

Interactions tab - Quiz question

Last Modified on 08/07/2025 4:03 pm IDT

 This article is designated for moderators

Create and publish a quiz question from the Interactions tab of the Chat and Collaboration widget

1. Click **Quiz question** to begin creating a quiz question.

2. Type your question (up to 300 char) and answers. Click **+ Add answer** to add more answers (up to 8 total).

If you want to remove an answer, hover over the answer and click the Delete "trashcan" icon.

3. You may set up your quiz in such a way that your participants can select more than one correct answer. Click on the check mark(s) next to the answer(s) you want to mark as correct. All answers can be marked as correct if needed. At least one

correct answer must be marked.

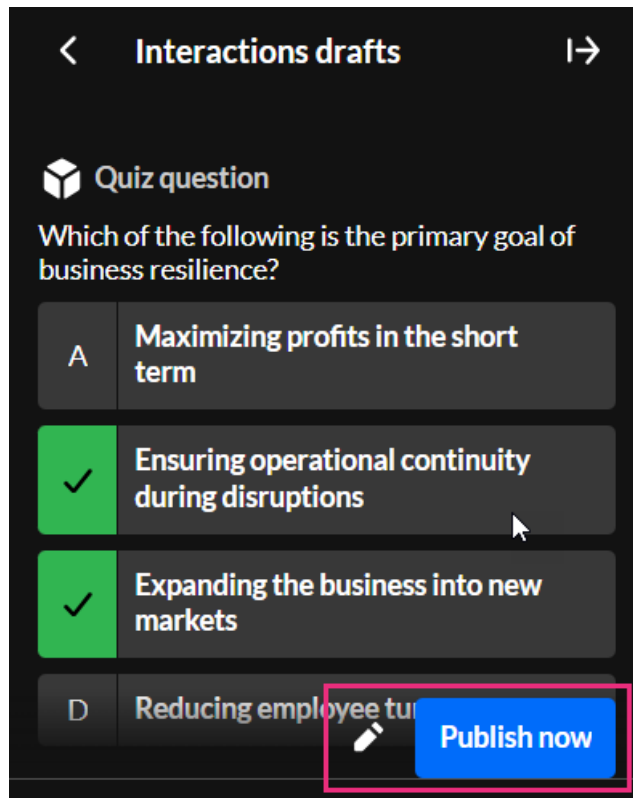

The answer(s) you select as correct, display green.

4. Decide whether to display the correct answer or share results with attendees, save as a draft, or publish now.

If you choose to *save the quiz question as a draft*, you may access it through the **Interactions drafts** button on the Interactions tab, hover over the draft and edit it or publish it now.

If you choose to *publish now*, it will be published to your attendees immediately, initially displaying as a small toast popup in the lower left corner of the screen, then displaying in the Feed sub-tab of the Live stage tab.
