Rich Media CMSNG-2473	Prevent overriding entry adminTags when saving live settings

Rich Media CMS release Note January 15, 2023 7.10.0

Version: v7.10.0

Date Released: January 15, 2023

What's New

Webex integration - We are happy to announce our new App Hub integration with Webex - **Kaltura Sync**:

- With **Kaltura Sync**, you can publish Webex recordings across your organization to Kaltura. Through this integration, we automate workflows and save you time and extra work. Once the integration is set up, you can record sessions and they will be automatically uploaded to Kaltura.
- The integration is **self-served** and can be easily set up from the **integration tab in Rich Media CMS**. You can choose your categories and users, and opt in/out content based on groups.
- You can find our app on [Webex App Hub](#) and the [instructions for the integration setup](#).
- **Important:** Cisco is transitioning all customers to the new App Hub this year (for detailed timeline, see Cisco documentation - [Upcoming retirement of Site Administration management console](#)). Therefore, existing customers should update to the new Kaltura Sync App Hub integration. For more info please contact your

Rich Media CMS Release Notes January 1, 2023

Version: v7.9.0

Date Released: January 1, 2023

What's New

- **Brand new Studio!** - We are happy to launch Kaltura Player Studio for Player V7, replacing the TV platform studio, with improved UI and advanced players management capabilities:
 - Create and edit players
 - Players usage analytics
 - Bookmark favorite players
 - Player templates
 - Demo videos to showcase player capabilities
 - Advanced plugins configuration
 - Visuals and integrations
 - For more info visit [Kaltura Player Studio](#).
- **Share&embed:** Support V7 players for playlists - Admins can now share & embed v7 playlists.

Rich Media CMS Release Note November 6, 2022 v7.7.1

Version: v7.7.1

Date Released: November 6, 2022

Resolved Issues

SRT Broadcasting URLs

Primary URL:

Primary Stream ID:

Secondary URL:

Secondary Stream ID:

Encryption:

