 This article is designated for all users.

About

Scheduling media in your LMS allows you to control when your content becomes viewable to your audience.

Whether you're planning a future release or managing past content, scheduling helps you keep your video portal organized and timely.

This feature requires the [scheduling module](#) to be enabled.

These instructions apply to the legacy **LMS Video** integration. If you're using LMS Video with Theming, please refer to the [LMS Rich Media Extensions category](#).

Access the Publishing schedule settings

1. Access the edit media page.

The edit media page displays with the **Details** tab open by default.
