

Create a Kaltura media assignment in Moodle

Last Modified on 05/25/2025 2:47 pm IDT

 This article is designated for faculty members.

About

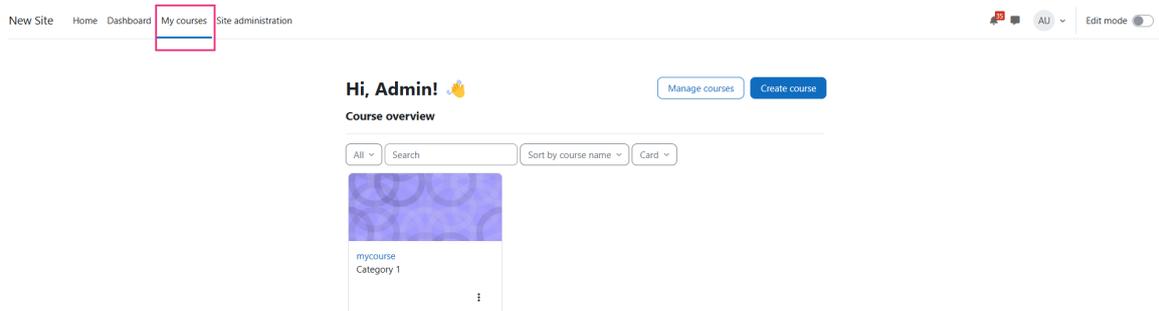

Kaltura media assignments ensure the integrity of student submissions by preventing edits or deletions after submission. When a student submits a video, Kaltura clones it under a new username (OriginalUserName_assignment), ensuring the original remains unchanged. This prevents students from modifying or replacing their submission after the deadline.

The submitted video will not appear in **My Media**.

 For instructions on setting up this feature, please see our article [Set up Kaltura's media assignment tool for Moodle](#).