Set a passphrase to enable encryption

Set Automatically ▼

Generate Passphrase Encryption

Rich Media CMS Release Note March 27, 2022 v.7.3.0

Version: 7.3.0

Date Released: March 27, 2022

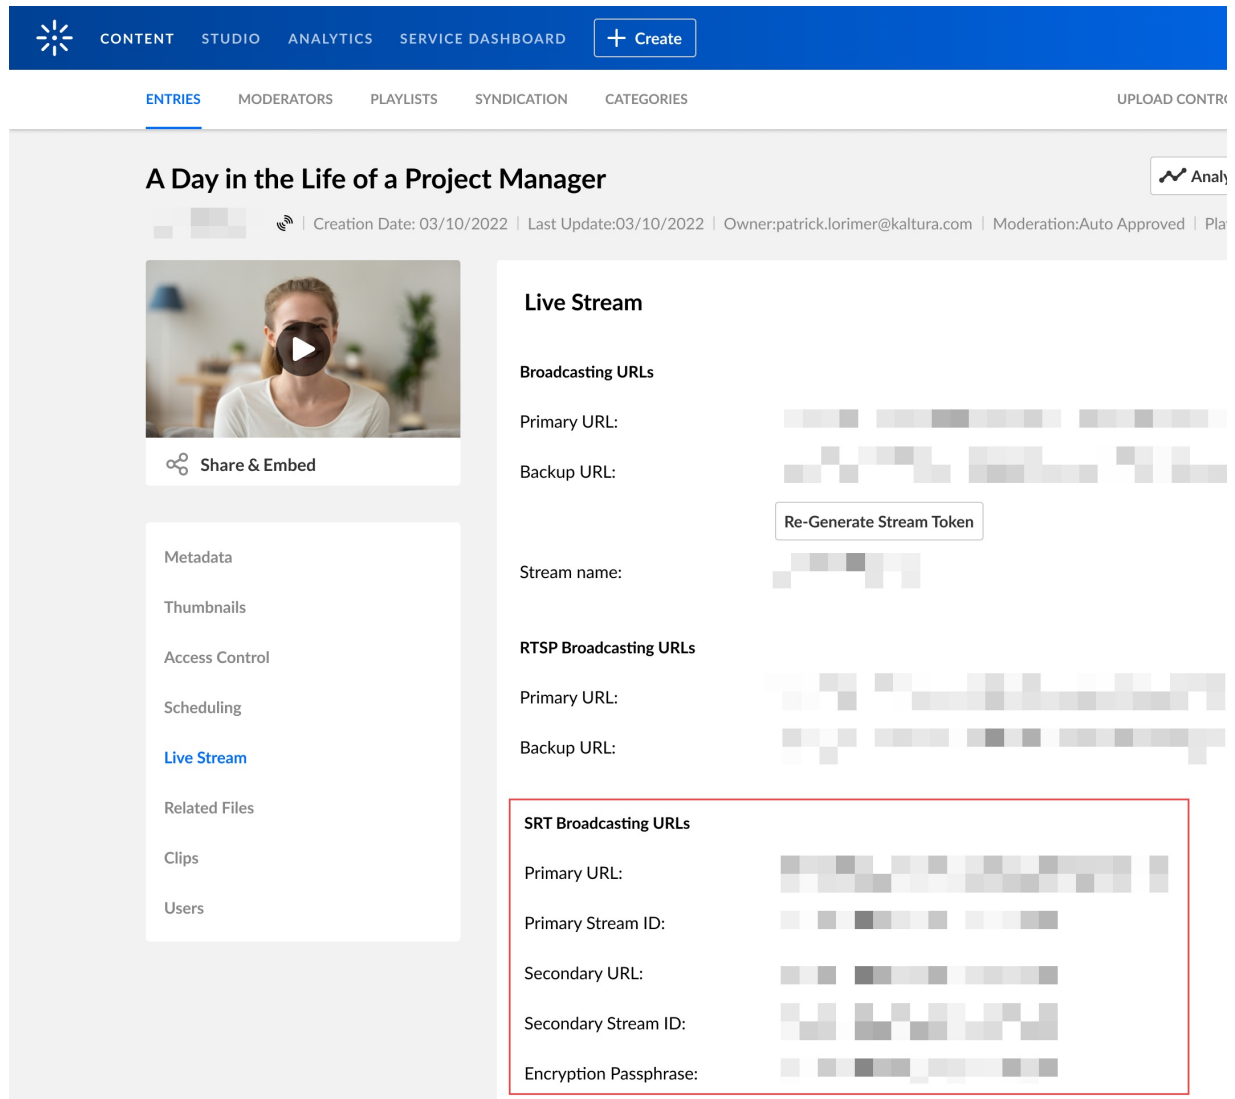

What's New

- **SSO Exclusion** - Admins can now manually exclude users from SSO login and enable login by username and password (configurable from the Add User/Edit User screens). Please see [SSO Exclusion](#) for more information.

Add User	Edit User
<p>Personal Details</p> <p>Login Email address * <input type="text"/></p> <p>First Name * <input type="text"/></p> <p>Last Name * <input type="text"/></p> <p>Account Specific Details</p> <p>Publisher User ID <input type="text"/></p> <p>User role <input type="text" value="Publisher Administrator"/></p> <p><small>Full control over publisher account and user management functionalities</small></p> <p><input checked="" type="checkbox"/> SSO user</p> <p><input type="button" value="Save"/></p>	<p>Personal Details</p> <p>Login Email address * <input type="text" value="test@gmail.com"/></p> <p>First Name * <input type="text" value="test"/></p> <p>Last Name * <input type="text" value="test"/></p> <p>Account Specific Details</p> <p>Publisher User ID <input type="text" value="test@gmail.com"/></p> <p>User role <input type="text" value="New Role"/></p> <p><input checked="" type="checkbox"/> SSO user</p> <p><input type="button" value="Save"/></p>

