

Connecting Your Microphone or Camera

Last Modified on 08/25/2025 7:29 pm IDT

Adjust your camera/audio in the [Settings page](#). Select the camera/microphone you would like to use during the meeting.

External cameras can be used to connect to a live room as long as the computer recognizes the camera attached. Make sure to select the correct devices in the Settings tab.

If you have difficulty connecting your camera/audio, please try one of the recommendations:

- Refresh the page - A simple **page refresh** usually fixes the camera/audio connectivity.
- Test your devices [here](#) and see if the problem persists.
