

## Interactions tab - Quiz question

Last Modified on 02/01/2026 3:31 pm IST

 This article is designated for moderators

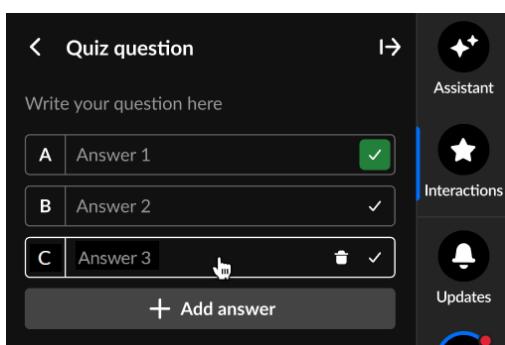

Create and publish a quiz question from the Interactions tab of the Chat and Collaboration widget

1. Click **Quiz question** to begin creating a quiz question.

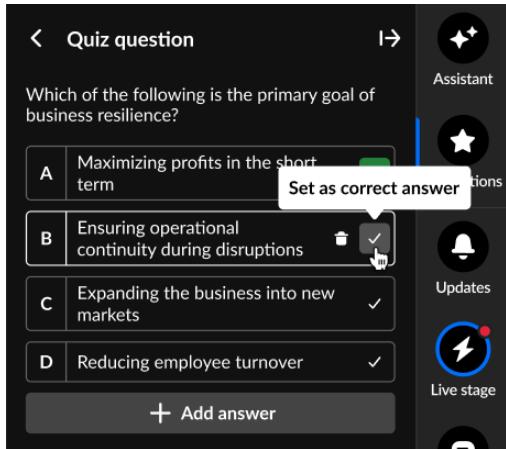

2. Type your question (up to 300 char) and answers. Click **+ Add answer** to add more answers (up to 8 total).

If you want to remove an answer, hover over the answer and click the Delete "trashcan" icon.

3. You may set up your quiz in such a way that your participants can select more than one correct answer. Click on the check mark(s) next to the answer(s) you want to mark as correct. All answers can be marked as correct if needed. At least one correct answer must be marked.

Quiz question

Which of the following is the primary goal of business resilience?

A Maximizing profits in the short term

B Ensuring operational continuity during disruptions

C Expanding the business into new markets

D Reducing employee turnover

**Set as correct answer**

4. Decide whether to display the correct answer to attendees.
5. Decide whether to share results with attendees.
6. You may set an answer timeout (a response window for users) that controls how long the quiz stays active. If enabled, an additional configuration displays, "Set timeout of". Use the up and down arrows to set the number of minutes the quiz will be available for users to answer.

Set an answer timeout

Set timeout of 10 Min

Updates

Live stage

- Default response window is 5 minutes
- Minimum is 1 minute and maximum is 120 minutes

During this time, participants see a countdown indicator. When the timer runs out, the quiz automatically concludes.

7. You may specify how long the quiz question notification will be visible to users. Use

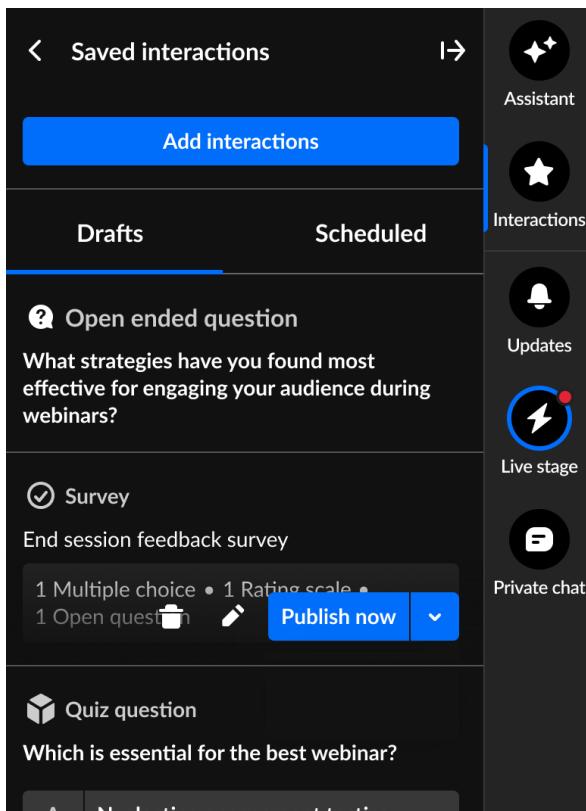

the up and down arrows to set the number of minutes or seconds the quiz question notification will be shown.