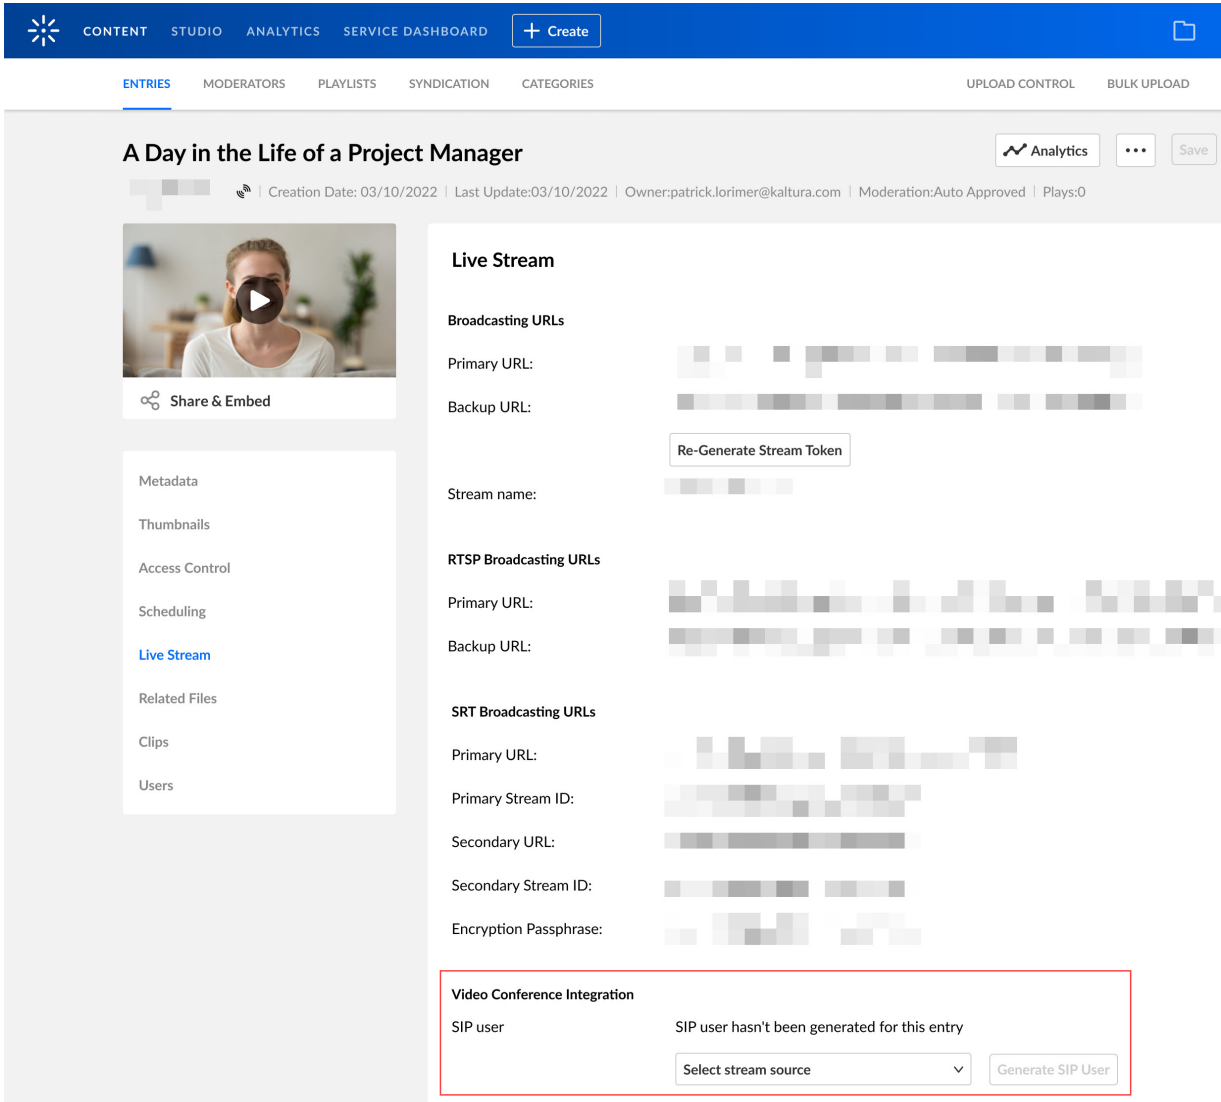

- **Live Stream Details for Secure Reliable Transport (SRT) Protocol** - The following SRT details have been added to the Live Stream tab: Primary and

Secondary URLs, Primary and Secondary Stream IDs, and Encryption Passphrase. See articles in our [Kaltura Live](#) knowledge base category for more information.

