

## Media page in Video Portal

Last Modified on 04/10/2026 2:10 pm IDT

 This article is designated for all users.

### About

Kaltura's media page puts your video front and center with a clean, user-friendly layout. Easily find key details, share content, interact with viewers, and enhance your media with powerful tools - all in one place for a smooth viewing experience.

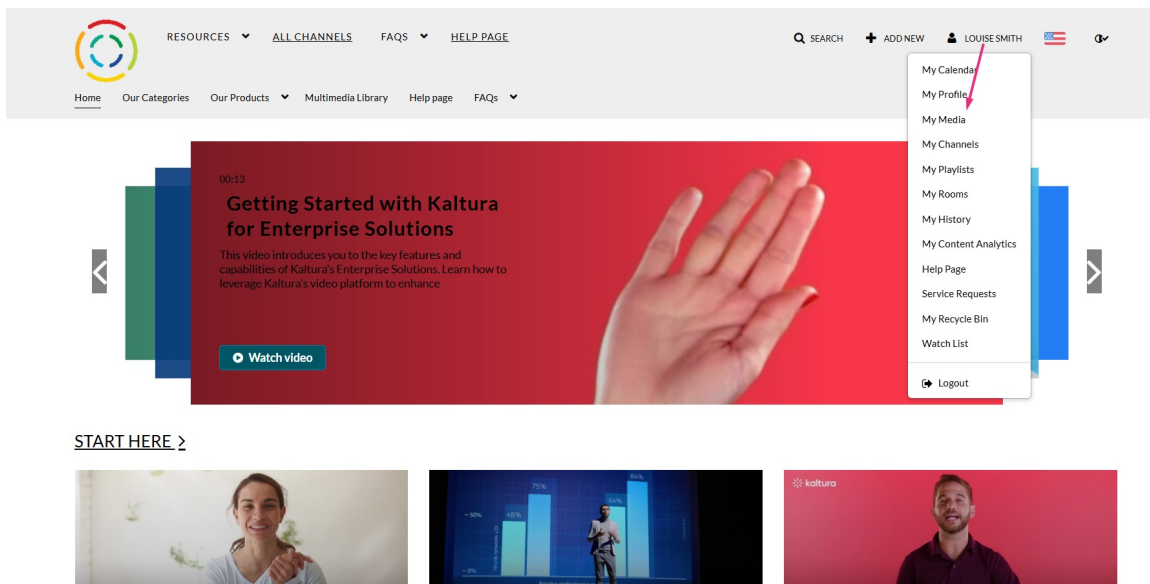

These instructions apply to the **legacy Video Portal**. If you're using the new Video Portal with Theming, see the [Content Hubs category](#).

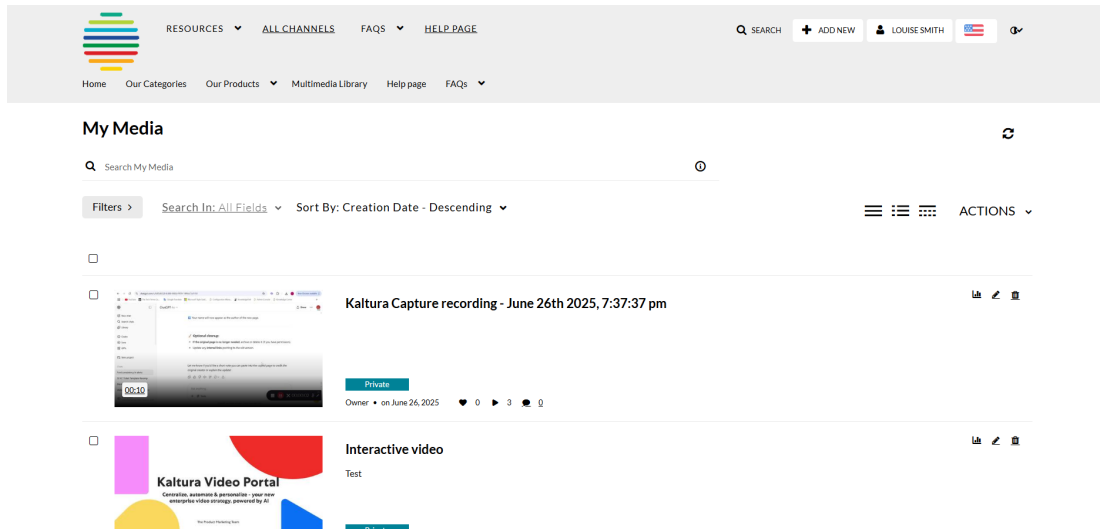

You must have media uploaded to in order to view media. See [Add New menu](#) for instructions on uploading and adding media.

