

# Embed Kaltura media in Canvas

Last Modified on 05/03/2026 12:15 pm IDT

 This article is designated for all users.

## About

The Browse, Search, and Embed (BSE) tool lets you search My Media, Media Gallery, Shared Repository, and playlists, then embed media directly in rich-text areas like Assignments, Forums, and course pages in Canvas.

While BSE-embedded content is viewable in the **Canvas mobile app**, the BSE (Browse and Embed) tool itself might not be supported the same way as other LTI tools. We recommend opening Canvas in a web browser on desktop or mobile to use BSE.

This feature requires the following to be enabled:

- [Browseandembed module](#)
- [Theming module](#) with the '[browseandembed](#)' feature set to 'Yes'

## Access Kaltura media

1. Navigate to the area where you want to embed media, such as Announcements, Discussions, or Assignments.
2. Click the button to create a new post.  
The rich-text editor opens.
3. Enter your text and then click the **Embed Kaltura Media icon**.

On smaller screens, the **Upload**, **Express Capture** and **YouTube** tools are grouped under the **+Create** button.

If you're new to Theming, you might notice that the **+ Create** menu has fewer options than the non-Theming version (**Add New** menu) - this is by design. Theming keeps things quick and simple for uploading or capturing content and embedding it right away!

## Browse, search and embed media

### Browse and search

In the embed window, you can browse and search existing media across different repositories. You can also create or upload new media. See [Add new media](#) below.

- **My Media** - Your personal uploaded media.
- **Media Gallery** - By default, shows media from the current course's Media Gallery. If enabled by your administrator, you can also search and embed media from any Media Gallery you own.
- **Shared Repository** - Institution-wide shared media (if enabled by your administrator).
- **Playlists** - Media Gallery playlists available in the current course (if enabled by your administrator).

You can embed audio files using Kaltura's [audio player](#). The player is available in the list of player options in the customize embed settings (see [below](#)).

**Mandatory captions before embedding** - If your admin has enabled the 'Captions Required' setting, certain media types (like video, audio, or quizzes) must have [captions](#) in order to be embedded. Items without captions will appear with grayed-out buttons, and a message at the top of the embed window will explain why the items are unavailable.

You can use the **search bar** and **filters** to locate content. Searching playlists is limited to text-based fields such as name, description, and tags.

## Embed Kaltura Media ×

**My Media** **Media Gallery**

[Filters](#)[Upload](#) [Express Capture](#) [YouTube](#)

Name	Type	Tags	Created at	
 01:35 A fireside chat (Source).mp4	Video		November 20, 2025	  <a href="#">Embed</a>
 00:06 122855804126_(Source).mp4	Video		July 04, 2025	  <a href="#">Embed</a>

If **Folders** are enabled on your account, a **My folders** option appears in the filters. You can use it to view only the media stored in a specific folder. Folder selections apply only to your current session.

## Embed Kaltura Media

×

To preview more details, click the **eye icon** next to a media item. The sidebar will display:

- a playable preview (if available)
- media details (title, tags, duration, etc.)
- publishing locations

## Add new media

Need to upload or record a new video? Use one of the options at the far right:

- **Upload** - Upload one or more files. Wait for uploads to finish before clicking Save and Select. Visit our article **Upload media** for guidance.
- **Express Capture** - Record directly from your webcam. Visit our article [Create a recording with Express Capture](#) for guidance.
- **YouTube** - Link to a YouTube video. Visit our article [Add a YouTube video](#) for guidance.

Once the upload is complete, click the settings icon to adjust embed options (see [Customize embed settings](#)).

If your administrator has required metadata fields (such as tags or descriptions), you must complete them before embedding.

## Embed

1. In the Embed Kaltura Media window, locate the media you want to insert and click **Embed**.

Name	Type	Created at	Tags
 11:38 Future-ready skills	VOD	May 9, 2024	Skills Learning +2   <b>Embed</b>

The **Customize Embed** window opens.

### Customize Embed

**Select a Player**  
Select from predefined player styles.

Player with library logo

**Select video display size**  
Choose the maximum size; the video adjusts for smaller screens.

608 x 402

**Thumbnail embed**  
Show a preview image before loading the player to improve load time.

Off

**Video time selection**

Start video at 01:12

Save these settings as defaults for videos

Future-ready skills

**Embed**

2. To proceed without changes, click **Embed** in the lower right. To customize the settings first, refer to the instructions [below](#).

Front Page

Edit View Insert Format Tools Table

12pt Paragraph **B** *I* U   T<sup>2</sup>                           

when to play the video.

Enabling or disabling this option will also update the preview in real time.

**Video time selection** - You can share the video from a specific time. Choose 'Start video at' and enter the time according to the format given (00.00). For example, if you want a video to start at 1 minute and 30 seconds into the video, enter 01.30

**Save these settings as default** - Enable this option to apply the same settings automatically to future embeds of this media type.

BackEmbed

When you change a setting, the preview updates automatically.

Once you're ready, click **Embed**. Your media will appear in the editor.

## Note about embedding YouTube videos

If you add a YouTube video and see an error, the video owner may have disabled embedding on other websites. You can confirm this by checking the video's Share → Embed option on YouTube.

If you see a message such as, *Video unavailable: Playback on other websites has been disabled by the video owner*, this means the video can't be embedded or played in Kaltura.

If a video previously worked, the video owner may have recently changed its privacy or

embed settings.

**Video unavailable**

Playback on other websites has been disabled by the video owner
