Monitor agent activity

Last Modified on 10/28/2025 4:44 pm IST

This article is designated for all users.

About

You can monitor all the runs, actions, and decisions made by an agent. This article will guide you through the process of monitoring an agent's activity.

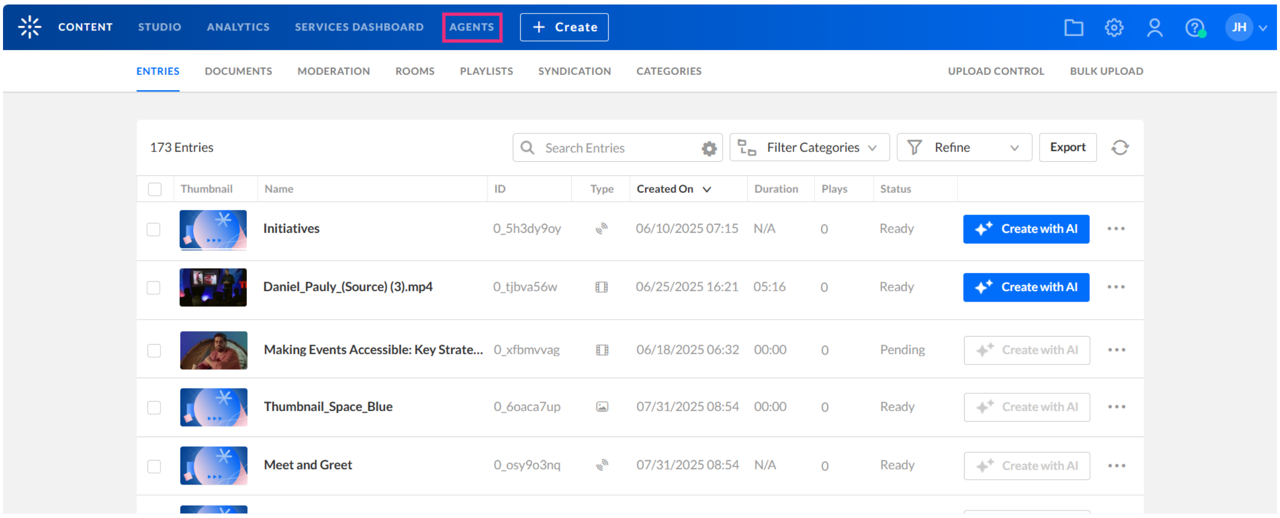
Looking for more information about this feature? Feel free to contact your Kaltura representative.

