

Create a video assignment in Brightspace

Last Modified on 05/26/2025 12:19 pm IDT

 This article is designated for faculty members.

About

Kaltura media assignments ensure the integrity of student submissions by preventing edits or deletions after submission. When a student submits a video, Kaltura clones it under a new username (`OriginalUserName_assignment`), ensuring the original remains unchanged. This prevents students from modifying or replacing their submission after the deadline.

The submitted video will not appear in **My Media**.

This feature is enabled and configured in the [Browseandembed module](#).

Create a media assignment

1. On the Brightspace homepage, locate your course in one of the following ways:
 - Select the course tile under the **My Courses** widget.
 - Click the **Course Selector grid** and select the course from the drop-down menu. If you are enrolled in more than 20 courses, you can search for the course name using the search bar.
2. Create your assignment, and from the editor toolbar, select the **Insert stuff** icon.

Description

The image shows a rich text editor toolbar. The 'Insert Stuff' icon, which consists of a square with a play button and a document icon, is highlighted with a red square and a red arrow pointing to it from above. Other icons in the toolbar include bold, italic, underline, text color, background color, bulleted list, numbered list, link, unlink, insert video, insert image, and a plus sign for more options. Below the toolbar is a large empty text area.

3. In the **Insert Stuff** window, scroll down and select the **Kaltura** option (this may be labeled differently at your institution, such as 'Kaltura Media' or another custom name).

The embed window opens.

4. Select the **Embed** button next to the media you want to embed. You can also use the search bar and filters to quickly find the media you need.

If you would like to upload or create new media, see [Add new media](#) below.

 If you see a **gear icon** next to the **Embed** button, that means you can modify the video's settings before embedding it. See [Customize your video settings](#) below.

After selecting **Embed**, a window will display allowing you to preview the video selected.

6. Select **Update** below the editor to save your changes.

Add new media

Need to upload or record a new video? Use one of the options in the **Add New** menu:

- **Upload** (Visit our article [Upload media](#) for guidance.)

- **Express Capture** (Visit our article [Express Capture](#) for guidance.)
- **YouTube** (Visit our article [Add a YouTube video](#) for guidance.)
- **Kaltura Capture** (Visit our article [Kaltura Capture](#) for guidance.)

Customize your video settings

To customize your video before submitting, click the **settings icon** next to the media you want to embed.

1. Choose from the available options:

- **Choose player:** Choose from pre-configured players. Your administrator defines the available players.
- **Max embed size:** Set the maximum display size of the embedded video. The default size in Canvas is 1200x720, but you can adjust it to fit your layout and design preferences.
- **Thumbnail embed:** Display a static preview image instead of loading the full video player immediately. This helps improve page load speed and gives users control over when to play the video.
- **Save these settings as default:** Enable this option to apply your selected embed

settings automatically to future media embeds, streamlining the process for repeated use.

2. Enable the **Submit as Assignment** toggle button to embed the media as an assignment.

The screenshot shows the 'Embed Settings' interface. At the top left is a 'Back' link, and at the top right is a blue 'Embed' button with a code icon. Below the header, the 'Embed Settings' section contains several options: 'Choose Player' is a dropdown menu set to 'V7 player'; 'Max Embed Size' is a dropdown menu set to '608x342'; 'Thumbnail Embed' is a toggle switch currently turned off; 'Set as my default settings for media type: Video' is a checked checkbox; and 'Submit as Assignment' is a toggle switch that is turned on, with a red arrow pointing to it.

3. Click **Embed** at the top-right corner.

Your video will appear in the assignment text editor.

- What are the defining characteristics of the Paleolithic, Mesolithic, or Neolithic periods?
- How did early humans adapt to their environments during this time?
- What significant discoveries or developments influenced human civilization?
