

Can I embed an interactive video?

Last Modified on 05/06/2026 8:40 pm IDT

 This article is designated for all users.

Yes! With the v7 player, you can embed interactive videos easily. As long as you're using the standard embed code, all parts of the interactive video will play, even if they include multiple media items. There's no need to worry about individual access settings for each item.

For step-by-step instructions, see:

- [Share and embed media](#)
- [Share and embed media from the Rich Media CMS](#)
