# Channel session cards

Last Modified on 06/17/2025 12:32 pm IDT

👥 **This article is designated for all users.**

## About

Once a scheduled session for a webcast or Kaltura Meeting is published to a channel, it appears on the **Sessions tab** of the channel page. This tab displays a session card for each event, providing attendees with essential information and options to engage with the session.

The placement of the Sessions tab is configured in the channel's **advanced settings** (read Edit a channel to learn more).

## Session card details

The session card provides key details about the session, such as:

- **Scheduled time**
- **Title**

- **Description**
- **Tags** (up to two tags are shown)
- **Speaker information** (if applicable) - You can click on a speaker's icon to view a pop-up with the speaker's bio, without needing to navigate away from the page. This information is also accessible without logging in.
- **Thumbnail** - Learn how to set a thumbnail image in our article Set a media thumbnail.

> ✓ The settings are managed by your administrator in the Widgets module.

- **'Join Now'** - This button automatically updates when the event starts, allowing you to join in real time without needing to refresh the page.
- **'RSVP'** - Allows you to indicate interest in specific sessions. Read more here.
- **'Watch'** - Available when the session (live/simulive) is connected to the video source. This button directs users to the VOD version after the session ends.
- **'Add to Watch List'** - If applicable, allows you to add the session to your **personal watch list**.
- **Add to Calendar** - Allows you to download the session details as a calendar invite (compatible with Outlook, Google, etc.). Read more here. This button automatically updates to **Join Now** a set number of minutes before the session starts, allowing users to easily join without refreshing the page.

> ℹ️ Depending on your organization's configuration, the **Add to Calendar** button may appear as an **RSVP** button instead (read more here).

> ✓ The **Join Now** button is managed by your administrator in the Widgets module.
