

# Embed Kaltura media in Moodle

Last Modified on 05/03/2026 12:15 pm IDT

 This article is designated for all users.

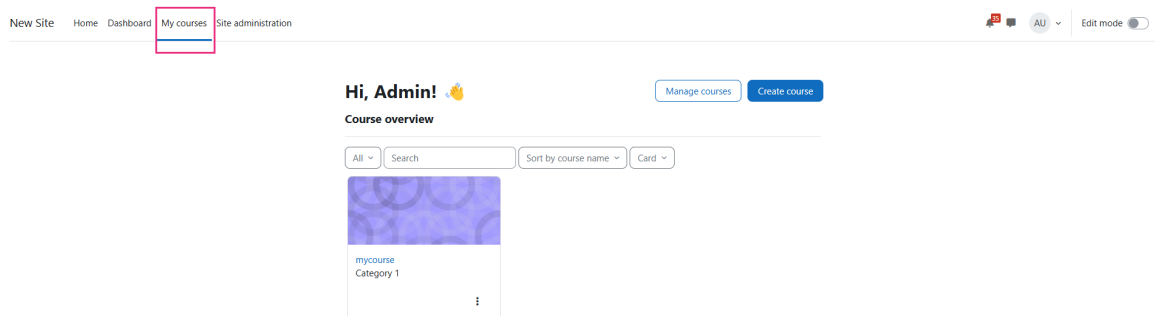

## About

The Browse, Search, and Embed (BSE) tool lets you search My Media, Media Gallery, Shared Repository, and playlists, then embed media directly in rich-text areas like Assignments, Forums, and course pages in Moodle.

You can use the same steps shown here whether embedding into an assignment description, a forum post, or another area that uses Moodle’s rich-text editor.

## Open the rich-text editor in Moodle

1. Open the **My courses** page.

2. Click on the course where you want to embed your media.

The course page displays.

**mycourse**[Course](#) [Settings](#) [Participants](#) [Grades](#) [Reports](#) [More](#) ▾

> **General** Collapse all

> **Topic 1**

> **Topic 2**

> **New section**

> **New section**

Your course page may look different from the example shown, depending on its structure (e.g., organized by topic, date, or other formats).

3. At the top right of the page, click **Edit mode** to enable it.

**mycourse**[Bulk actions](#) [Course](#) [Settings](#) [Participants](#) [Grades](#) [Reports](#) [More](#) ▾

> **General** Collapse all

4. Locate the section where you want to add the content and click **+Add an activity or resource**.

[Course](#) [Settings](#) [Participants](#) [Grades](#) [Reports](#) [More](#) ▾

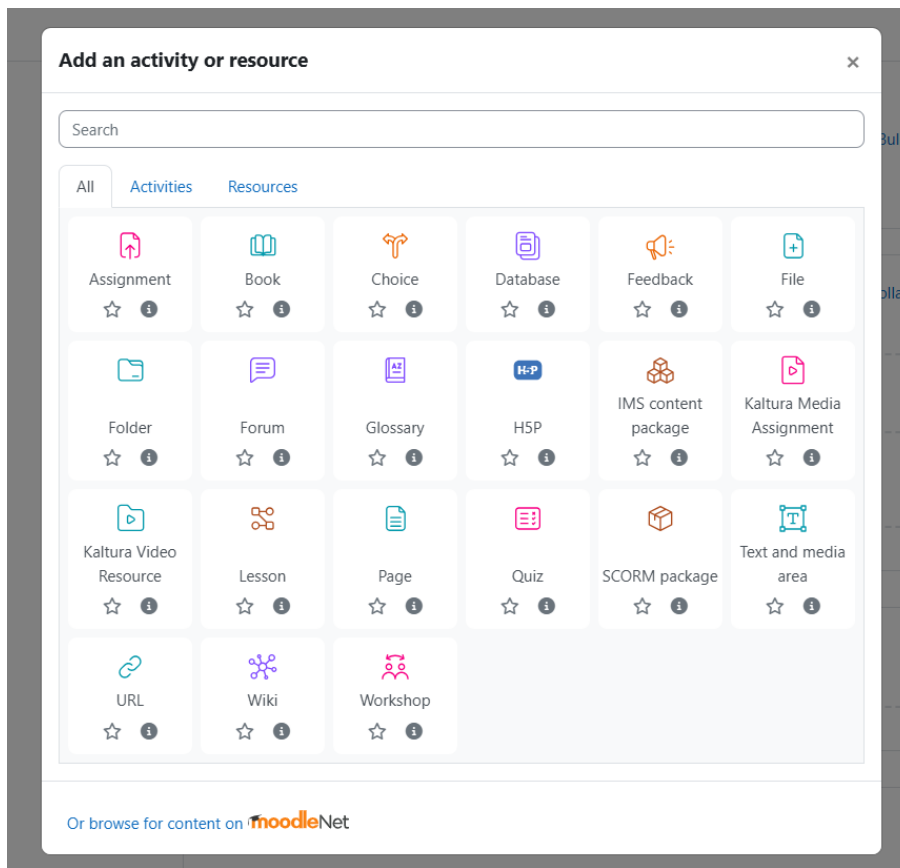

> **General** Collapse all

**Announcements**

**test**

[+ Add an activity or resource](#)

A window displays with the available activities and resources.