Before you start

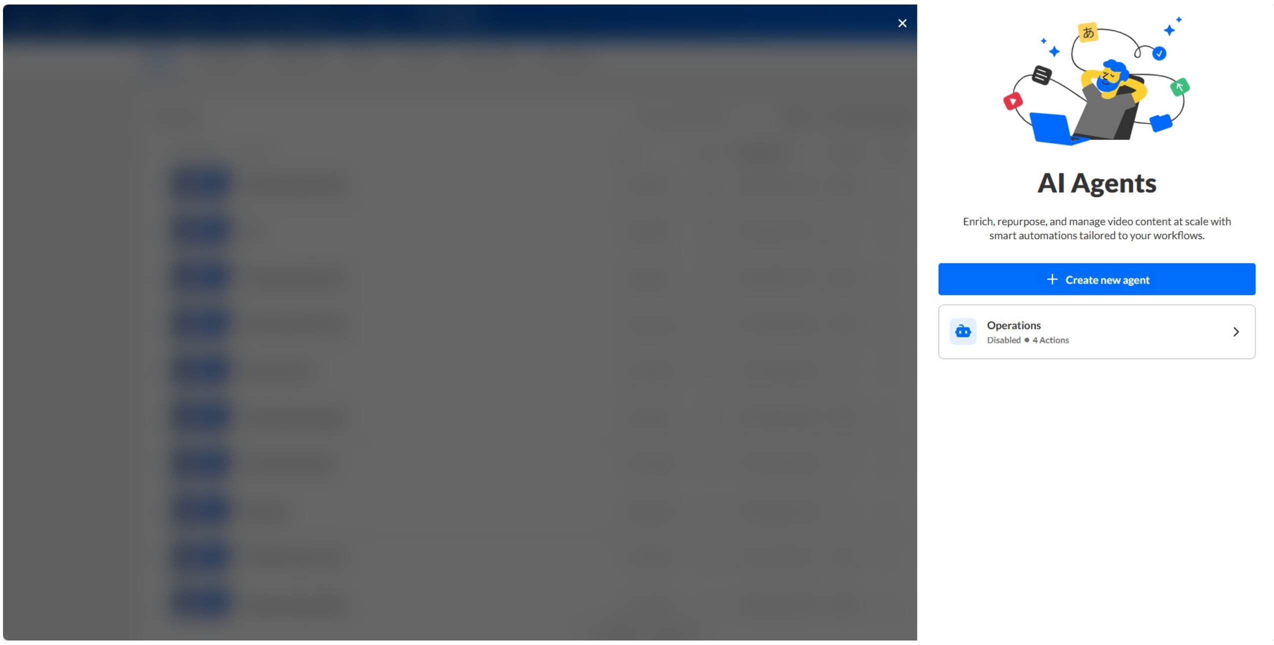
- Your account must have Agents enabled
- If you want to use REACH-based actions (such as captions, moderation, or audio description), your account must have an active REACH profile with the relevant catalog item(s).

Access the Agents screen

In the KMC, select **Agents** from the top navigation bar.

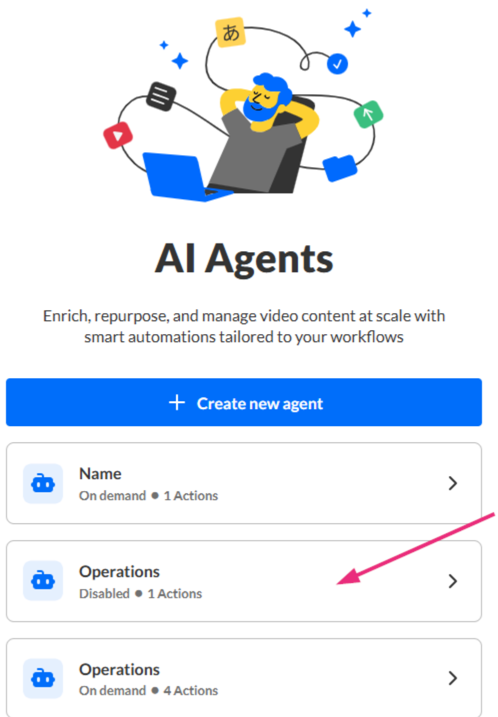


The AI Agents screen displays. The agents you've created are listed below the **Create new agent** button.

