

Category Members Collaboration - User Guide

Last Modified on 09/11/2024 6:52 pm IDT

 This article is designated for all users.

About

This guide explains how to set collaboration conditions for a specific category or channel in the [video portal](#). Follow the steps below to configure collaboration settings for your desired [category](#) or [channel](#).

 This guide is for both Theming and non-Theming users.

 For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

Prerequisites

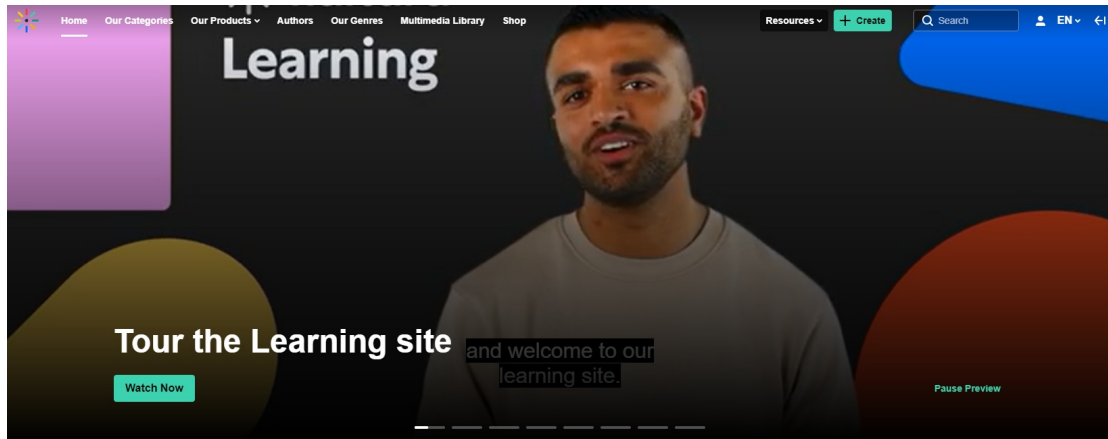

- The **Notificationhandler module** and **Categorymemberscollaboration module** must be enabled on your video portal account. If you need help with this, please reach out to your Kaltura Account Representative.
- You need to be a Category or Channel Manager for the category or channel you want to set collaboration conditions for.

For information on video portal roles and category / channel types, please visit our article [Video Portal and KAF roles and permissions](#).

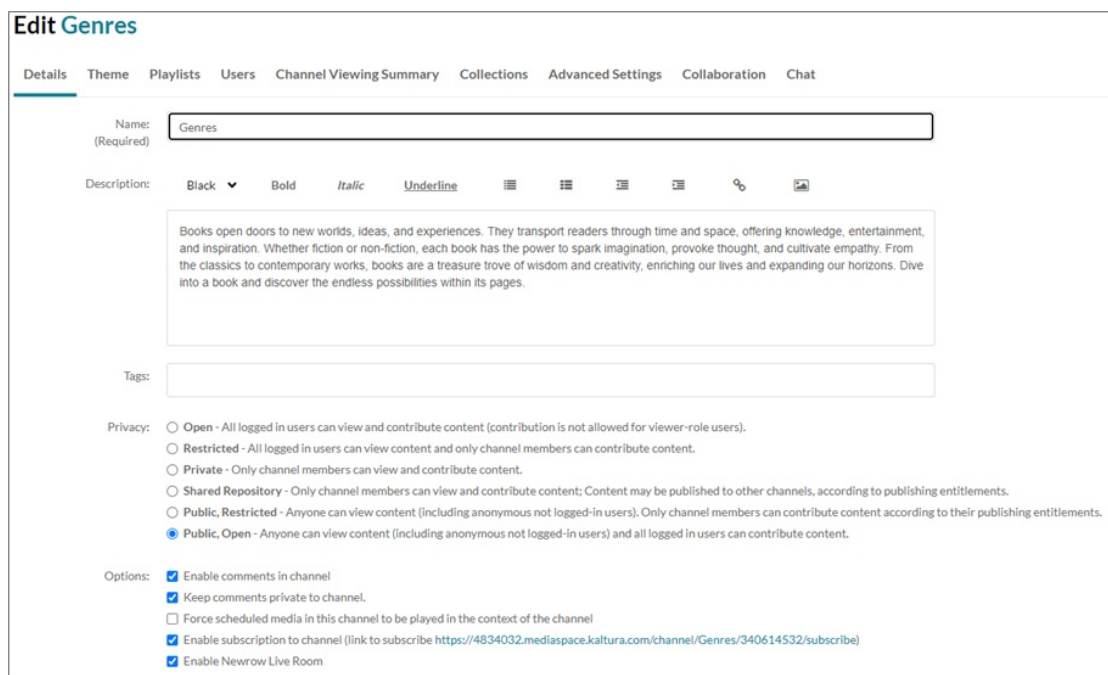

Set collaboration conditions

1. Log into your [video portal](#). If you need help, follow the instructions in our article [Log into your video portal](#).

The video portal homepage displays.

