

Conditional Entry Page URL - Admin Guide

Last Modified on 06/04/2026 9:18 am IDT

 This article is designated for administrators.

About

The **Conditionalentpagementurl** module adds a button to the Entry page, which is displayed conditionally based on a custom metadata field. Follow the steps to log into the Configuration Management section and configure the Conditionalentpagementurl module.

 This module is for both Theming and non-Theming users.

 For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

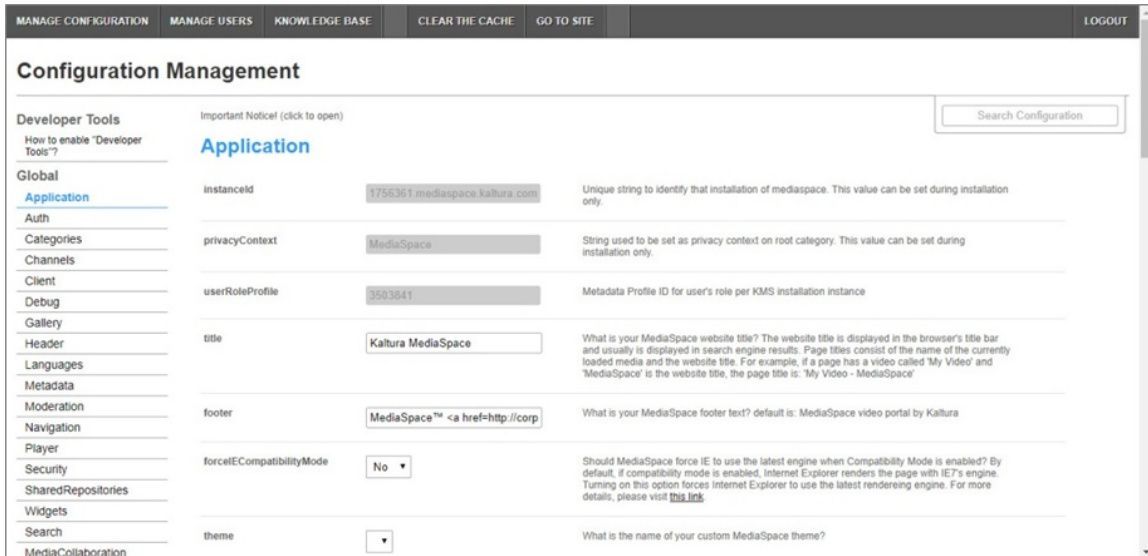

Before you begin

The button will display on the Entry page **only if** the following conditions are met:

1. A [custom schema](#) is added in the Rich Media CMS.
2. The Customdata module is enabled and configured. The custom metadata profile displayed **depends** on the custom metadata profile selected on the Customdata module.
3. The metadata field that controls the button's visibility is set with a value.
4. A valid URL is provided in a separate custom metadata field designated for the button link.

Configure

1. Log into the Configuration Management console by going to your Video Portal URL and adding */admin* at the end.
 2. Enter your Kaltura user ID and password.
 3. Click **Sign In**.
- The Configuration Management console displays.

Application

Search Configuration

instanceld: 1756361.mediaspace.kaltura.com
Unique string to identify that installation of mediaspace. This value can be set during installation only.

privacyContext: MediaSpace
String used to be set as privacy context on root category. This value can be set during installation only.

userRoleProfile: 3503841
Metadata Profile ID for user's role per KMS installation instance

title: Kaltura MediaSpace
What is your MediaSpace website title? The website title is displayed in the browser's title bar and usually is displayed in search engine results. Page titles consist of the name of the currently loaded media and the website title. For example, if a page has a video called "My Video" and "MediaSpace" is the website title, the page title is: "My Video - MediaSpace"

footer: MediaSpace™ <a href=http://corp
What is your MediaSpace footer text? default is: MediaSpace video portal by Kaltura

forceIECompatibilityMode: No
Should MediaSpace force IE to use the latest engine when Compatibility Mode is enabled? By default, if compatibility mode is enabled, Internet Explorer renders the page with IE7's engine. Turning on this option forces Internet Explorer to use the latest rendering engine. For more details, please visit [this link](#).

theme:
What is the name of your custom MediaSpace theme?

- In the list of configurable items on the left of your screen, locate and click on Conditionalentrypageurl. (The item will be crossed out because it's disabled by default.)

□ If this module is not in your Video Portal application, please get in touch with your Kaltura representative to inquire about adding it.

The Conditionalentrypageurl window displays.

