

Back to channel - Admin Guide

Last Modified on 09/11/2024 6:51 pm IDT

 This article is designated for administrators.

About

The **Backtochannel** module adds a “Back to channel” link to the entry page if the user arrived from a channel. Follow the steps to log into the Configuration Management section and configure the Backtochannel module.

 This module is for non-Theming users.

 For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

Configure

1. Log into the Configuration Management console by going to your video portal URL and adding `/admin` at the end.
2. Enter your Kaltura user ID and password.
3. Click **Sign In**.

The Configuration Management console displays.

The screenshot shows the Configuration Management console interface. At the top, there are navigation tabs: MANAGE CONFIGURATION, MANAGE USERS, KNOWLEDGE BASE, CLEAR THE CACHE, GO TO SITE, and LOGOUT. The main heading is "Configuration Management". On the left, there is a sidebar with "Developer Tools" and a list of configuration categories: Application, Auth, Categories, Channels, Client, Debug, Gallery, Header, Languages, Metadata, Moderation, Navigation, Player, Security, SharedRepositories, Widgets, Search, and MediaCollaboration. The "Application" category is selected. The main content area shows an "Important Notice" and a "Search Configuration" box. Below that, the "Application" configuration is displayed with several fields:

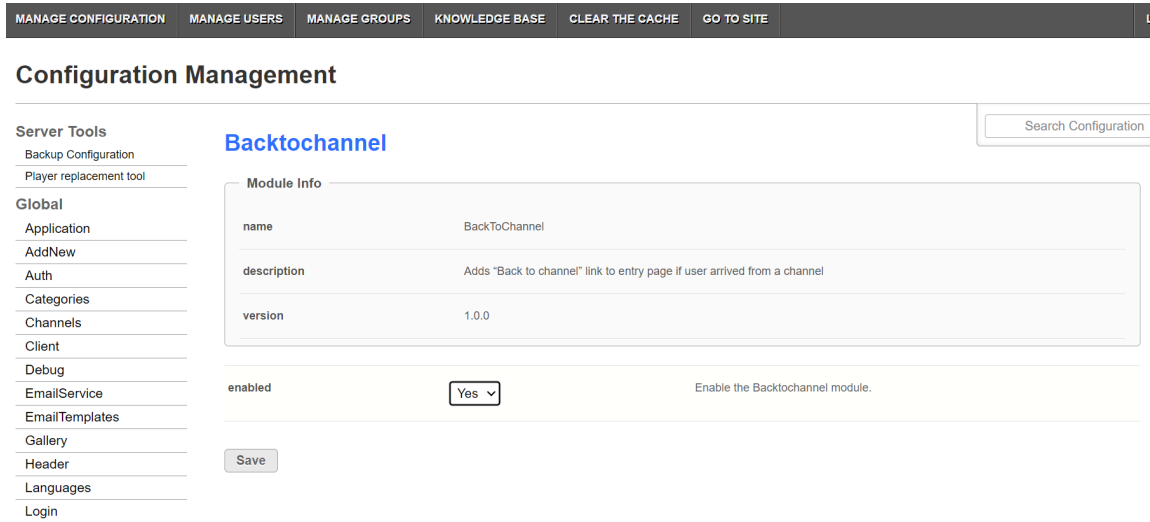

Field	Value	Description
instanceId	1756361 mediaspace.kaltura.com	Unique string to identify that installation of mediaspace. This value can be set during installation only.
privacyContext	MediaSpace	String used to be set as privacy context on root category. This value can be set during installation only.
userRoleProfile	3503841	Metadata Profile ID for user's role per KMS installation instance
title	Kaltura MediaSpace	What is your MediaSpace website title? The website title is displayed in the browser's title bar and usually is displayed in search engine results. Page titles consist of the name of the currently loaded media and the website title. For example, if a page has a video called 'My Video' and 'MediaSpace' is the website title, the page title is: 'My Video - MediaSpace'
footer	MediaSpace™ <a href=http://corp	What is your MediaSpace footer text? default is: MediaSpace video portal by Kaltura
forceIECompatibilityMode	No	Should MediaSpace force IE to use the latest engine when Compatibility Mode is enabled? By default, if compatibility mode is enabled, Internet Explorer renders the page with IE7's engine. Turning on this option forces Internet Explorer to use the latest rendering engine. For more details, please visit this link .
theme		What is the name of your custom MediaSpace theme?

4. In the list of configurable items on the left of your screen, locate and click on **Backtochannel**. (The item will be crossed out because it's disabled by default.)

 If this module is not in your video portal application, please get in touch with your Kaltura representative to

inquire about adding it.

The **Backtochannel** window displays.

The screenshot shows the 'Configuration Management' interface for the 'Backtochannel' module. At the top, there is a navigation bar with links: MANAGE CONFIGURATION, MANAGE USERS, MANAGE GROUPS, KNOWLEDGE BASE, CLEAR THE CACHE, GO TO SITE, and LOG OUT. Below this, the 'Configuration Management' title is displayed. On the left, there is a sidebar menu with categories: Server Tools (Backup Configuration, Player replacement tool), Global (Application, AddNew, Auth, Categories, Channels, Client, Debug, EmailService, EmailTemplates, Gallery, Header, Languages, Login), and a search box labeled 'Search Configuration'. The main content area is titled 'Backtochannel' and contains a 'Module Info' table with the following data:

Module Info	
name	BackToChannel
description	Adds "Back to channel" link to entry page if user arrived from a channel
version	1.0.0

Below the table, there is an 'enabled' field with a dropdown menu set to 'Yes' and a note: 'Enable the Backtochannel module.' A 'Save' button is located at the bottom left of the configuration area.

The **Module Info** box displays the module name, description (what enabling this module allows users to do), and version number.

5. Configure the following:

Set **enabled** to **Yes** to enable the module.

6. Click **Save**.

You receive a notice that your configuration for **Backtochannel** was saved and the cache was cleared.

User experience

Once enabled, the Back to channel option appears on the entry page for the end user.