### Access the media page

1. From your user menu, select **My Media**.

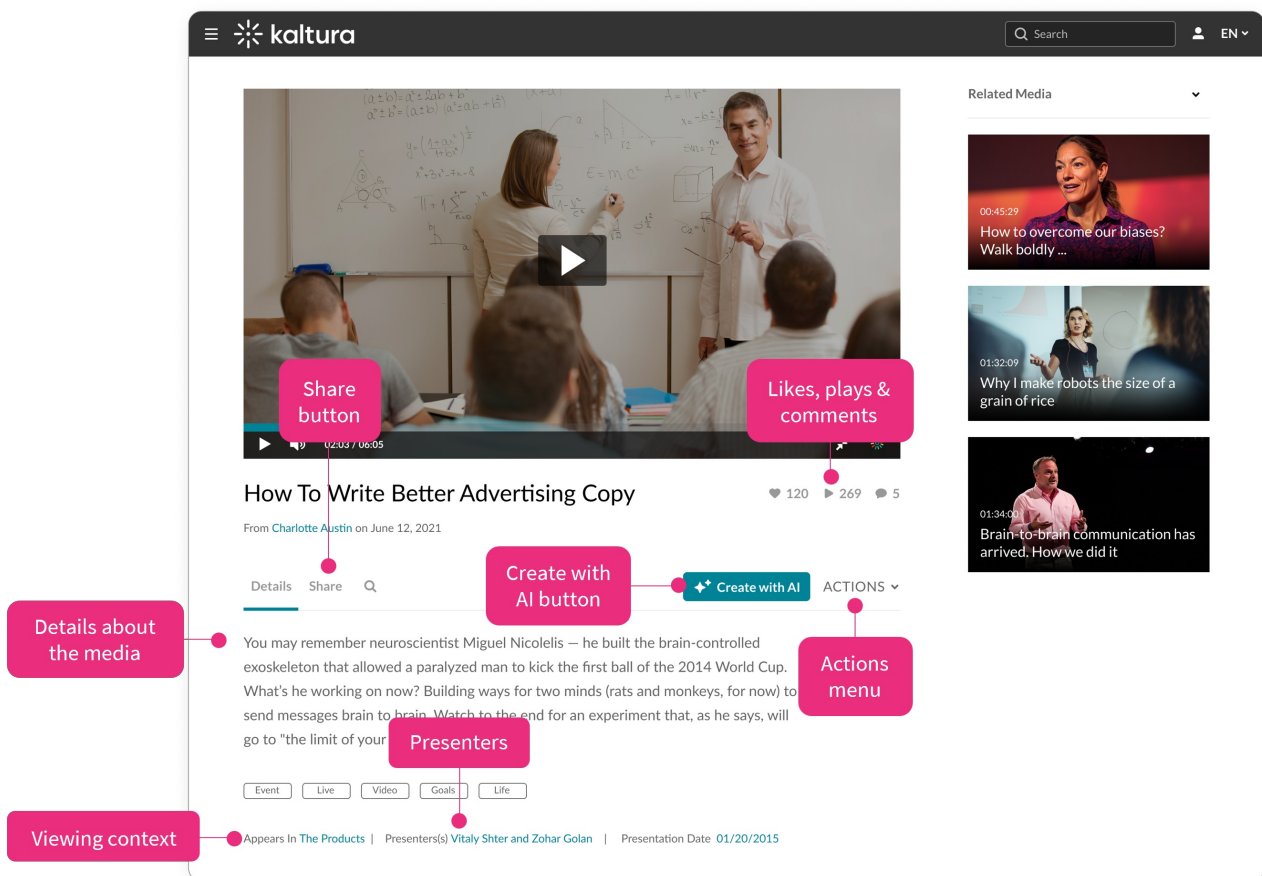

The 'My Media' page displays.

2. Click the desired entry's thumbnail or title to open the media page.

## Key features of the media page

- **Details about the media** - View information and metadata about the entry.
- **Share** - Click Share to get link to media page, copy embed code or share via social media. See our article [Share and embed media](#) for more information.
- **Likes, plays & comments** - To the right of the title, you can like or unlike the

media, see total likes, comments and play count. For more information, see [Media Likes, Plays, and Comments](#).

- **'Create with AI'** - Use Kaltura's AI tools to enrich or repurpose your content. Click to access [Content Lab](#) functionality. This button will be active and enabled only on applicable entries. If you click the **Create with AI** button on an entry with no captions, you can easily navigate and order captions with a click of a button. See [Create highlight clips with AI](#), [Create quizzes with AI](#), [Create a summary and chapters with AI](#), and [Enrich metadata with AI](#) for more information.
- **Actions menu** - Click to see additional options for your media. For more information, see [Actions menu](#).
- **Viewing context** - Shows where the entry is published.
- **Presenters** - Media owners can add presenters. To learn how, see our article [Add presenters to media](#).

Your media page might look a bit different depending on which features are turned on. See our article [Edit media](#) to learn about the things you can set up for your media page.

## Player and related media

- The player lets you play/pause, adjust volume, toggle captions, report issues, change playback speed, expand the screen, go full screen, link to [kaltura.com](#), or search the media. If enabled, you can show/hide the transcript and download or print it. For customizing your player, see our [player functions](#) category.
- The Related Media panel shows other content related to what's playing.

On iOS, videos automatically use the native media player.
