

Event Recording and DVR - Admin Guide

Last Modified on 06/04/2026 9:18 am IDT

 This article is designated for administrators.

About

The **Eventrecordinganddvr** module lets end users enable or disable recording and DVR options on the webcasting creation page. Follow the steps to log into the Configuration Management section of your Video Portal and set up the module.

 This module is for both Theming and non-Theming users.

 This module is now redundant. Its functionality has been incorporated into the core product, so this module is no longer required to access these features.

 For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

Configure

1. Log into the Configuration Management console by going to your Video Portal URL and adding */admin* at the end.
2. Enter your Kaltura user ID and password.
3. Click **Sign In**.
The **Configuration Management** console displays.

Search Configuration

instanceId: 1756361.mediaspace.kaltura.com
Unique string to identify that installation of mediaspace. This value can be set during installation only.

privacyContext: MediaSpace
String used to be set as privacy context on root category. This value can be set during installation only.

userRoleProfile: 3503841
Metadata Profile ID for user's role per KMS installation instance

title: Kaltura MediaSpace
What is your MediaSpace website title? The website title is displayed in the browser's title bar and usually is displayed in search engine results. Page titles consist of the name of the currently loaded media and the website title. For example, if a page has a video called 'My Video' and 'MediaSpace' is the website title, the page title is: 'My Video - MediaSpace'

footer: MediaSpace™ <a href=http://corp
What is your MediaSpace footer text? default is: MediaSpace video portal by Kaltura

forceIECompatibilityMode: No
Should MediaSpace force IE to use the latest engine when Compatibility Mode is enabled? By default, if compatibility mode is enabled, Internet Explorer renders the page with IE7's engine. Turning on this option forces Internet Explorer to use the latest rendering engine. For more details, please visit [this link](#).

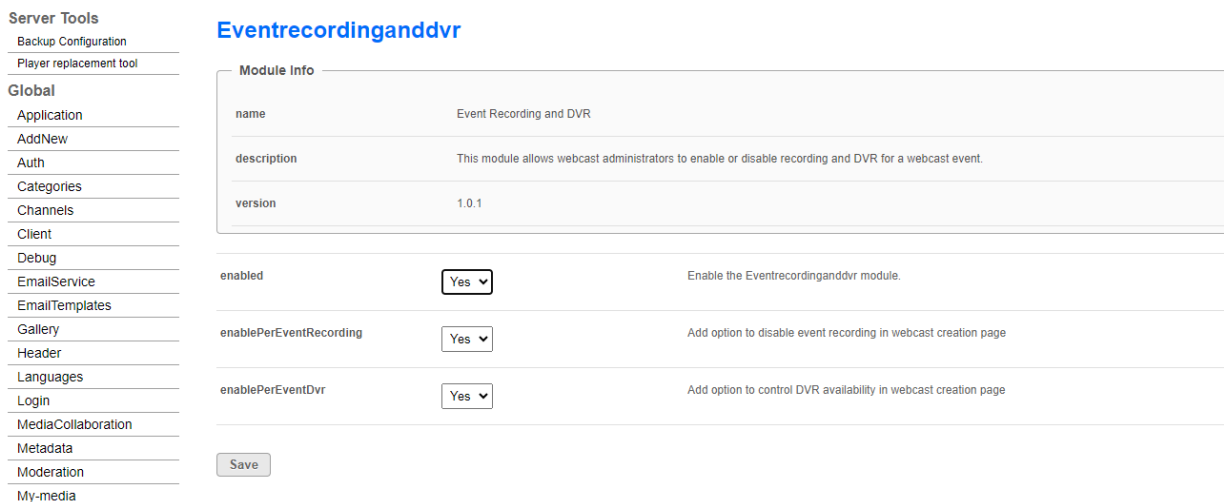

theme:
What is the name of your custom MediaSpace theme?

- In the list of configurable items on the left of your screen, locate and click on **Eventrecordinganddvr**. (The item will be crossed out because it's disabled by default.)

□ If this module is not in your Video Portal application, please get in touch with your Kaltura representative to inquire about adding it.

The **Eventrecordinganddvr** window displays.

Module Info

name: Event Recording and DVR

description: This module allows webcast administrators to enable or disable recording and DVR for a webcast event.

version: 1.0.1

enabled: Yes
Enable the Eventrecordinganddvr module.

enablePerEventRecording: Yes
Add option to disable event recording in webcast creation page

enablePerEventDvr: Yes
Add option to control DVR availability in webcast creation page

Save

The **Module Info** box displays the module name, description (what enabling this module allows users to do), and version number.

- Configure the following:

enabled - Set to 'Yes' to enable the module.

enablePerEventRecording - Choose whether to give the option to disable event recording on the webcast creation page.

