

# Channel sessions tab in Content Hubs

Last Modified on 06/16/2026 12:27 pm IDT

 This article is designated for all users.

## About

Once a scheduled session is published to a channel, it appears on the **Sessions tab** of the channel page.

The Sessions tab allows attendees to browse past and upcoming sessions and access session details and actions.

 The placement of the tab is configured in the channel's [Settings & layout tab](#).

## View sessions

If a channel contains both past and upcoming sessions, the **Sessions** tab includes a **View all sessions** or **View upcoming sessions** option.

- **View all sessions** displays all past and upcoming sessions in the channel. Past sessions appear first (at the top), followed by upcoming sessions.

- **View upcoming sessions** displays only sessions that are currently in progress or scheduled for the future. Sessions in progress appear first, followed by future sessions.

- If a channel contains only past sessions or only upcoming sessions, the View all sessions / View upcoming sessions option isn't displayed.
- The default view is configured by your administrator in the [Channelthemingui module](#).

## Session card details

The session card provides key details about the session, including:

- **Scheduled time**
- **Title**
- **Description**
- **Tags** (up to two tags are shown)
- **Speaker information** (if applicable) - You can click on a speaker's icon to view a pop-up with the speaker's bio, without needing to navigate away from the page. This information is also accessible without logging in.
- **Thumbnail** - Learn how to set a thumbnail image in our article [Edit media thumbnails](#).
- **'Join Now'** - This button automatically updates when the event starts, allowing you to join in real time without needing to refresh the page.
- **'RSVP'** - Allows you to indicate interest in specific sessions. Read more [here](#).
- **'Watch'** - Available when the session (live/simulive) is connected to the video source. This button directs users to the VOD version after the session ends.
- **'Add to Watch List'** - If applicable, allows you to add the session to your **personal watch list**.
- **Add to Calendar** - Allows you to download the session details as a calendar invite (compatible with Outlook, Google, etc.). Read more [here](#). This button automatically updates to **Join Now** a set number of minutes before the session starts, allowing users to easily join without refreshing the page.

Depending on your organization's configuration, the **Add to Calendar** button may appear as an **RSVP** button instead (read more [here](#)).

The settings are managed by your administrator in the [Widgets module](#).