2. Navigate to the [Edit page](#) of a category / channel of which you are a manager.

3. Click the **Collaboration** tab.

Submit

4. If global settings were made, and you want to change module settings away from the default, uncheck **Use global settings**.
5. Select the roles that will become collaborators automatically for all media published in the category/channel – Manager, Moderator, Contributor, and / or Member.
6. Select the permissions you want to give those users – Co-Editor and / or Co-Publisher.
7. Click **Submit**.

Manual collaboration update for a category

If your administrator has enabled it, an **Update entry collaboration permissions** button displays in the **Users tab** of the category edit page.

Details Theme Playlists Users Channel Viewing Summary

Update entry collaboration permissions

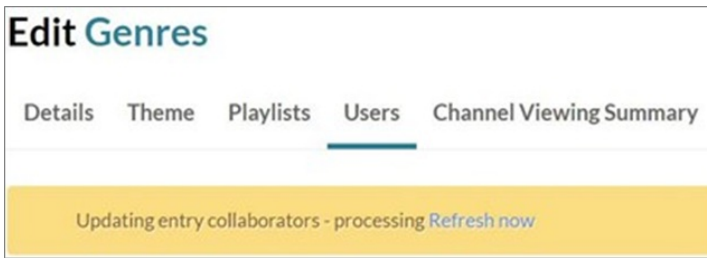

View All Permissions ▼ 1 User

User/Group Name	User/Group ID
Louise Smith	louise.smith@kaltura.com

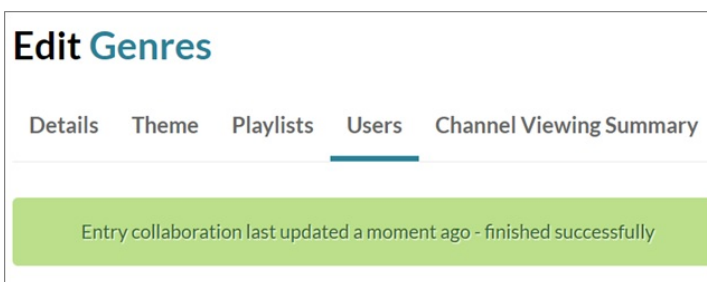

When clicking this button, the collaboration permissions of each entry in the category are updated according to the current settings. The update process (which can take some time) is done in the background, with the relevant indication.

While an update is processing for a category a message displays: *Updating entry*

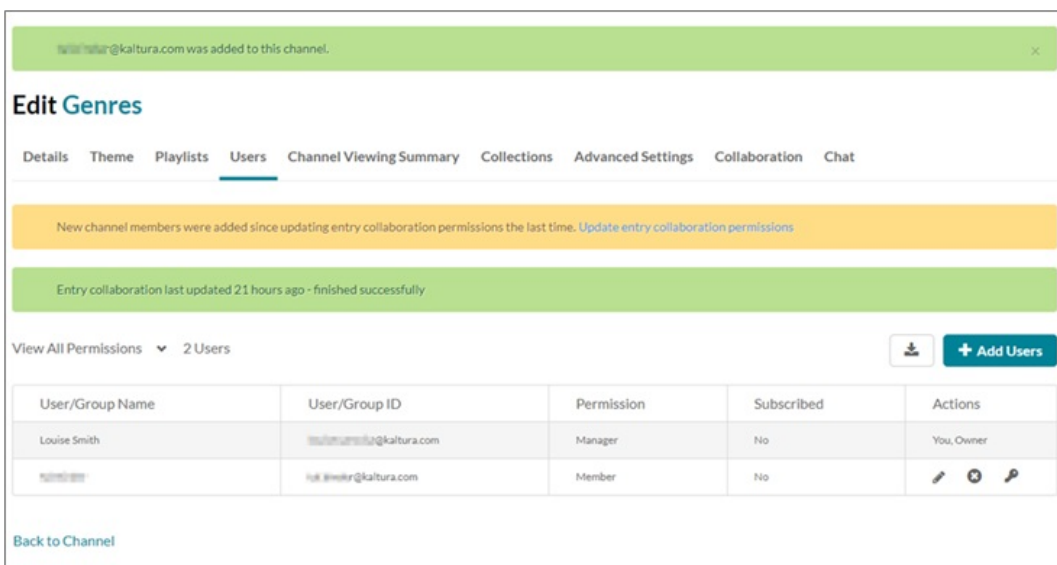

collaborators - processing. You cannot schedule a new update during this time. After the end of the task execution, the button will display again.

When the process has completed, a message displays: *Entry collaboration last updated a moment ago - finished successfully.*

When a new member is added to the category after the manual 'collaboration permissions' update, a relevant warning message displays: *New channel members were added since updating entry collaboration permissions the last time.*

The Result

After collaboration conditions are set on a category / channel, when media is published to the category / channel, the 'Collaboration' users automatically become Co-Editors / Co-Publishers and they can also access the media from their 'My Media'.

Limitations

Removing an entry from a channel or category will not remove its collaborators added via this module. Removing a user (or group) from the category will not remove them as a collaborator from the videos. Changes applied will affect new entries added to the category and will not affect existing entries.
