

## Add & remove collaborators in Canvas

 This article is designated for all users.

### About

As a media owner, you can add collaborators such as co-editors, co-publishers, and co-viewers to their media. This will make the media available in the collaborators' personal My Media.

Note that adding a collaborator doesn't change that user's overall role, in other words, a user with a viewer role added as a co-editor or co-publisher can only edit or publish the specific media they've been assigned to.

Your administrator can also configure the option of adding co-editors, co-publishers, or co-viewers during upload of an entry.

For information about transferring ownership, check out our article *Change media ownership*.

This feature requires the [Mediacollaboration module](#) to be enabled.

### Add collaborators
