Why can't I see the time elapsed or time remaining in my Interactive Video?

Content updated: 08/04/2025

For Interactive Video Paths played on the v7 player, the time elapsed/remaining display is intentionally hidden. Since the video is made up of separate segments that load dynamically based on viewer choices, there’s no single continuous timeline to display. This design supports the interactive storytelling structure and keeps viewers focused on the content rather than passively watching.
