The screens shown here represent a multi-session event. The same actions apply when working with single session.

Choose email type

Select a desired email type from the list - Custom templates or System emails. Only sent emails of the email type that you chose will be displayed.

The email data displayed depends on -

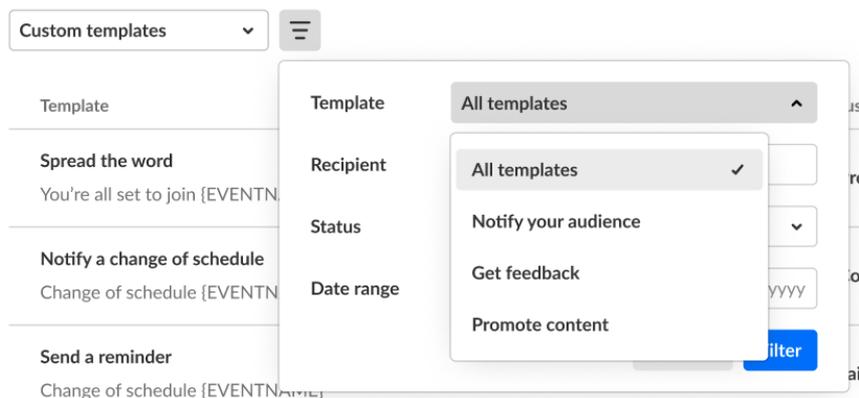

- The email service used by your event template
- Whether or not you have moderator/speaker automated system emails configured (i.e., Notify speaker/moderator of session assignment or Notify speaker/moderator of schedule change)

Filtering options

Click the **Filter** button  and use the following filtering options to quickly find the information you need.

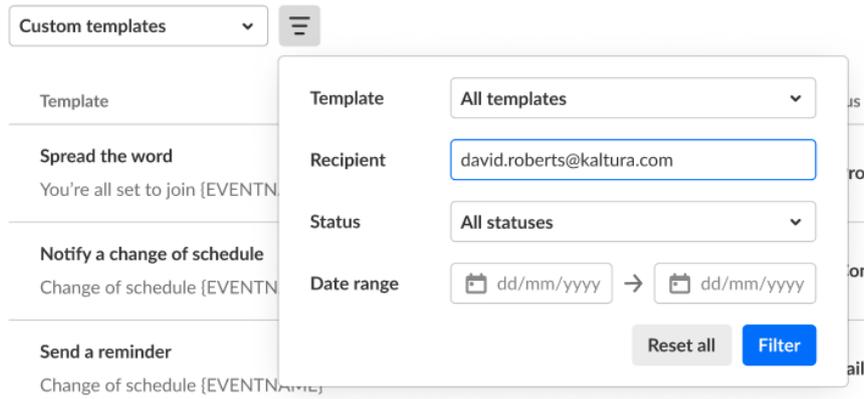

Filter by template

Select a desired template from the list. The templates listed are dependent on whether you choose Custom templates or System emails above. Only sent emails with the template that you chose above will be displayed here.

Filter by recipient

Type a desired recipient's email address. Only sent emails with the recipient's email address that you typed will be displayed.

If an email has only one recipient, the relevant information is displayed directly in the row, so the **Download** button for the deliverability report is not shown. If the button *does* appear for a single-recipient email, it indicates a processing error. Download the deliverability report to view complete information on the error.
