

Embed Kaltura media in Brightspace - Theming

Last Modified on 06/14/2025 7:06 pm IDT

 This article is designated for faculty members.

About

The new Theming-based embed tool (BSE) provides a great way to search for and embed media from My Media, Media Gallery, Playlists, and Shared Repository directly into rich-text areas such as Announcements, Discussions, and Assignments.

This article pertains to Browse, Search, and Embed (BSE) with the new Theming-based experience. If you don't have [Theming](#) enabled, visit our article 'Embedding Kaltura media'.

The tool is configured by your system administrator in the [Browseandembed module](#) in the Configuration Management console. The [Theming module](#) must also be enabled, along with the **browseandembed** feature within it.

Open the rich-text editor

1. Navigate to the area where you want to embed media, such as Announcements, Discussions, or Assignments.
2. Click the button to create a new post.
The rich-text editor opens.
3. Enter your text and then click the **Embed Kaltura Media icon**.

Welcome students!

I am so very excited to be teaching this course, it is one of my favorite topics and I often see a tremendous amount of growth in my students during even one term!

To get us started, I recorded this brief welcome message, I am looking forward to meeting all of you!

Enjoy!

Browse, search and embed media

Browse and search

In the embed window, you can browse and search existing media across different repositories:

You can also embed audio files using Kaltura's updated [Audio Player](#) (v7). The player is available in the list of player options in the customize embed settings (see [below](#)).

- **My Media** - Your personal uploaded media.
- **Media Gallery** - By default, shows media from the current course's Media Gallery. If enabled by your administrator, you can also search and embed media from any Media Gallery you own.
- **Shared Repository** - Institution-wide shared media.
- **Playlists** - Media Gallery playlists available in the current course (if enabled by your administrator).

Searching playlists is limited to text-based fields such as name, description, and tags.

If you're embedding a playlist, it will appear as a single embedded block containing all items in the order they were arranged in the Media Gallery playlist.

Customize embed settings

The **Customize Embed** option may not be available in all environments. This feature must be enabled by your administrator in the [Browseandembed module](#).

When embedding media, you can configure various settings to control how the video appears and plays. The available options include:

Select a player: Choose from pre-configured players that may have different features, such as captions, interactivity, or playback controls. Your administrator defines the available players.

When you change the selected player, the preview updates automatically to reflect your choice.

Select media embed size: Set the maximum display size of the embedded media. Your administrator defines the available embed sizes.

Thumbnail embed: Display a static preview image instead of loading the full video

player immediately. This helps improve page load speed and gives users control over when to play the video.

Enabling or disabling this option will also update the preview in real time.

Save these settings as default: Enable this option to automatically apply your selected embed settings to future media embeds of the selected media type (VOD, Audio, Playlist, etc.), streamlining the process for repeated use.