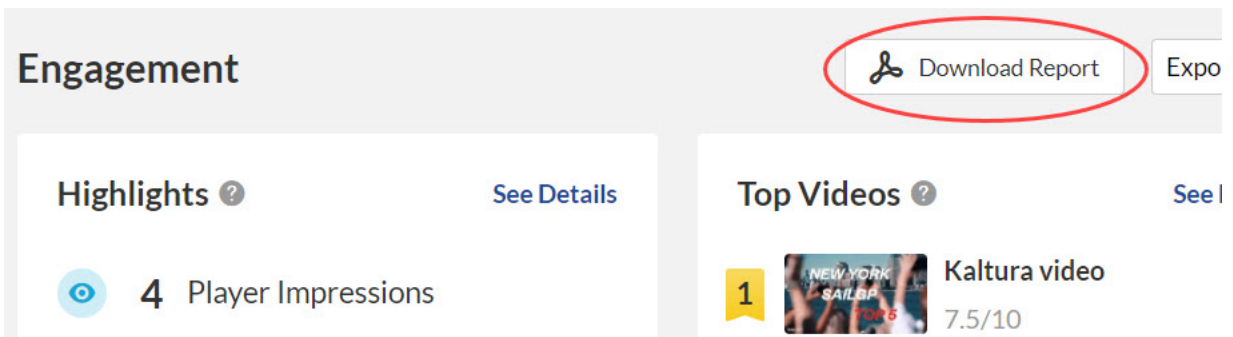

The screenshot shows the Kaltura interface for configuring a live stream. The top navigation bar includes 'CONTENT', 'STUDIO', 'ANALYTICS', 'SERVICE DASHBOARD', and a '+ Create' button. Below this, a secondary navigation bar lists 'ENTRIES', 'MODERATORS', 'PLAYLISTS', 'SYNDICATION', 'CATEGORIES', and 'UPLOAD CONTR'. The main content area is titled 'A Day in the Life of a Project Manager' and includes a video thumbnail with a play button and a 'Share & Embed' button. A metadata sidebar on the left lists 'Metadata', 'Thumbnails', 'Access Control', 'Scheduling', 'Live Stream' (highlighted), 'Related Files', 'Clips', and 'Users'. The 'Live Stream' configuration panel on the right is divided into three sections: 'Broadcasting URLs' (with Primary and Backup URLs and a 'Re-Generate Stream Token' button), 'RTSP Broadcasting URLs' (with Primary and Backup URLs), and 'SRT Broadcasting URLs' (with Primary URL, Primary Stream ID, Secondary URL, Secondary Stream ID, and Encryption Passphrase). The SRT section is highlighted with a red border.

- **Live SIP Generation** - Admins can now generate SIP users and select the stream source from the Live Stream tab. An SIP user can be added to a video conferencing software to broadcast your call. See [Kaltura Video Conference Integration Overview](#) for more information.

The screenshot shows the 'Live Stream' configuration page for an entry titled "A Day in the Life of a Project Manager". The page includes a video player with a play button and a "Share & Embed" button. A sidebar on the left contains navigation options: Metadata, Thumbnails, Access Control, Scheduling, **Live Stream**, Related Files, Clips, and Users. The main content area is divided into sections for "Broadcasting URLs", "RTSP Broadcasting URLs", and "SRT Broadcasting URLs". Each section has fields for "Primary URL" and "Backup URL". There is a "Re-Generate Stream Token" button under the first section. At the bottom, a "Video Conference Integration" section is highlighted with a red box, showing a "SIP user" field with the message "SIP user hasn't been generated for this entry", a "Select stream source" dropdown menu, and a "Generate SIP User" button.

- **Analytics: PDF Export for Engagement Dashboard** - Admins can now download a PDF version of the dashboard from the engagement analytics tab. See [Engagement Dashboard Rich Media CMS](#) and [Working with Engagement Dashboard](#) for more information.

The screenshot shows the "Engagement" dashboard. At the top right, there is a "Download Report" button with a PDF icon, which is circled in red. Next to it is an "Expo" button. Below the header, there are two main sections: "Highlights" and "Top Videos". The "Highlights" section shows "4 Player Impressions" and a "See Details" link. The "Top Videos" section shows a video titled "Kaltura video" with a rating of "7.5/10" and a "See I" link.

Rich Media CMS Release Notes March 6, 2022 v7.2.0

Version: 7.2.0

Date Released: March 6, 2022

What's New

- Support for content security policy rules.*
- Player previews were updated to V7 in moderation report and thumbnail frame selector.
- Partner IDs were added to the change account dialog.

* Please note that due to CSP upgrades, the Share&Embed option is no longer supported on Internet Explorer 11.