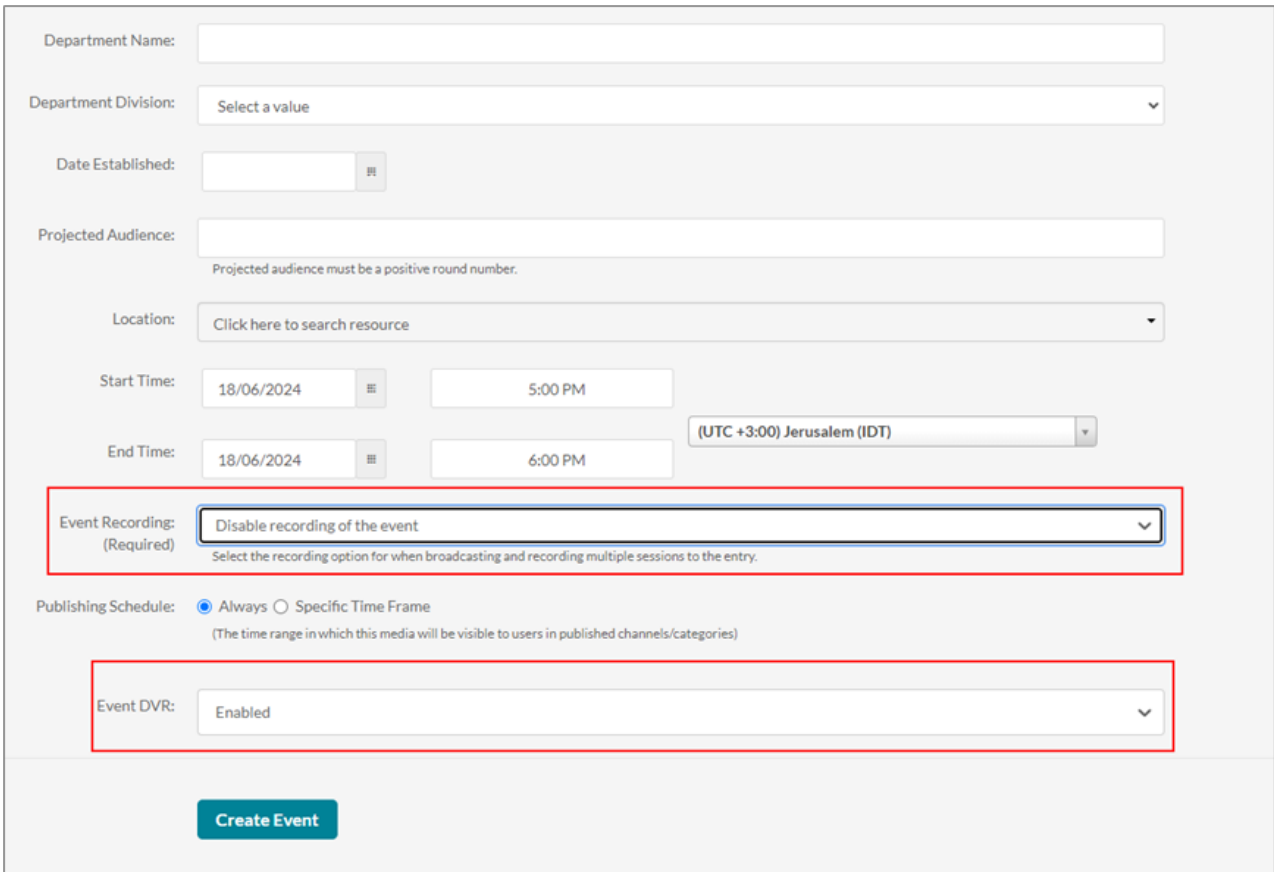

enablePerEventDvr - Choose whether to give the option to control DVR availability on the webcast creation page.

6. Click **Save**.

You receive a notice that your configuration for **Eventrecordinganddvr** was saved and the cache was cleared.

User experience

Once enabled and configured, the options for disabling / enabling event recording and DVR availability display to the end-user on the webcasting creation page as shown below:

The screenshot displays the 'Create Event' form in the Kaltura interface. The form includes several input fields and dropdown menus. Two specific areas are highlighted with red boxes:

- Event Recording (Required):** A dropdown menu is set to 'Disable recording of the event'. Below the dropdown, a note reads: 'Select the recording option for when broadcasting and recording multiple sessions to the entry.'
- Event DVR:** A dropdown menu is set to 'Enabled'.

Other visible fields include: Department Name (text input), Department Division (dropdown), Date Established (calendar icon), Projected Audience (text input with note: 'Projected audience must be a positive round number.'), Location (dropdown), Start Time (18/06/2024, 5:00 PM), End Time (18/06/2024, 6:00 PM), and a time zone dropdown set to '(UTC +3:00) Jerusalem (IDT)'. At the bottom, there are radio buttons for 'Publishing Schedule' (Always selected, Specific Time Frame) and a 'Create Event' button.
