

## Interactions tab - Crowd vote

Last Modified on 10/27/2025 5:03 pm IST

This article is designated for moderators

Create and publish a crowd vote poll from the Interactions tab of the Chat and Collaboration widget

1. Click **Crowd vote** to begin creating a crowd vote.

2. Type your question/statement and choose your crowd vote emoji.

- 3. Decide whether to share results with attendees.
- 4. You may set an answer timeout (a response window for users) that controls how long the poll stays active. If enabled, an additional configuration displays, "Set time out of". Use the up and down arrows to set the number of minutes the poll will be available for users to answer.
- Default response window is 5 minutes.
- Minimum is 1 minute.
- Maximum is 120 minutes.

During this time, participants see a countdown indicator. When the timer runs out, the poll automatically concludes.

- 5. Decide whether to save as draft, schedule, or publish now.
- Save as a draft Click Save as draft. After you've saved an interaction as a draft, you may access it through the Drafts tab of Saved interactions. Hover over the draft and choose the appropriate option. Please note, interactions cannot be modified within 2 minutes of scheduled time.

- Schedule See Schedule interactions.
- Publish now Click Publish now. The interaction is published to your attendees
  immediately, initially displaying as a small toast popup in the lower left corner of the
  screen (example shown below), then displaying in the Feed sub-tab of the Live stage
  tab.