Rich Media CMS Release Note February 6, 2022 v7.1.3

Version: 7.1.3

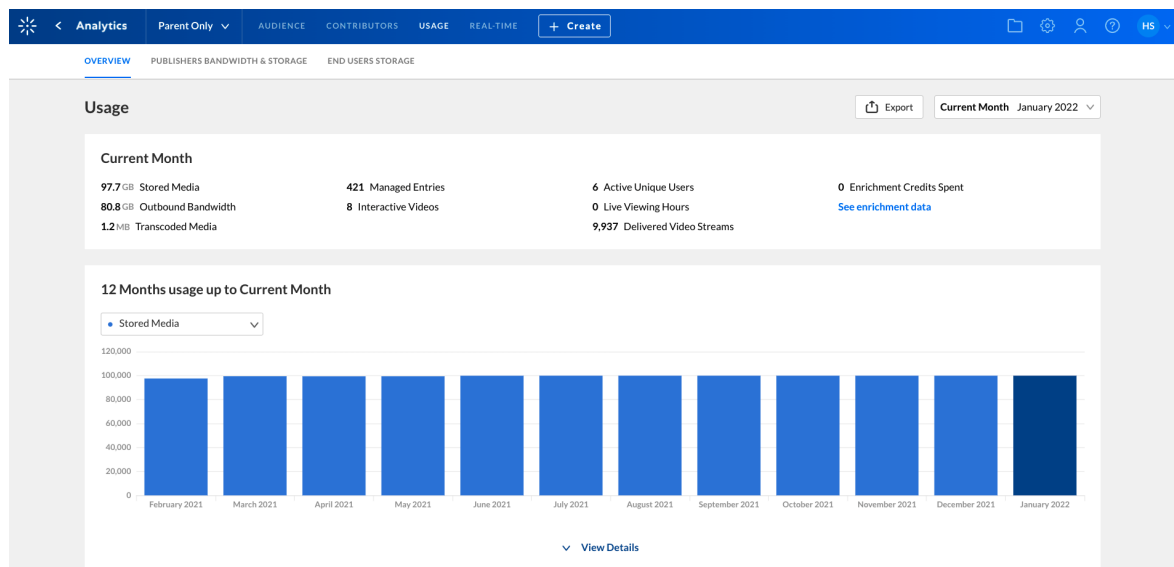

Date Released: February 6, 2022

What's New

- **Analytics Usage Dashboard**
 - New usage analytics dashboard with aggregated consumption data is now available for all users.
 - This addition offers actionable insights with filtering and exporting capabilities on your account's bandwidth, stored media, active unique users, live viewing

hours, managed entries, and more.

- Read more in the [Usage Overview Dashboard](#) article.

Rich Media CMS Release Note October 17, 2021 v7.0.0

Version: 7.0.0

Date Released: October 17, 2021

What's New

- **BREAKING CHANGES:** Rich Media CMS v7.0.0 includes breaking changes as its framework was upgraded from Angular 9 to Angular 11. Note that due to the framework upgrade, CSS classes might have been changed or removed. If you are running class based automation tests on the Rich Media CMS application - please revise your automation selectors.

Analytics

- Audience analytics dashboards (Technology and Geo location) may now be filtered by playback types such as: VOD, Live and DVR.
- Multiple choice selection has been enabled for playback types in the Engagement Dashboard.
- Additional metrics were added to the Real-time discovery graph: visual indicator for the metric type (QoS and Engagement), player errors metrics and download time metrics.
- The ability to filter by user, OS and browser in the Real-time dashboard has been

added.

Rich Media CMS Release Note August 15, 2021 v6.6.2

Version: 6.6.2

Date Released: August 15, 2021

What's New

Zoom Recording - New Transcoding Profile: A new transcoding profile will be applied automatically to all newly recorded content ingested from Zoom, both for recordings from the legacy Zoom integration or from the new Marketplace integration. The new transcoding profile generates a Full HD flavor and a SD flavor for smaller screens. The Full HD flavor is marked as the source and the original source flavor is not retained. Previous content is not affected. The new transcoding profile is applied only to the new Zoom recordings ingested to the system from now on.

This new transcoding profile was developed to create a more efficient transcoding logic and quality playback experience. This profile is not editable by admins.

Rich Media CMS Release Note May 23, 2021 v6.6.0

Version: 6.6.0

Date Released: May 23, 2021

What's New

- **Zoom Integration** - Management of the Kaltura Zoom Integration is now set in the Rich Media Content Management System instead of in Zoom. We improved the Zoom integration setup and management workflow. The Zoom Settings management is now implemented in the Rich Media CMS, in addition to the initial settings in Zoom during the setup. Authentication is done by using the Zoom Integration code that is generated in Rich Media CMS. See the article [Kaltura Video Integration with Zoom - Setup Guide](#) for additional information.

In the Rich Media Content Management System, under Settings > Integrations, admins can now:

1. View a list of the existing Zoom integrations.

2. Enable / Disable the Zoom integration
3. Edit the Zoom integration settings

Zoom Integration - New Features

- Delete recordings from Zoom after uploading recording to Kaltura. This feature saves space on Zoom storage. See [Kaltura Video Integration with Zoom - Setup Guide](#).
- Automatically publish to LMS categories. A one time set up of the LMS category (course) may be set up in Zoom. See [Publishing Zoom Recordings to LMS Categories](#).
- Support for Regional Cloud (Pending the update to the Q3 Regional Cloud release) and Kaltura [On-Prem](#).
- And more.

