

## Poll questions

Last Modified on 03/16/2026 6:50 pm IST

 This article is designated for moderators

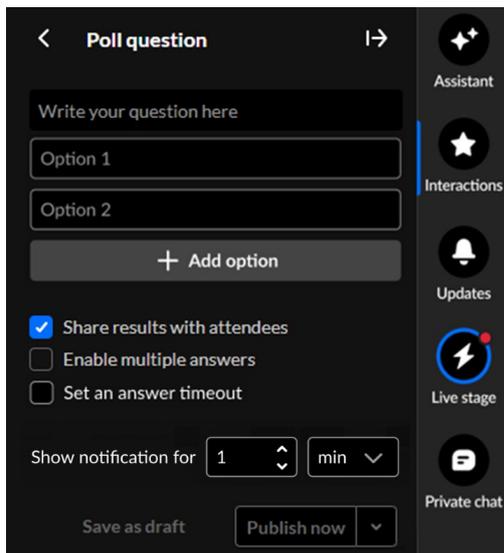

### About

Poll questions are a powerful way to engage your audience during an event. By adding interactive polls to your sessions, you can gather real-time feedback, spark discussion, and better understand your participants' opinions and knowledge. Whether you're hosting a webinar, virtual classroom, or large-scale event, polls help keep attendees involved and provide valuable insights for moderators.

This article explains how to create, manage, and use poll questions effectively within your event.

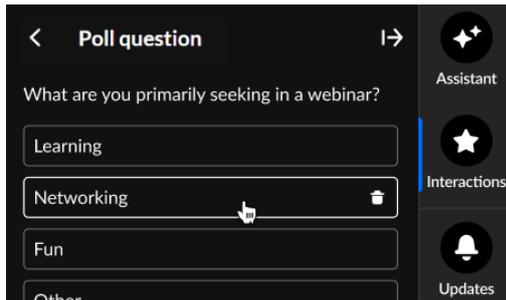

### Create and publish a poll question

1. Click **Poll** to begin creating a poll.

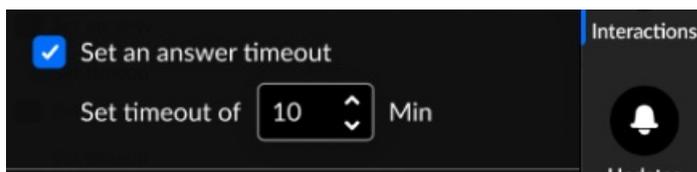

2. Type your question (up to 300 char) and options. Click **+ Add option** to add more options (up to 8 total).

If you want to remove an answer, hover over the answer and click the Delete "trashcan" icon.

3. Decide whether to share results with attendees.
4. You may set up your poll in such a way that your participants can select more than one option. Simply check the box "Enable multiple answers".
5. You may set an answer timeout (a response window for users) that controls how long the poll stays active. If enabled, an additional configuration displays, "Set time out of". Use the up and down arrows to set the number of minutes the poll will be available for users to answer.

- Default response window is 5 minutes
- Minimum is 1 minute and maximum is 120 minutes

During this time, participants see a countdown indicator. When the timer runs out, the poll automatically concludes.

6. You may specify how long the poll notification will be visible to users. Use the up and down arrows to set the number of minutes or seconds the poll notification will be shown.

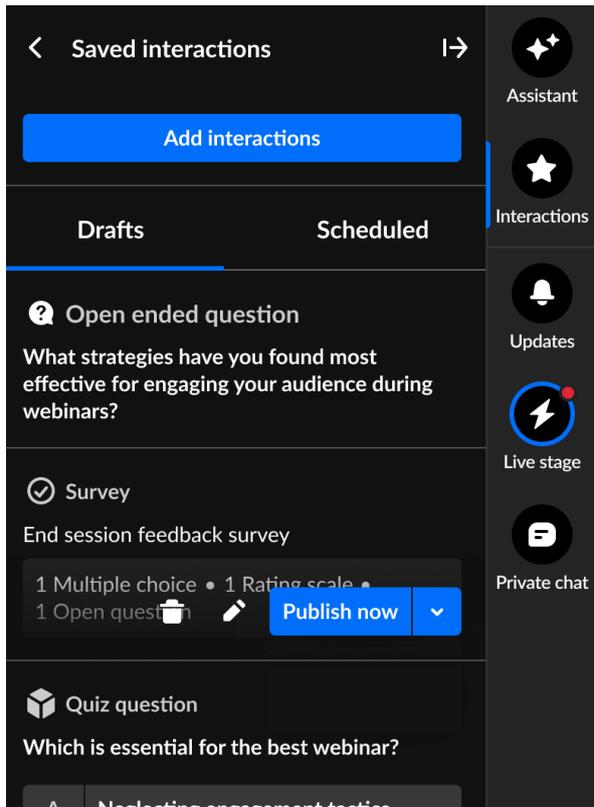

- When set to *seconds*, minimum is 5 seconds and maximum is 60 seconds
- When set to *minutes*, minimum is 1 minute and maximum is 10 minutes

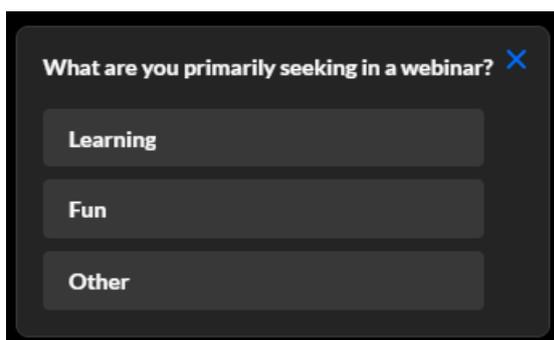

7. Decide whether to save as a draft, schedule, or publish now.

- **Save as a draft** - Click **Save as draft**. After you've saved an interaction as a draft, you may access it through the Drafts tab of **Saved interactions**. Hover over the draft and choose the appropriate option. Please note, interactions cannot be

modified within 2 minutes of scheduled time.

- **Schedule** - See [Schedule interactions](#).
- **Publish now** - Click **Publish now**. The interaction is published to your attendees immediately, initially displaying as a small toast popup in the lower left corner of the screen (example shown below), then displaying in the Feed sub-tab of the Live stage tab.
