About

The **Share module** controls the **Share** button on media pages, where users can share media with a link, by email, or on social networks. You can choose which share options appear, and whether the **Share** button appears at all.

When users click **Share**, the **Share** window opens with the available options.

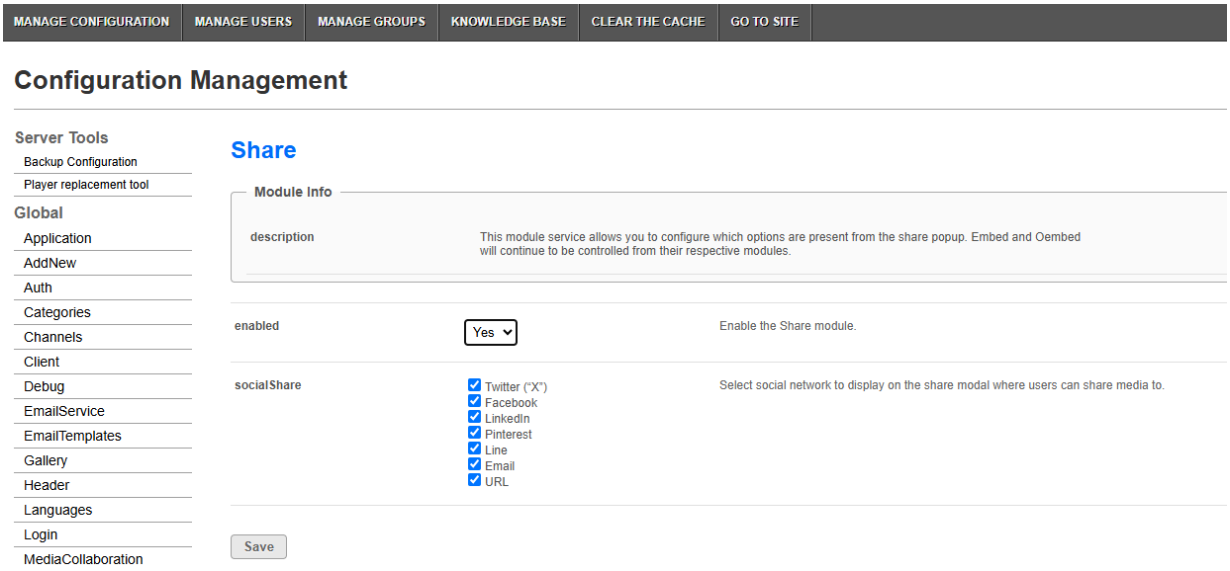

- The **Share** window can also include options that aren't set in this module:
  - **Embed code**: set in the Embed module
  - **Invite links** and **guest links**: set in the Invitetomedia module
- In an LMS integration, the share options don't apply, so the button is labeled **Embed** and only offers an embed code. It still only appears if this module is enabled.

Configure

1. Go to your Configuration Management console, locate the **Share** module in the left panel, then select it. You can also navigate directly using a link: `https://{your_site_url}/admin/config/tab/share`

The **Share** page displays.

2. Configure the following:

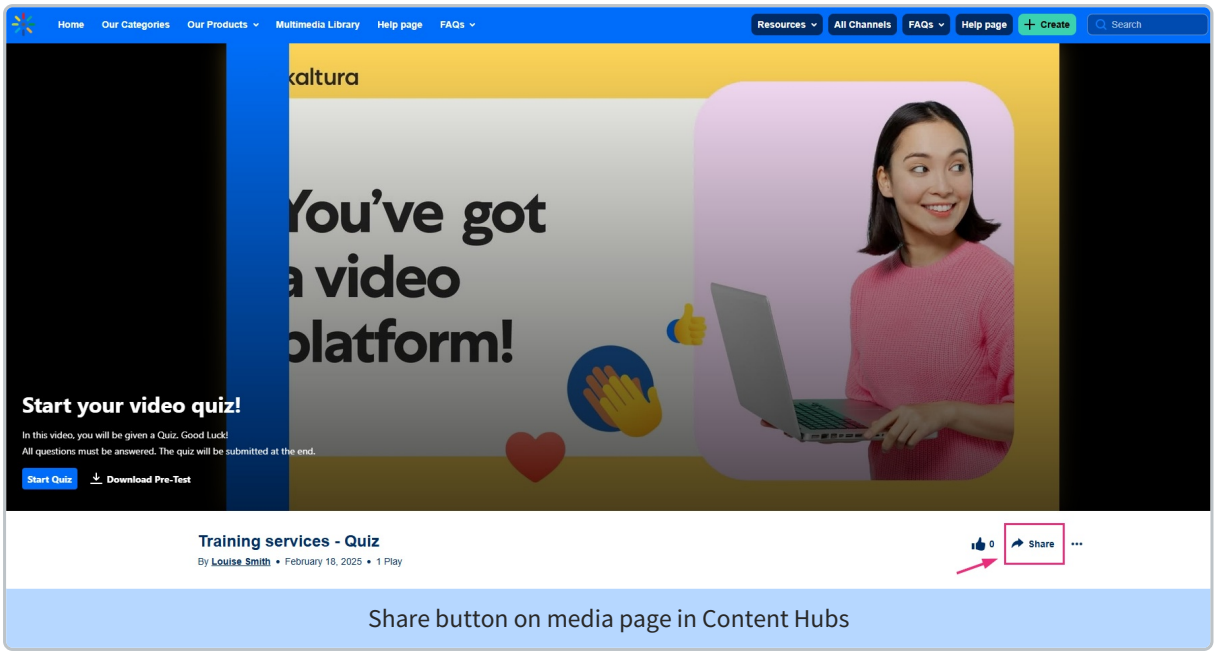

- **enabled** - Set to **Yes** to enable the module.
- **socialShare** - Select the share options available in the share window, including **URL** for copying a link to the media. Choose from the following options:
  - Twitter (X)
  - Facebook
  - LinkedIn
  - Pinterest
  - Line
  - Email
  - URL

> If you clear all the share options and the **Share** window has no other options, such as embed code, invite links, or guest links, the **Share** button is hidden.

3. Click **Save**.
