Change your site's language in legacy Video Portal

Content updated: 12/02/2024

This article is designated for all users.

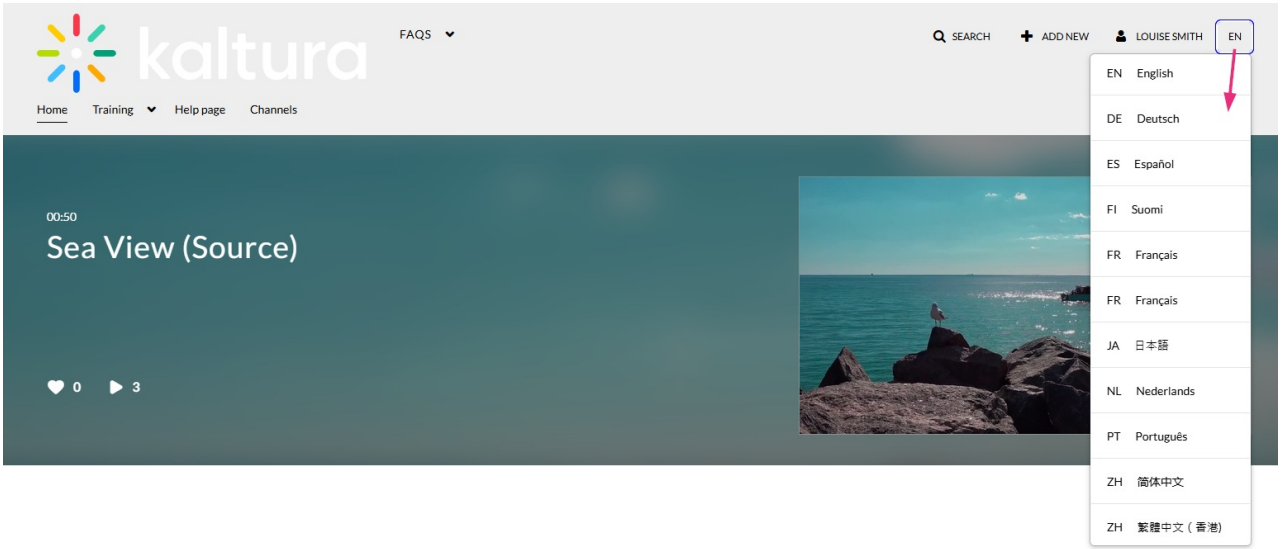

About

In the legacy Video Portal, you can choose the language used for menus, navigation, and other interface text. The languages available depend on your site's configuration.

For a list of supported languages, see Supported languages in Kaltura applications.

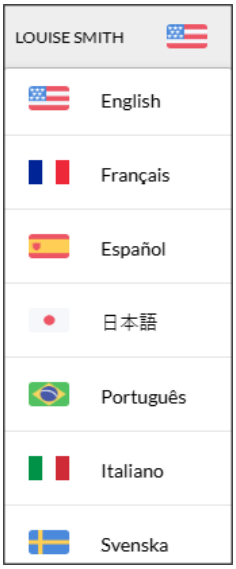

Change your site's language

In the upper-right corner of the legacy Video Portal, click the language selector and choose your preferred language from the dropdown.

Depending on your site's configuration, the selector displays a flag:

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

Or it displays a two-letter language code:

The interface displays in the selected language. Your choice is saved in a browser cookie and remains active until the cookie is cleared.

If the language you need is not listed, contact your site administrator. Administrators can add and customize languages in the Languages module.
