

Publish media in Canvas - Theming

Last Modified on 01/29/2026 2:24 pm IST

 This article is designated for all users.

About

All uploaded media is kept private by default (unless your administrator has set it up differently), when you are ready to share it with others, simply publish it.

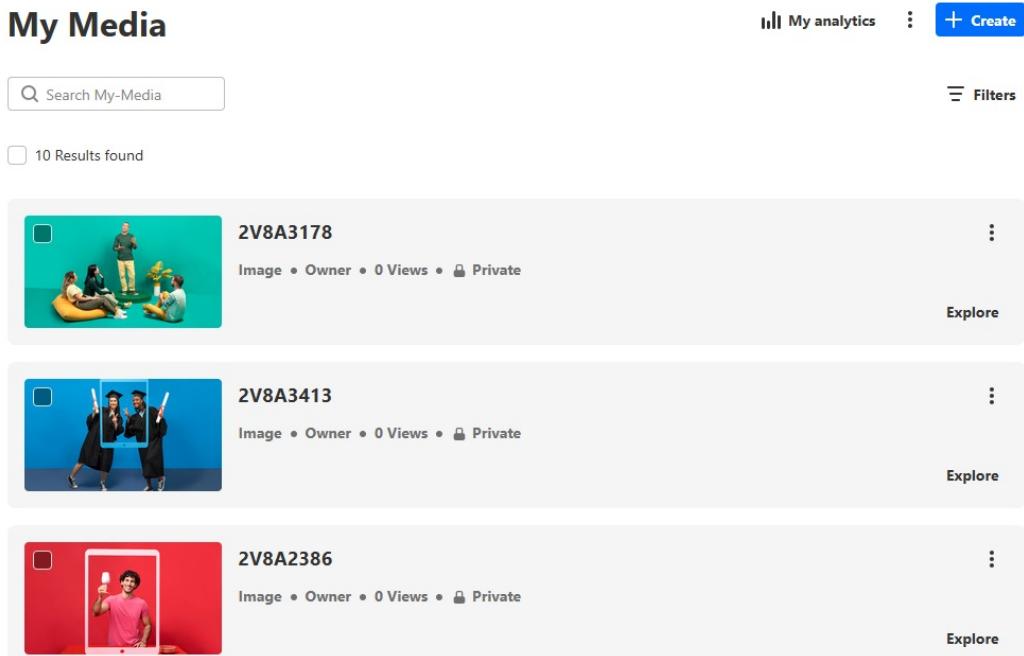

You must be the media owner or co-publisher to publish media.

The instructions below are for [Theming](#) users. If you don't have Theming enabled, please refer to our article 'Publish media'.

Publish from My Media

1. Navigate to your **My Media** page.

My Media

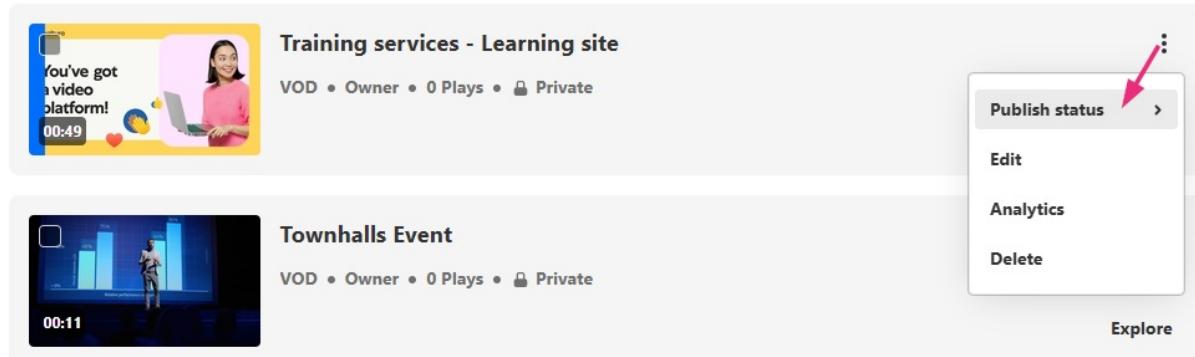

Search My-Media

10 Results found

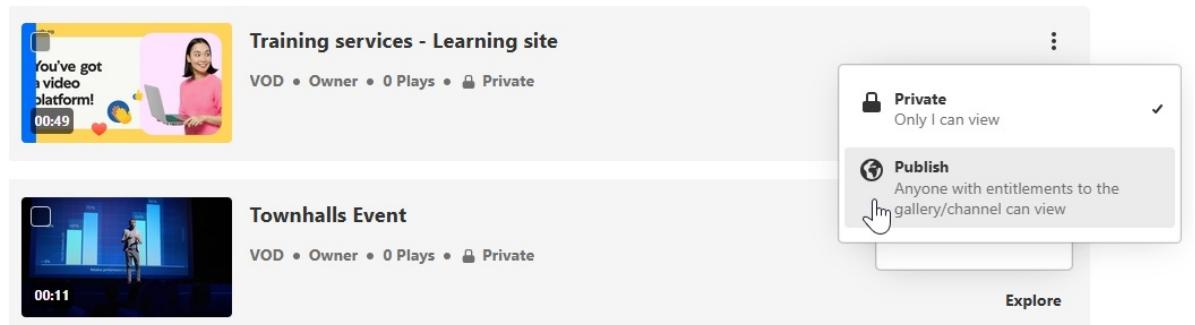

Media ID	Thumbnail	Details	Actions
2V8A3178		Image • Owner • 0 Views • Private	More (three dots) Explore
2V8A3413		Image • Owner • 0 Views • Private	More (three dots) Explore
2V8A2386		Image • Owner • 0 Views • Private	More (three dots) Explore

On the **My Media** page, locate the desired entry.

