

Multi Video Management - Admin Guide

Last Modified on 09/11/2024 6:56 pm IDT

 This article is designated for administrators.

About

Multivideomanagement module allows KMS admins to download parent and child videos and to upload and replace parent and child videos.

The workflow is as follows:

1. KMS administrator enables multivideomanagement module.
2. KMS administrator enters multivideomanagement module URL.
3. KMS administrator fills the media ID in the media ID text box and presses on the “Get download links” button.
4. Two options display:
 - 4.1. Download link to download the entry.
 - 4.2. Upload button to replace the entry with a different entry.
5. In case there is a child entry, the download link for the child entry displays as well.
6. In case there is a child entry, the upload button for the child entry displays as well.

 This module is for both Theming and non-Theming users.

 For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

Configure

1. Log into the Configuration Management console by going to your KMS URL and adding */admin* at the end.
2. Enter your Kaltura user ID and password.
3. Click **Sign In**. The Configuration Management console displays.

Application

instanceId	1756361.mediaspace.kaltura.com	Unique string to identify that installation of mediaspace. This value can be set during installation only.
privacyContext	MediaSpace	String used to be set as privacy context on root category. This value can be set during installation only.
userRoleProfile	3503541	Metadata Profile ID for user's role per KMS installation instance
title	Kaltura MediaSpace	What is your MediaSpace website title? The website title is displayed in the browser's title bar and usually is displayed in search engine results. Page titles consist of the name of the currently loaded media and the website title. For example, if a page has a video called 'My Video' and 'MediaSpace' is the website title, the page title is: 'My Video - MediaSpace'
footer	MediaSpace™ <a href=http://corp	What is your MediaSpace footer text? default is: MediaSpace video portal by Kaltura
forceIECompatibilityMode	No	Should MediaSpace force IE to use the latest engine when Compatibility Mode is enabled? By default, if compatibility mode is enabled, Internet Explorer renders the page with IE's engine. Turning on this option forces Internet Explorer to use the latest rendering engine. For more details, please visit this link .
theme		What is the name of your custom MediaSpace theme?

4. In the list of configurable items on the left of your screen, locate and click on **Multivideomanagement**.

 The Multivideomanagement item will be crossed out because it is disabled by default.

The Multivideomanagement window displays.

Download:

Parent/Child	ID	Link
Parent	1_csccaus	Download

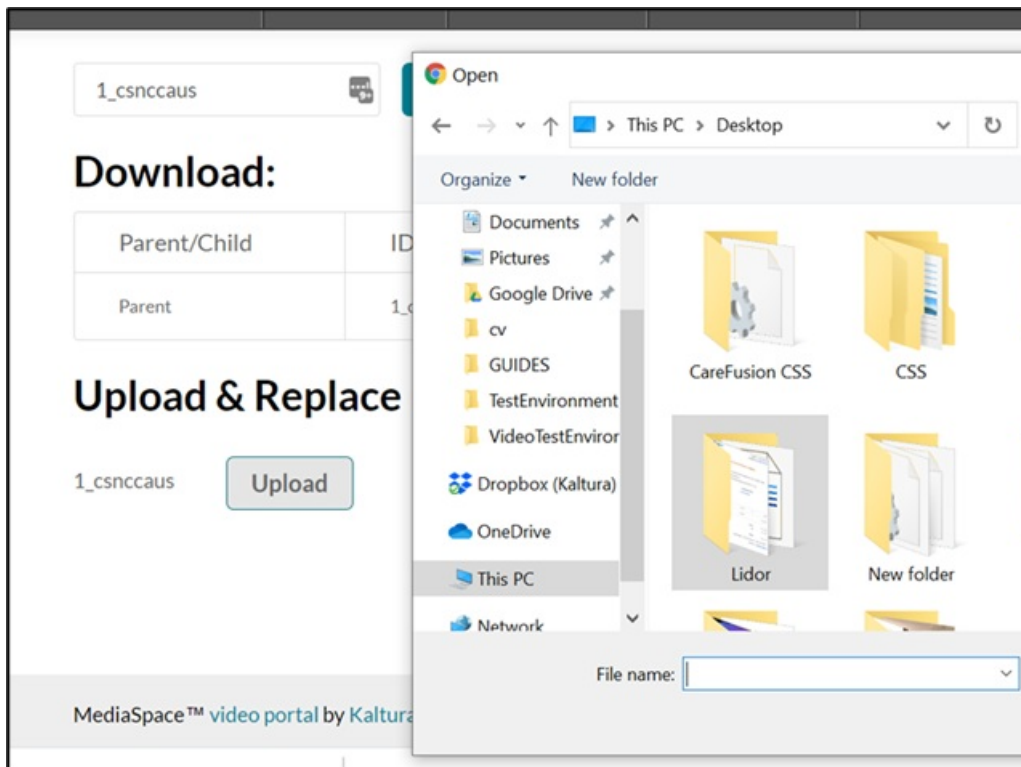

Upload & Replace

1_csccaus

Pressing the **Download** link button downloads the entry.

Pressing the **Upload** button will give you the option to change the entry.

Following is a parent and child entry example. This happens when choosing two screens in Kaltura Capture.