5. In the window that opens, select the activity or resource where you want to embed your media (for example, **Assignment**).

## Add an activity or resource

In the Description field (or another rich-text area), click the **Kaltura Media icon**.

The Embed Kaltura Media window opens.

## About the Kaltura media window

Your window may look different depending on how many columns your admin has configured.

Available columns include **ID**, **Type**, **Tags**, **Plays**, **Views**, **Created At**, and **Updated At**. The columns are configured in the [Browseandembed module](#).

Embed

On smaller screens, the **Upload**, **Express Capture** and **YouTube** tools are grouped under the **+Create** button.

If you're new to Theming, you might notice that the **+ Create** menu has fewer options than the non-Theming version (**Add New** menu) - this is by design. Theming keeps things quick and simple for uploading or capturing content and embedding it right away!

## Browse, search and embed media

### Browse and search

In the embed window, you can browse and search existing media across different repositories. You can also create or upload new media. See [Add new media](#) below.

- **My Media** - Your personal uploaded media.
- **Media Gallery** - By default, shows media from the current course's Media Gallery. If enabled by your administrator, you can also search and embed media from any Media Gallery you own.
- **Shared Repository** - Institution-wide shared media (if enabled by your administrator).
- **Playlists** - Media Gallery playlists available in the current course (if enabled by your administrator).

You can embed audio files using Kaltura's [audio player](#). The player is available in the list of player options in the customize embed settings (see [below](#)).

**Mandatory captions before embedding** - If your admin has enabled the 'Captions Required' setting, certain media types (like video, audio, or quizzes) must have [captions](#) in order to be embedded. Items without captions will appear with grayed-out buttons, and a message at the top of the embed window will explain why the items are unavailable.

You can use the **search bar** and **filters** to locate content. Searching playlists is limited to text-based fields such as name, description, and tags.

## Embed Kaltura Media ×

If **Folders** are enabled on your account, a **My folders** option appears in the filters. You can use it to view only the media stored in a specific folder. Folder selections apply only to your current session.

## Add new media

Need to upload or record a new video? Use one of the options at the far right:

- **Upload** - Upload one or more files. Wait for uploads to finish before clicking Save and Select. Visit our article [Upload media](#) for guidance.
- **Express Capture** - Record directly from your webcam. Visit our article [Create a recording with Express Capture](#) for guidance.
- **YouTube** - Link to a YouTube video. Visit our article [Add a YouTube video](#) for guidance.

 Enterprise customer tell their story	VOD	May 9, 2024	<a href="#">Enterprise</a> <a href="#">Tag</a> <a href="#">+2</a> <span style="margin-left: 10px;"> </span> <span style="float: right;"><a href="#">Embed</a></span>

