Admin Announcement - Admin Guide

Last Modified on 09/11/2024 6:50 pm IDT

> 🔐 **This article is designated for administrators.**

About

The Adminannouncement module allows administrators to add an announcement alert banner for all end users. The sections herein will guide you through logging into the Configuration Management section of KMS and enabling and configuring the Adminannouncement module.

> 💡 This module is for both Theming and non-Theming users.

> ✅ For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

Configure

1. Log into the Configuration Management console by going to your KMS URL and adding */admin* at the end.

2. Enter your Kaltura user ID and password.

3. Click **Sign In**. The Configuration Management console displays.

4. In the list of configurable items on the left of your screen, locate and click on Adminannouncement.

⚠ The Adminannouncement item will be crossed out because it is disabled by default.

The Adminannouncement window displays.

The **Module Info** box displays the module name, description (what enabling this module allows users to do), and version number.

5. In the enabled pull-down list, select **Yes** to enable the Adminannouncement module.

Other configurable items following the enabled pull-down list are as follows.

Configuration Name	Options	Description
announcementText	Free text	The text of the announcement. HTML markup is allowed.
announcementColor	Yellow, Red, or Light Green	The color scheme of the announcement.
showForAnonymousUsers	Yes or No	Whether or not this announcement will be shown for anonymous users.

6. Click **Save**. You receive a notice that your configuration for Adminannouncement was saved and the cache was cleared.

Admin Announcement

Once enabled and configured, the Admin Announcement displays to the end user at the top of every page of the KMS as follows.

Theming users:

Non-theming users:
