

Publish media in Moodle (legacy)

 This article is designated for all users.

About

When you upload media, it's private by default and accessible only through **My Media**. From there, you can either grab the embed code for private media or choose to publish it, making it public in your **Media Gallery**.

Publishing media allows it to be publicly accessible to users. You can publish media:

- in any Media Galleries you are allowed to publish to.
- only after file conversion is complete and the media has passed moderation (if required).

The content in My Media is consistent across all Kaltura applications, and can be published and shared based on your permissions. If you can't publish media, contact your administrator for access.

These instructions apply to the legacy **LMS Video** integration. If you're using LMS Video with Theming, please refer to the [LMS Rich Media Extensions category](#).
