

Class Genie's sources

Last Modified on 09/01/2025 4:10 pm IDT

 This article is designated for all users.

About

Genie builds its answers using your organization's verified videos and documents. This article explains how to view, identify, and interact with the sources used in a response.

Where to find sources

Under each answer, whether flashcard or text, Genie displays a **Sources** section. This includes:

- Thumbnails for each video or document used
- The entry title, and if available, additional info (like season/episode or document type)
- A plus (+) icon if more sources were used than fit in the visible list

Sources are shown per answer; in threaded conversations, each answer has its own Sources section.

Displaying sources is optional and determined by the system. You may not see this section for every answer.

Key takeaways from the Q3 Product Releases

I created a series of flashcard summarizing the key takeaways from the Q3 Product Releases.

FLASHCARDS 1/5

INTRODUCTION

A quarter focused on ROI tools for Virtual Events

Get ready to dive into our Q3 Product Releases, where we'll showcase the latest features, updates, and enhancements designed to elevate your experience and drive results.

Main releases:

- Comments threads upvote in live sessions
- Email scheduling and AI email template creation
- Open ended and multiple choice questions
- Event dashboard revamp

KEY TAKEAWAY 1

Email scheduling part of event

Event organizers can now schedule email communication, either at designated times or relative to event start/end.

Alternatively, they can schedule email communication to go out at designated times relative to the event, such as:

- A week or day before the event
- A few hours before the event
- Right after the event

SOURCES

- Building Business Resilience: Episode 1 Season 1 (Video)
- Building Business Resilience: Episode 1 Season 1 (Video)
- Product Roadmap Q2 2025 Document (Document)
- +3

- I want to know further on the same topic →
- Ask me anything →

Supported source types

Genie supports the following:

- **Video entries** - Used with spoken dialogue or OCR (on-screen text)
- **Document entries** - Including PDFs, PowerPoint files (PPTX), and Word documents (DOCX)

Interact with sources

Click any source tile to open the original file or video in a new tab. When available:

- Videos open at the correct timestamp

- Documents open at the relevant slide or page
- OCR images shown in flashcards represent captured on-screen text

Genie respects your organization's permissions and users only see and access content they're allowed to view. If a source is missing or inaccessible, it won't appear in the list.
