

Share and embed playlists in Video Portal - Theming

Last Modified on 04/04/2026 4:38 pm IDT

 This article is designated for all users.

About

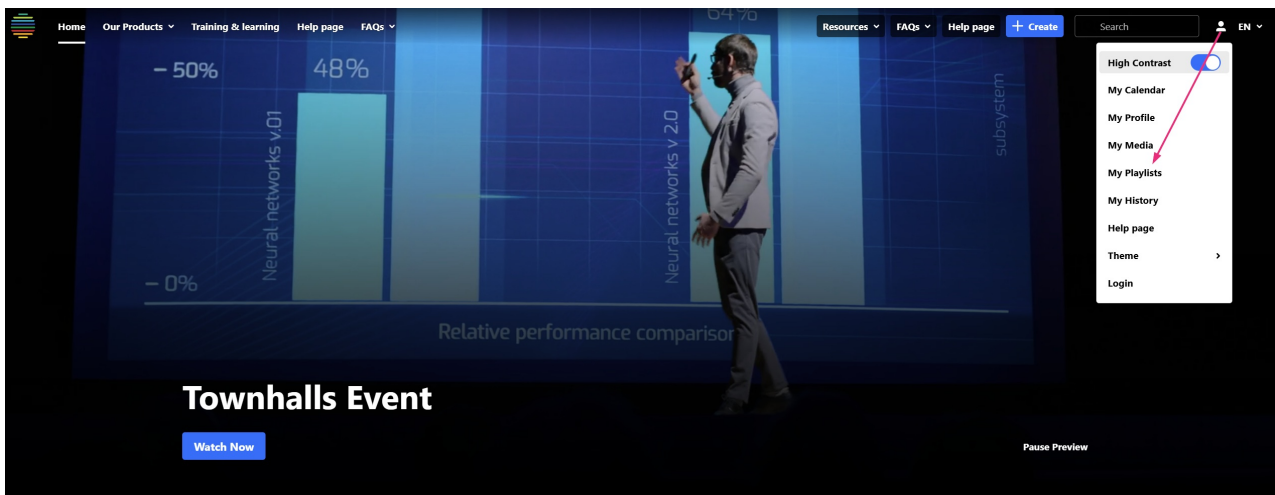

From the [My Playlists page](#), you can share any playlist using the built-in share feature. This lets you copy a direct link, post to social media, or embed the playlist, depending on your site settings.

- If you cannot share and embed playlists, ask your administrator to give you the required permission.
- Embedding playlists is only available when the [Embedplaylist module](#) is enabled.
- These instructions are for [Theming](#) users. For non-Theming users, please see our article [Share and embed playlists](#).

Access the My Playlists page

From the user menu in your video portal, select **My Playlists**. (If you don't see this option, ask your administrator to give you the required permission.)

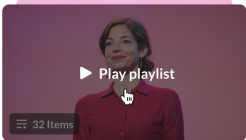

Most popular videos

The 'My Playlists' page displays.

Edit

Share

Delete

The Share window opens with multiple options.

3. From here you can:

- Click **Copy** to copy a direct link to the playlist page
- Click one of social media or messaging platform to share the playlist that way
- Click the email icon to open your email client with the link pre-filled
- If embedding is enabled, click the **embed icon** to open a separate window with the embed code (see instructions below)

i The **Watch List** playlist cannot be shared or embedded.

Embed a playlist

1. Click the **embed icon**.

The embed window opens.

Embed

Embed code

```
<iframe  
src="https://api.nvq2.ovp.kaltura.com/p/15932/e  
mbedPlaykitJs/uiconf_id/23831962?  
iframeembed=true&playlist_id=0_509iuwvx&confi
```

Choose player

Playlist Player

Max embed size

400x620

Close [Copy embed](#)

The embed window allows you to:

- Play the playlist directly in the preview window to see how it will appear
- Copy the embed code for use on another site
- Choose a player from the dropdown
- Set the max embed size from the available layout options
- These settings help control how the embedded playlist looks and functions on the destination page.

2. When ready, click **Copy embed** to grab the full code, and then click **Close**.
