

Text Protection plugin

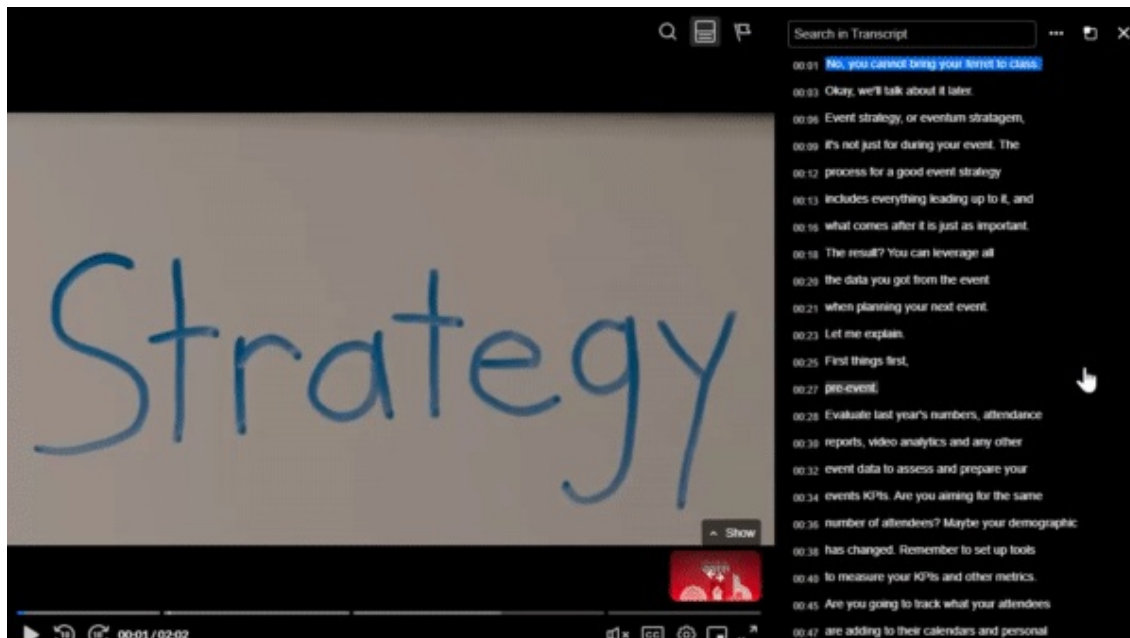

Last Modified on 07/06/2025 2:35 pm IDT

 This article is designated for all users.

About

The **Text Protection plugin** gives you more control over content security in your player. When enabled, it prevents viewers from highlighting, selecting, and copying text in captions, transcripts, and Q&A content. This helps protect sensitive information from being copied and shared.

Text protection off - Highlighting and copying text is allowed:

Text protection on - Highlighting and copying text is blocked:

Setup

To learn how to enable Text Protection on the player, see [Player - Settings](#).

Features

By default, Text Protection is turned off. When Text Protection is enabled:

- Viewers can't highlight or select captions shown on the video.
- Copying text from the transcript widget is blocked.
- Text in Q&A widgets can't be selected or copied.
- Right-click options for copying text are disabled.
