

Upload from URL - Admin Guide

Last Modified on 09/11/2024 6:57 pm IDT

 This article is designated for administrators.

About

This module adds the **Upload from URL** option to the **+Create** menu (Theming) or **+Add New** menu (non-Theming). This guide explains how to enable and configure the **uploadfromurl module** in the Configuration Management console.

 This module is for both Theming and non-Theming users.

 For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

Configure

1. Log into the Configuration Management console by going to your video portal URL and adding */admin* at the end.
2. Enter your Kaltura user ID and password.
3. Click **Sign In**.

The **Configuration Management** console displays.

The screenshot shows the Configuration Management console interface. At the top, there are navigation tabs: MANAGE CONFIGURATION, MANAGE USERS, KNOWLEDGE BASE, CLEAR THE CACHE, GO TO SITE, and LOGOUT. The main heading is "Configuration Management". On the left, there is a sidebar with "Developer Tools" and a list of configuration categories: Global, Application (selected), Auth, Categories, Channels, Client, Debug, Gallery, Header, Languages, Metadata, Moderation, Navigation, Player, Security, SharedRepositories, Widgets, Search, and MediaCollaboration. The main content area is titled "Application" and contains several configuration items:

Property	Value	Description
instanceId	1756361.mediaspace.kaltura.com	Unique string to identify that installation of mediaspace. This value can be set during installation only.
privacyContext	MediaSpace	String used to be set as privacy context on root category. This value can be set during installation only.
userRoleProfile	3503841	Metadata Profile ID for user's role per KMS installation instance
title	Kaltura MediaSpace	What is your MediaSpace website title? The website title is displayed in the browser's title bar and usually is displayed in search engine results. Page titles consist of the name of the currently loaded media and the website title. For example, if a page has a video called 'My Video' and 'MediaSpace' is the website title, the page title is: 'My Video - MediaSpace'
footer	MediaSpace™ <a href=http://corp	What is your MediaSpace footer text? default is: MediaSpace video portal by Kaltura
forceIECompatibilityMode	No	Should MediaSpace force IE to use the latest engine when Compatibility Mode is enabled? By default, if compatibility mode is enabled, Internet Explorer renders the page with IE's engine. Turning on this option forces Internet Explorer to use the latest rendering engine. For more details, please visit this link .
theme		What is the name of your custom MediaSpace theme?

4. In the list of configurable items on the left of your screen, locate and click on **Uploadfromurl**. (The item will be crossed out because it's disabled by default.)

⚠ If this module is not in your KMS application, please get in touch with your Kaltura representative to inquire about adding it.

5. The **Uploadfromurl** window displays.

Uploadfromurl

Module Info		
name	UploadFromUrl	
description	Adds the upload from URL option to the New dropdown menu	
version	1.0.9	

enabled	<input type="button" value="Yes"/> ▾	Enable the Uploadfromurl module.
linkText	<input type="text" value="Upload Video from URL"/>	Link name. Used for old UI.
linkTextShort	<input type="text" value="Upload from URL"/>	Short link name. Used for new design system UI.
linkDescription	<input type="text" value="Upload a video from a URL"/>	Link description. Used for new design system UI.
errorCreatingEntry	<input type="text" value="Error creating entry"/>	Message displayed when failed to create entry
validateUrl	<input type="button" value="Yes"/> ▾	When true, the module will validate the URL before upload

The **Module Info** box displays the module name, description (what enabling this module allows users to do), and version number.

6. Configure the following:

enabled - Set to 'Yes' to enable the module.

linkText - This is the link name that displays for non-Theming users. You can change the default name by typing in the field.

linkTextShort - This is the link name that displays for Theming users. You can change the default name by typing in the field.

linkDescription - This is the link description that displays for Theming users. You can change the default name by typing in the field.

errorCreatingEntry - This is the default error message shown when the entry creation process fails.

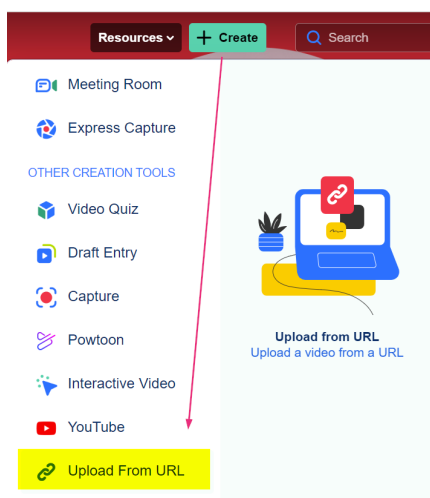

validateUrl - When set to 'Yes', the module will validate the URL before upload.

7. Click **Save**.

You receive a notice that your configuration for **Uploadfromurl** was saved and the cache was cleared.

User experience

The example below shows the link in the **+Create** menu (for Theming users).

The example below shows the link in the **+Add New** menu (for non-Theming users).
