 This article is designated for moderators

Create and publish a crowd vote poll from the Interactions tab of the Chat and Collaboration widget

1. Click **Crowd vote** to begin creating a crowd vote.

2. Type your question/statement and choose your crowd vote emoji.

3. Decide whether to share results with attendees.
4. You may set an answer timeout (a response window for users) that controls how long the poll stays active. If enabled, an additional configuration displays, "Set time out of". Use the up and down arrows to set the number of minutes the poll will be available for users to answer.

- Default response window is 5 minutes
- Minimum is 1 minute and maximum is 120 minutes

During this time, participants see a countdown indicator. When the timer runs out, the poll automatically concludes.

5. You may specify how long the crowd vote poll notification will be visible to users. Use the up and down arrows to set the number of minutes or seconds the crowd vote poll notification will be shown.

- When set to *seconds*, minimum is 5 seconds and maximum is 60 seconds

- When set to *minutes*, minimum is 1 minute and maximum is 10 minutes

6. Decide whether to save as draft, schedule, or publish now.

- **Save as a draft** - Click **Save as draft**. After you've saved an interaction as a draft, you may access it through the Drafts tab of **Saved interactions**. Hover over the draft and choose the appropriate option. Please note, interactions cannot be modified within 2 minutes of scheduled time.

The screenshot shows the 'Saved interactions' interface. At the top, there's a 'Saved interactions' header with a back arrow and a right arrow. Below it is a blue 'Add interactions' button. The interface is divided into 'Drafts' and 'Scheduled' tabs, with 'Drafts' currently selected. On the left, there are three interaction items: 1. 'Open ended question' with the question 'What strategies have you found most effective for engaging your audience during webinars?'. 2. 'Survey' with the question 'End session feedback survey' and a sub-section showing '1 Multiple choice • 1 Rating scale • 1 Open question' with a trash icon, a pencil icon, and a 'Publish now' button. 3. 'Quiz question' with the question 'Which is essential for the best webinar?'. On the right, there's a sidebar with icons for 'Assistant', 'Interactions' (selected), 'Updates', 'Live stage', and 'Private chat'.

- **Schedule** - See [Schedule interactions](#).

- **Publish now** - Click **Publish now**. The interaction is published to your attendees immediately, initially displaying as a small toast popup in the lower left corner of the screen (example shown below), then displaying in the Feed sub-tab of the Live stage tab.