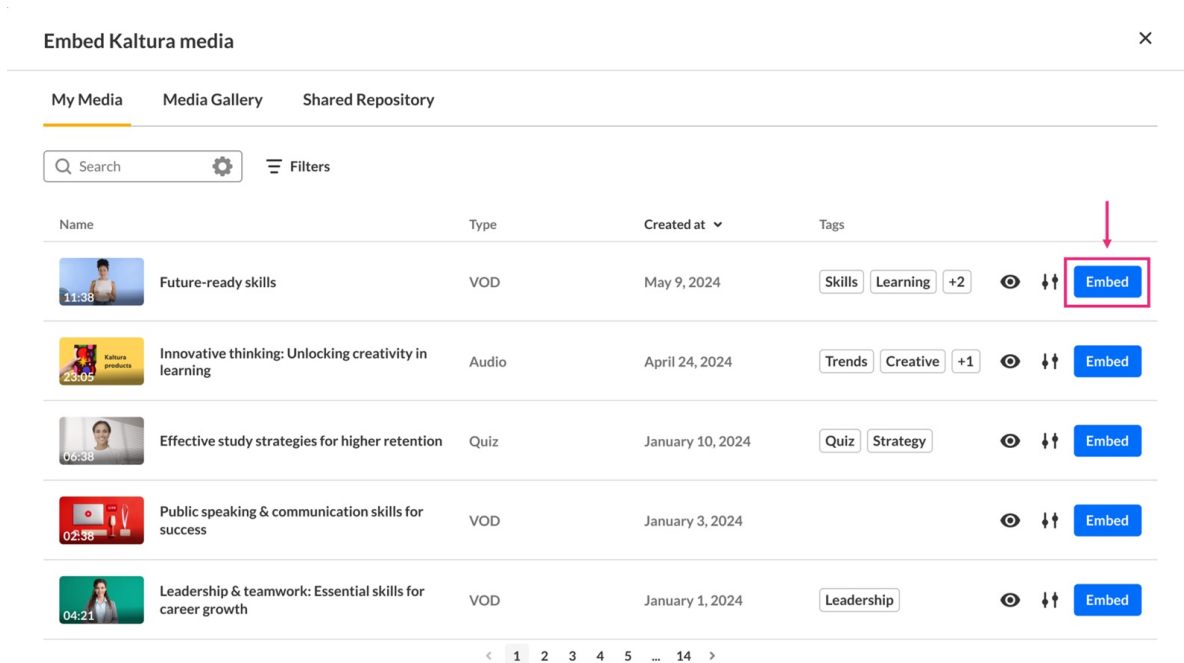

Once the upload is complete, click the settings icon to adjust embed options (see [Customize embed settings](#)).

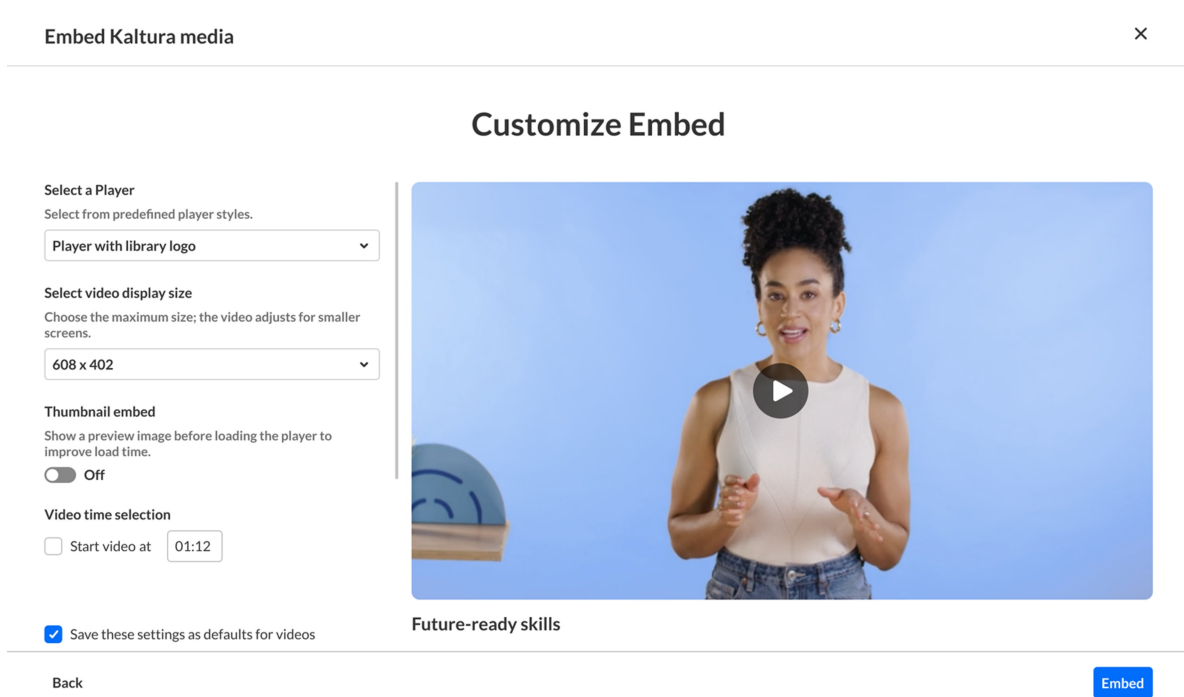

If your administrator has required metadata fields (such as tags or descriptions), you must complete them before embedding.

## Embed

1. In the Embed Kaltura Media window, locate the media you want to insert and click **Embed**.

The **Customize Embed** window opens.

2. To proceed without changes, click **Embed** in the lower right. To customize the settings first, refer to the instructions [below](#).

If you're embedding a **playlist**, it will appear as a single embedded block containing all items in the order they were arranged in the Media Gallery playlist.

## Customize embed settings

The **Customize Embed** option may not be available in all environments. This feature must be enabled by your administrator in the [Browseandembed module](#).

When embedding media, you can configure the following:

**Select a player** - Choose from pre-configured players set by your administrator.

When you change the selected player, the preview updates automatically to reflect your choice.

**Select video embed size** - Set the maximum display size of the embedded media. Your administrator defines the available embed sizes.

**Thumbnail embed** - Display a static preview image instead of loading the full video

player immediately. This helps improve page load speed and gives users control over when to play the video.

Enabling or disabling this option will also update the preview in real time.

**Video time selection** - You can share the video from a specific time. Choose 'Start video at' and enter the time according to the format given (00.00). For example, if you want a video to start at 1 minute and 30 seconds into the video, enter 01.30

**Save these settings as default** - Enable this option to apply the same settings automatically to future embeds of this media type.