Create a media assignment

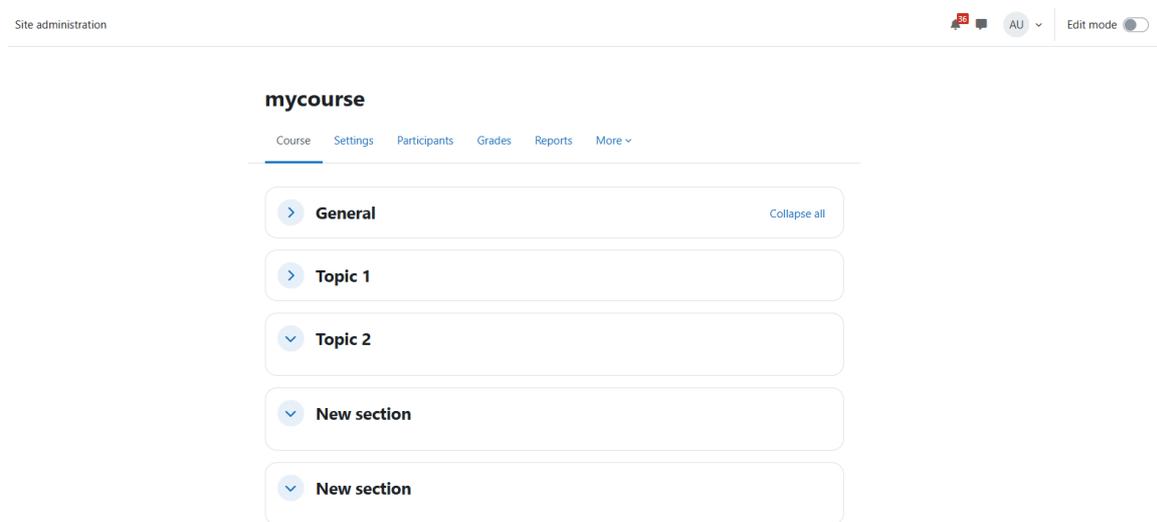

1. Open the **My courses** page.

2. Click on the course where you want to create the assignment.

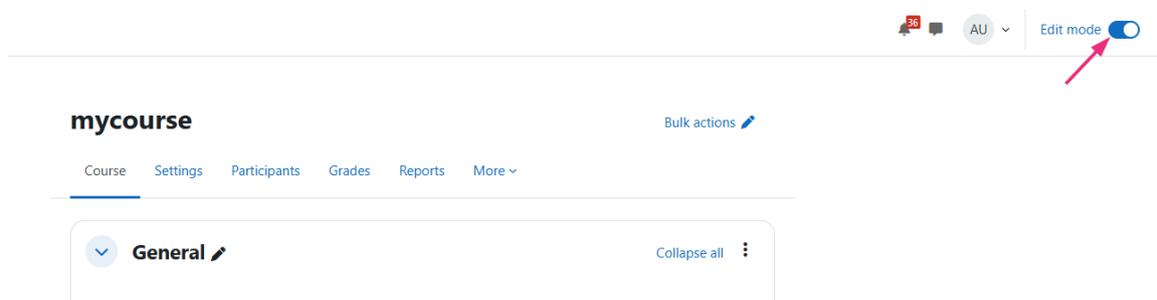

The course page displays.

Your course page may look different from the example shown, depending on its structure (e.g., organized by topic, date, or other formats).

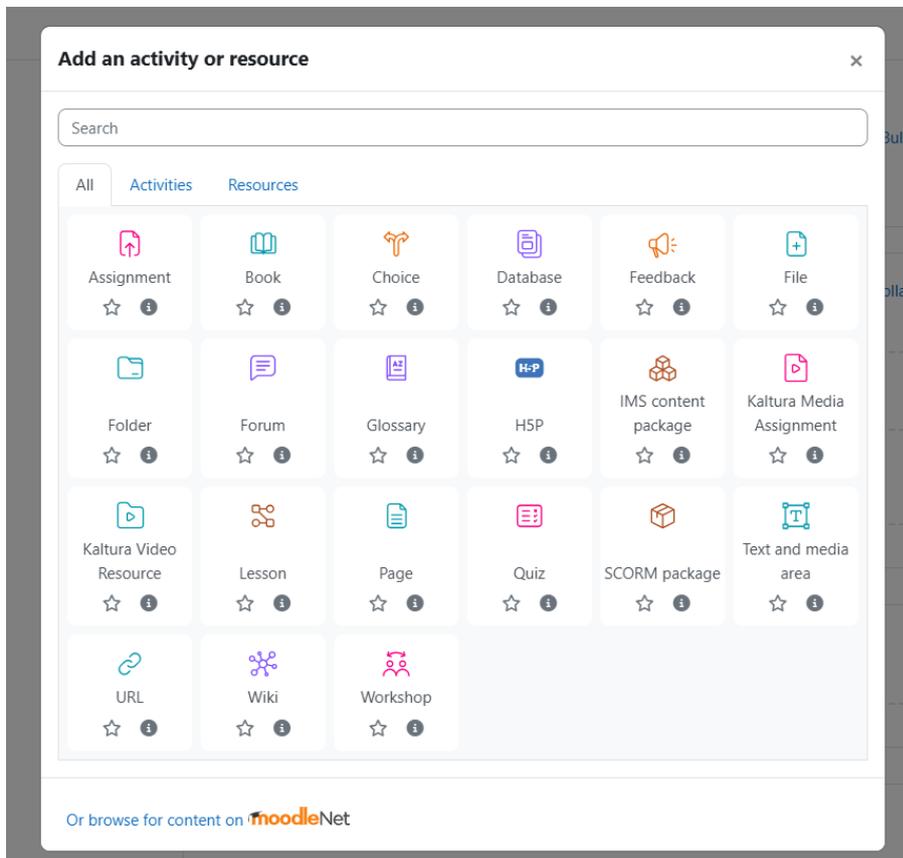

3. At the top right of the page, click **Edit mode** to enable it.

4. Locate the section where you want to add the assignment and click **+Add an activity or resource**.

A window displays with the available activities and resources.

5. Click **Kaltura Media Assignment**.

6. Enter a name and add a description, including any media if needed.
7. Configure the rest of the settings as you would for any other assignment. For more details on assignment settings, visit [Moodle's assignment settings page](#).
8. Click **Save and return to course**.

Your new assignment displays in the course.