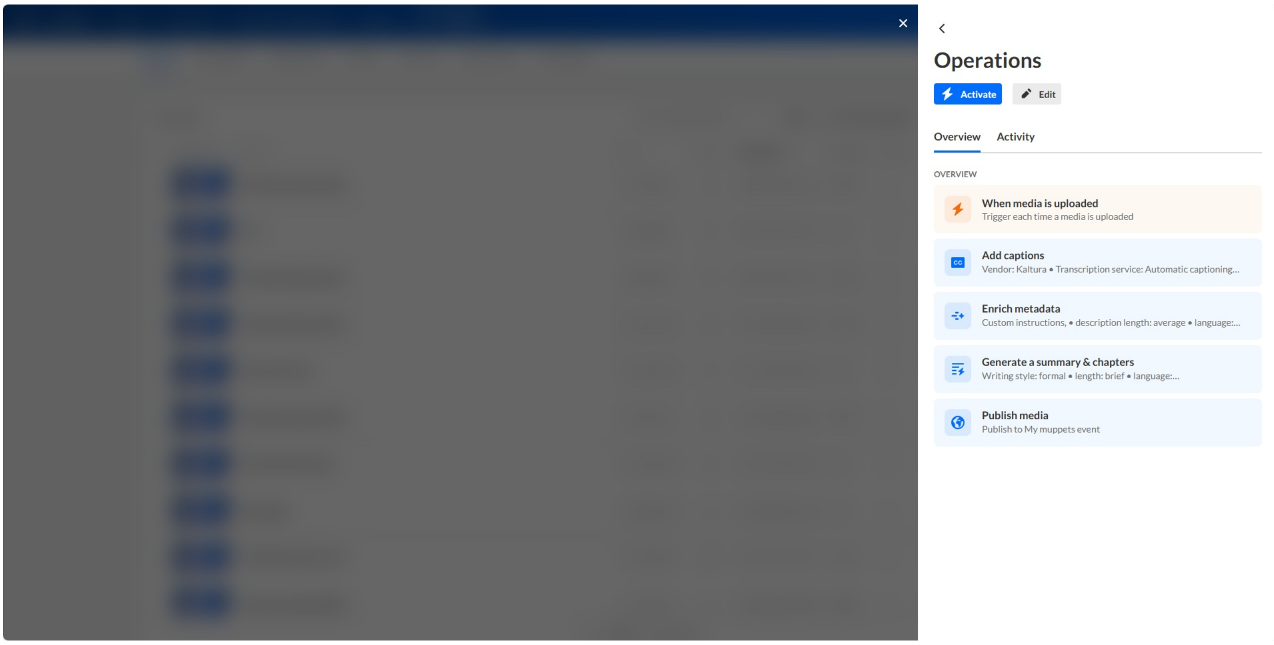


Monitor agent activity

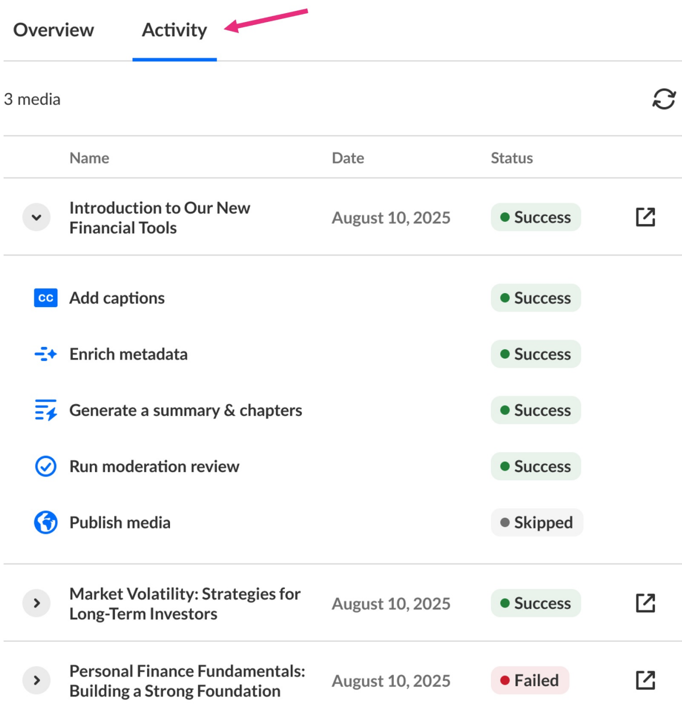
Click on the agent you would like to activate.



The agent page displays with the **Overview** tab activated.



Click the **Activity** tab.



The Activity tab displays a list of runs and/or input items (entries, events, etc. depending on the agent) on which the agent ran. For each item, the following is displayed:

- Item name
- Date that the agent ran on that item

- Status of the run
- Button linking to media

	Click the **Refresh** button to refresh the activity results.
	Click the **down arrow** to the left of an item to drill down and see the list of actions that were run and the end result.
	Click the **Go to media** button to go to the media page to review and/or edit the results of the agent actions.