To enjoy all the new features, you will need to disable the integration and then enable it once again.

Rich Media CMS Release Note April 4, 2021 v6.5.2

*Please note that the first lines in this template are for the top summary table logic. It will be hidden on the front end.

Rich Media CMS Version: 6.5.2

Date Released: April 4, 2021

What's New

- **Analytics:** Filters have been added to the date picker to support selecting specific hours. You can filter analytics data and specify hours for a specified time period. For more information. See [Analytics Date Picker and Time Period Comparisons](#)

Rich Media CMS Release Note February 15, 2021 v6.5.0

*Please note that the first lines in this template are for the top summary table logic. It will be hidden on the front end.

Rich Media CMS Version: 6.5.0

Date Released: February 15, 2021

What's New

- **Added the "Played Until" filter to the entries list.** This filter is very useful to search for redundant or legacy entries and delete them. For more information see [The Content Menu](#).
- **entry/captions:** Support for additional caption languages. Contact your Kaltura representative for additional information about adding these languages. See [Using Subtitles and Captions](#) for information on how to select the language.
The additional languages are:
 - French (Canada)
 - Taiwanese Mandarin
 - Portuguese (Brazil)
- **Analytics:** Analytics for Manual Playlist are now available. See the article [Playlist Analytics](#) for more information.
- **Analytics:** The Domains Filter has been added to filter analytics data by domains. For more information see [Filtering Analytics](#).

Resolved Issues

ID	Description

- **Delete profile** - Users with Publisher Administrator role can delete the profile
- **Re-authenticate profile**- Users with Publisher Administrator role can re-

authenticate the YouTube token

For additional information see [Distribution Profiles](#).

Creating YouTube distribution profiles is via customer support only.

Rich Media CMS Release Notes April 2020 v5.25

*Please note that the first lines in this template are for the top summary table logic. It will be hidden on the front end.

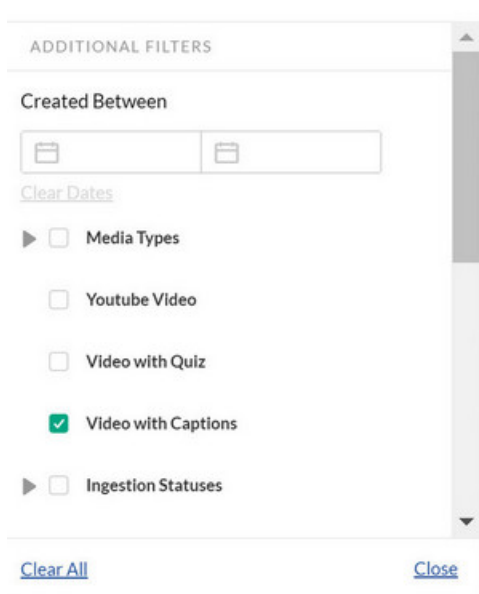

Rich Media CMS Version: 5.25

Date Released: April 12, 2020

What's New

This release provides quality improvements for searching in the Rich Media CMS. Algorithmic techniques for *detecting spelling errors* in text have been implemented. This following changes and additions have been made to the Rich Media CMS search.

- **Captions Search** - You can search for entries with captions by selecting Videos with Captions in the Additional Filters drop down menu.

- **Elastic Search Changes** - You can search for an exact phrase by using “ ” double quotes.

- **Partial Search**

When searching for up to **two** words, N-grams are used. N-grams are like a sliding window that moves across the word - a continuous sequence of characters of the specified length.

- Each word is broken into a 3 letter token.
- If there is a match of 80% - results are rendered.

When the number of search words is **greater than two**:

- All words searched must appear in the results (in any order)
- Demonstrative words such as this/that/... and prepositions are ignored.

- **Supported Operands** - The following operands are now supported: !

Exclamation point!

- The entire phrase to the left of the ! will be partially searched.
- The entire phrase to the right of the ! will be ignored even with an exact match

For example: **Jane!Rockport** will return all entries that include a partial portion of the name.

Jane! (anything with a partial portion of the name) - **Janet, Jano, Anette** will be rendered.

The term **Rockport** will be ignored.

Every search operates with partial search, there is no need no need to use the asterisk *.