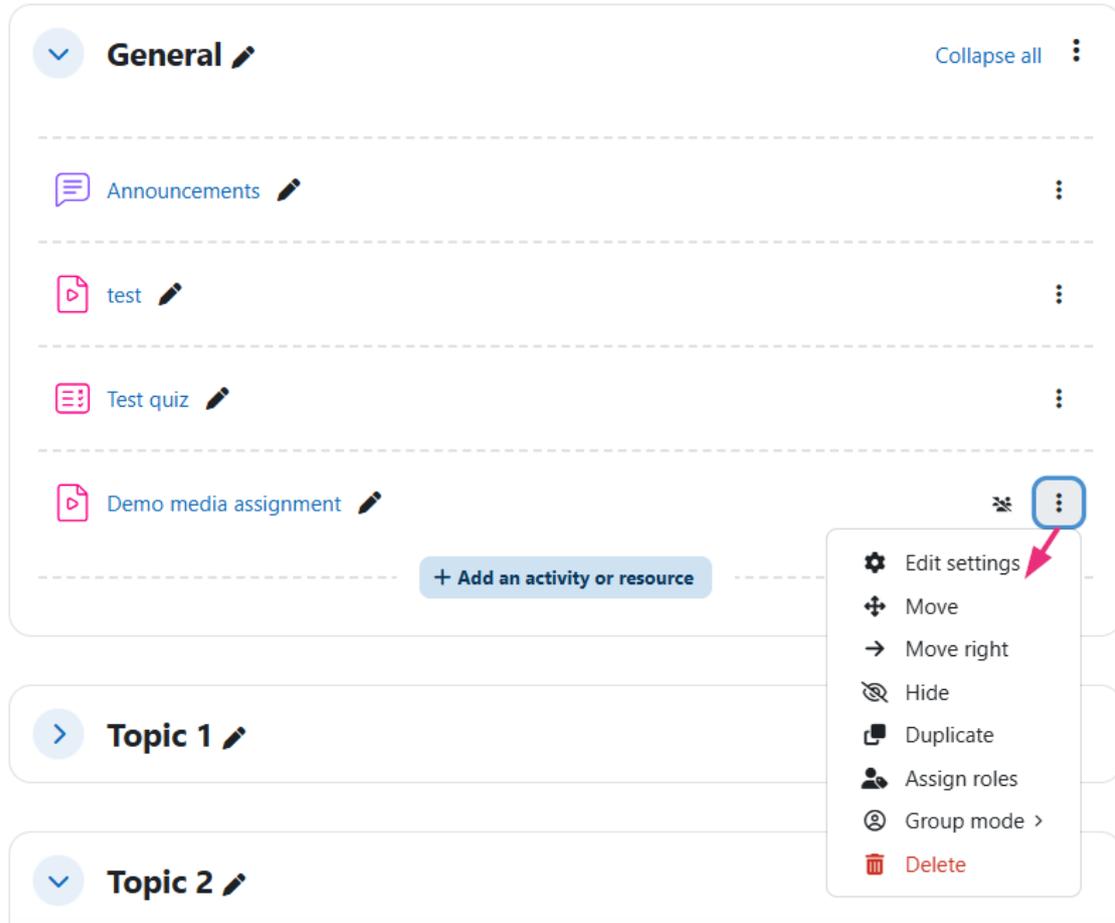

The screenshot shows the Moodle course interface. At the top, the course name "mycourse" is displayed on the left, and "Bulk actions" with a pencil icon is on the right. Below this is a navigation bar with links for "Course", "Settings", "Participants", "Grades", "Reports", and "More". The main content area is titled "General" and contains a list of activities: "Announcements", "test", "Test quiz", and "Demo media assignment". The "Demo media assignment" is highlighted in yellow. At the bottom of the list is a button that says "+ Add an activity or resource".

Now students can submit videos, and you can review, assess, and grade them based on your assignment settings.

Edit an existing media assignment

If you need to update the assignment after publishing:

1. Find the assignment on your course page.
2. Ensure Edit mode is on (see [step 3 above](#)).
3. Click the **three-dot menu** next to the assignment and select **Edit settings**.

The screenshot shows the 'mycourse' interface. The 'General' section is expanded, showing a list of activities: Announcements, test, Test quiz, and Demo media assignment. A context menu is open over the 'Demo media assignment' activity, listing options: Edit settings, Move, Move right, Hide, Duplicate, Assign roles, Group mode, and Delete. A red arrow points to the 'Edit settings' option. Below the activities is a button labeled '+ Add an activity or resource'. The 'Topic 1' and 'Topic 2' sections are partially visible below.

When you're done editing, click **Save and return to course.**
