 This article is designated for all users.

About

My Media is your personal space for managing all the media you've uploaded or created over time. It's unique to each user, showing only your content, which remains private until you choose to publish it in one or more channels or courses. You can also collaborate by adding other users to your media.

With intuitive media cards, powerful search and filter options, and bulk actions, organizing and managing your content is effortless. Plus, you can access analytics, embed content, and easily manage everything according to your needs and permissions.

These instructions are for [Theming](#) users. If you don't have Theming enabled on your account, please see our article 'My Media'.

Access My Media

1. Go into your course.
2. On the left menu bar, click on **My Media**.

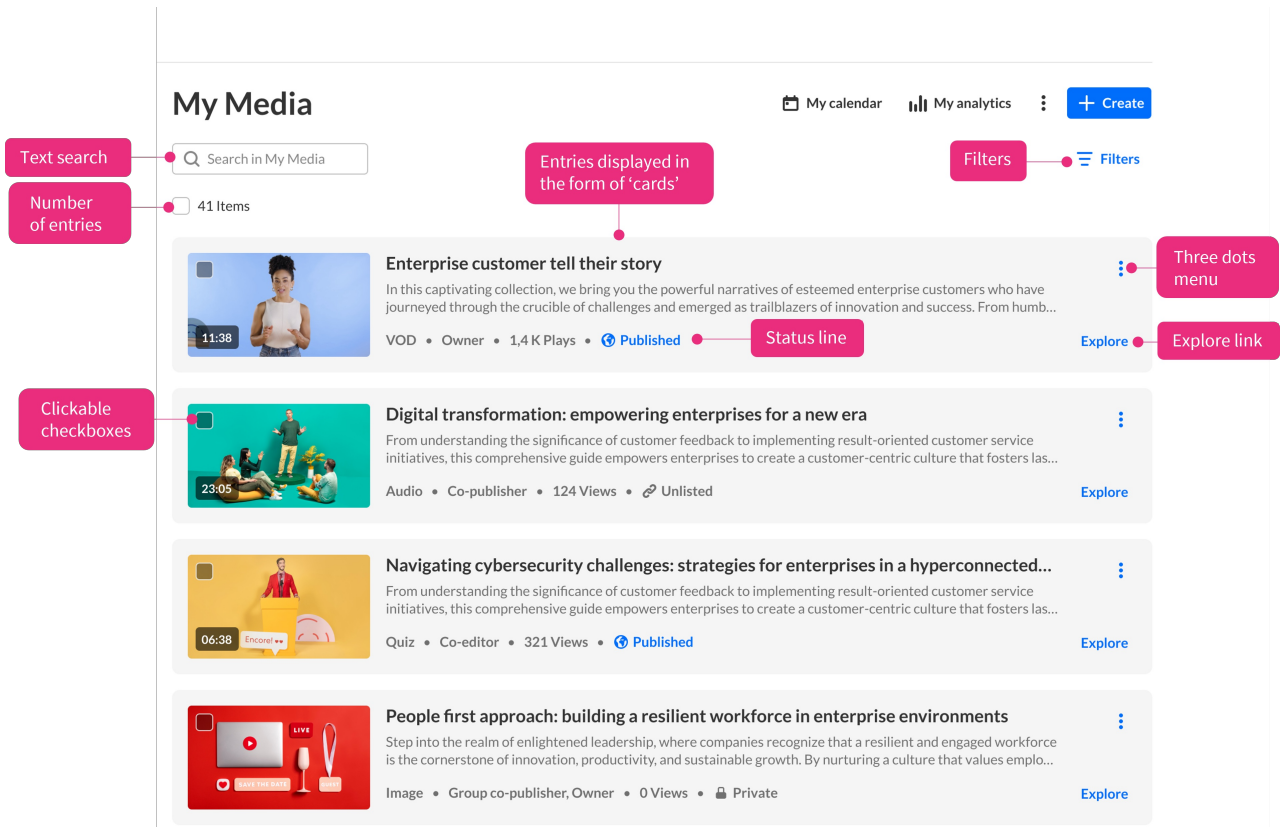

The My Media page displays. Media is displayed on this page if you have uploaded it or were added as a media collaborator.

The My Media link is typically located on the course navigation panel, as seen in our example. However, depending on your account setup, you may access My Media differently. See your Kaltura Administrator for further information.

If you haven't uploaded any media yet, check out our article 'Add Media' for instructions.
