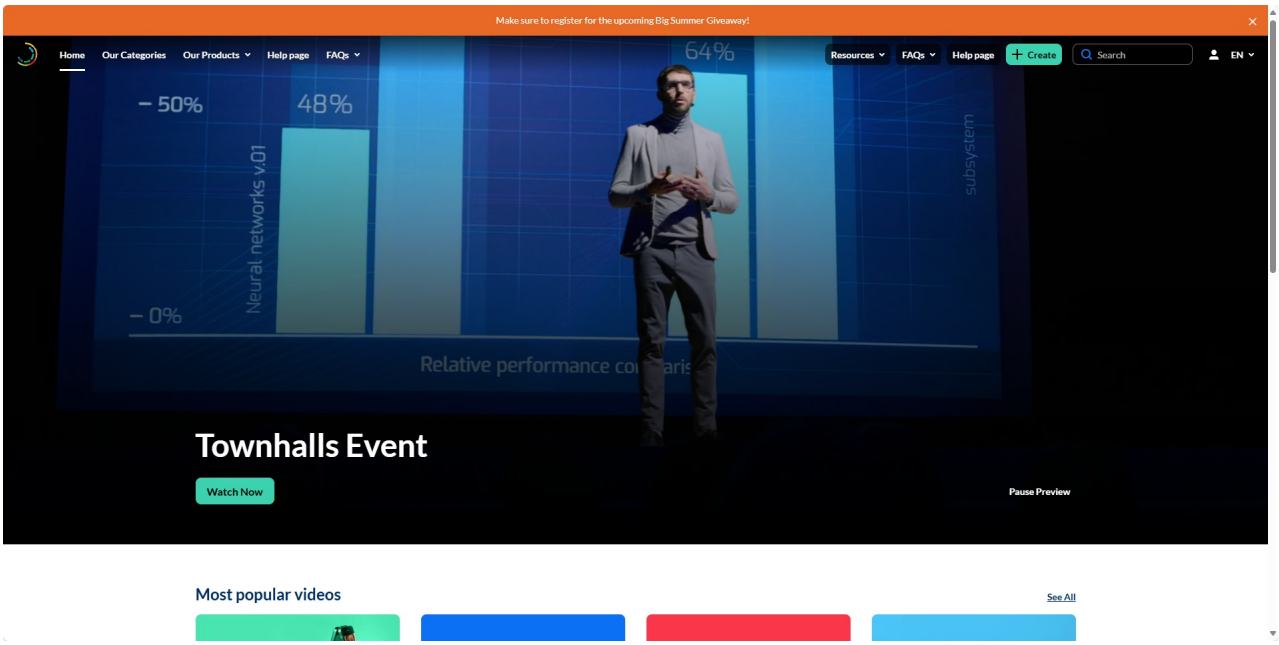

4. Click **Save**. You receive a notice that your configuration for Adminannouncement was saved and the cache was cleared.