Conditionalentrypageurl

Search Configuration

Module info

desc: Add button with external url on view entry page

version: 1.0.1

enabled: No
Enable the Conditionalentrypageurl module.

conditionalMetadataField: DepartmentName (textType)
The metadata field that controls whether the button will be displayed in the media page. If the metadata field value is one of '0', 'false', 'no' - the button will not be displayed, otherwise it will.

urlMetadataField: DepartmentName (textType)
The metadata field that contains the URL. Note: this module does a basic verification of the URL value. If this metadata field's value is empty or doesn't have a valid URL, the button will not be displayed.

urlButtonIcon: None

urlButtonColor:
Background color for button in hex format (Example: #A7F51B)

urlButtonText:
Text for the button

Save

The **Module Info** box displays the module name, description (what enabling this module allows users to do), and version number.

- In the enabled pull-down list, select **Yes** to enable the Conditionalentrypageurl module.

Other configurable items following the enabled pull-down list are as follows.

Configuration Name	Options	Description
conditionalMetadataField	Depends on configuration of Customdata module.	The metadata field that controls whether the button will be displayed in the media page. If the metadata field value is one of: '0', 'false', 'no' - the button will not be displayed, otherwise it will.
urlMetadataField	Depends on configuration of Customdata module.	The metadata field that contains the URL. Note: this module does a basic verification of the URL value. If this metadata field's value is empty or doesn't have a valid URL, the button will not be displayed.
URLButtonIcon	None Add Star Full External Link Mail Share Download Upload Resolved Warning Circle Warning Triangle	Icon for the button (Example: icon-shopping-cart).
URLButtonColor	Free text	Background color for button in hex format (Example: #A7F51B)
urlButtonText	Free text	Text for the button

6. Click **Save**.

You receive a notice that your configuration for Conditionalentrypageurl was saved and the cache was cleared.

Upload media and configure button

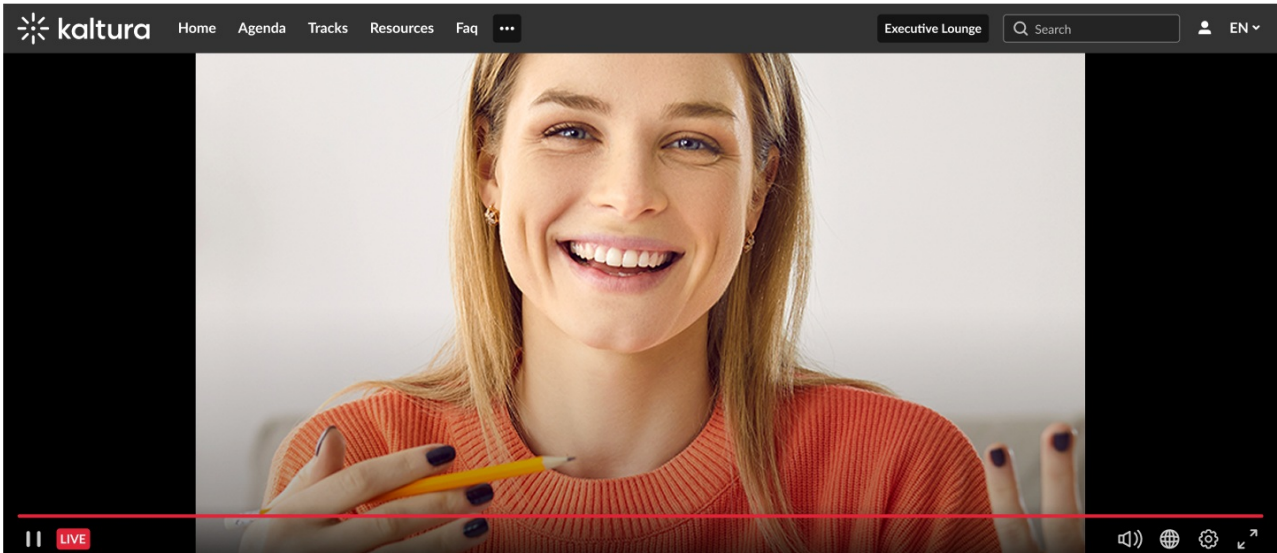

1. Upload media.
2. Navigate to the Edit media page.
3. Type in the conditional metadata field.
4. Select a value for URL Metadata field.
5. Click **Save**.

User experience

Once enabled, the button appears on the entry page for the end user.

This example shows the entry page for a Theming user, with the button circled.
