 This article is designated for all users.

About

Virtual classroom organizers who have been planning and managing multiple virtual classrooms may wish to "showcase" them to an audience of prospects. Kaltura generates a "Showcase page" that organizers can customize, share directly with prospects, and/or embed on their own website. Virtual classroom organizers can choose the specific virtual classrooms they want listed, thereby giving prospects a view of their "best" virtual classrooms in one single page. Think of it as a virtual classroom catalogue!

 Virtual classrooms are automatically published to the Showcase page upon creation.

Change Showcase settings on virtual classrooms that are currently published to the Showcase page

1. On the Virtual Classroom Home page, click the three-button menu to the right of the virtual classroom you would like to showcase, then choose **Change Showcase Settings**.

Virtual Classrooms

1 Classroom

The **Publish on Showcase** screen displays.

Publish on Showcase

Published The classroom will be published on Showcase