2. Click the **three dots** to the far right of the entry and select **Publish status**.

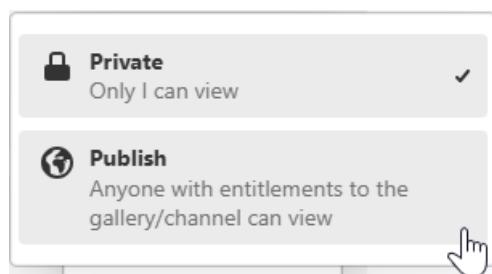

The **Publish status** options display: **Private** and **Publish**.

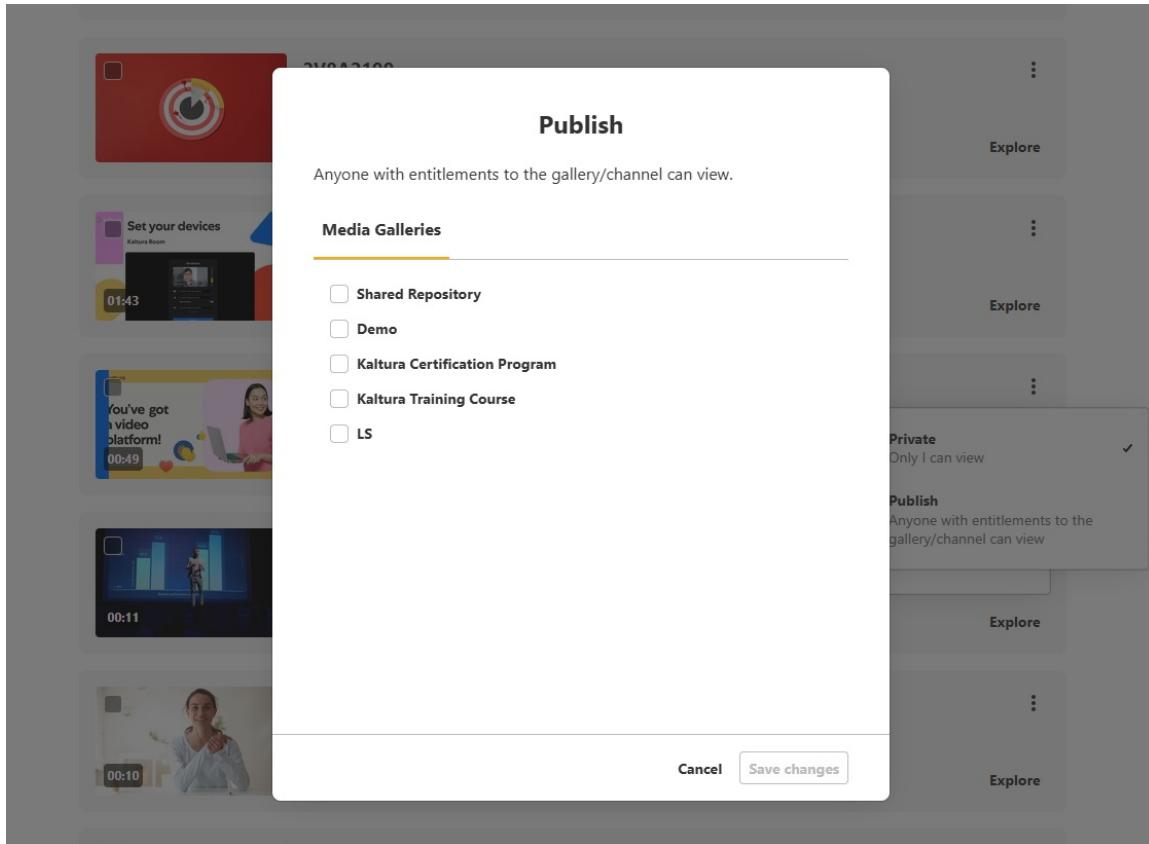

The **Publish** option will be grayed out if 'required' items have not been filled in. Required items can include metadata like tags and descriptions, set by your administrator in the [Metadata module](#), or required fields set by your administrator in the [Customdata module](#).

3. From the **Publish status** options, click **Publish**.

The **Publish** window displays.

The Publish window shows the available media galleries.

4. Check the box(es) next to the desired media galleries.

Note for Canvas users: When publishing media, the first 200 active courses appear in the course selector. If your course doesn't appear, open the course itself, go to its Media Gallery, and publish the media from there.
